eContent Lab for psychosocial risks at work prevention. VISIONARY project transference

2011-1-ES1-LEO05-35900

http://www.adam-europe.eu/adam/project/view.htm?prj=8505

Projektinformationen

Titel:	eContent Lab for psychosocial risks at work prevention. VISIONARY project transference
Projektnummer:	2011-1-ES1-LEO05-35900
Jahr:	2011
Projekttyp:	Innovationstransfer
Status:	abgeschlossen
Land:	ES-Spanien
Marketing Text:	Prevent psicosocial risk at work through collaborative learning!

Zusammenfassung:

Psychosocial risks such as violence and bullying can lead to stress at work.Stress affects the health and safety of individuals, but also the health of organisations and national economies.

Reducing work-related stress and psychosocial risks is not only a moral, but also legal imperative. There's a strong business case as well. In 2008, the annual economic cost of work-related stress in the EU-25 was estimated at 20 billion Euros.

The Community strategy on health and safety at work 2007-2012 (COM(2007) 62 final) explicitly highlights psychosocial issues as important factors in the workplace and calls for the development of a more preventive culture with priority given to mental health in the workplace. The strategy calls for an assessment to be made of the European framework agreement and a recent conference on 'Tackling work-related stress in the EU' (July 2009) took stock of the experience and lessons learned from implementing the European social partners' autonomous framework agreement on work-related stress agreed in 2004.

In other hand the Report on work plan Violence and Harassment a European picture (European Commission, 2010) concluded that (among others) two main activities were developed:

- Implement more preventive initiatives for avoiding the psychosocial risk at work;

- Improve the access to the best practices and other resources addressed to prevent the violence at work (bullying. Moving) and stress situation that can cause any psycosocial risk at work.

Considering the above reasons, PreventionLab2.0 project aimed to transfer the VISIONARY project with the following objectives:

- To agree a common approach about the psychosocial risks at work, their causes and their consequences;

- To identify different resources developed European level to prevent the psychosocial risk at work;

- To define a curricula on psychosocial risk prevention;

- To elaborate some training pathways based on the resources identified;

- To develop a collaborative and participative learning environment based on web 2.0.

In order to answer the actual challenges about phychosocial risk at work, and considering the methodological proposal of the VISIONARY project, the PreventionLab2.0 elaborated a learning platform for improving the training offer addressed to prevent the psychosocial risk at work.

The partnership was formed by 5 different entities coming from different areas,

Projektinformationen

ensuring quality in the project implementation: two institutions with a broad experience on the subject tackle by the project (ASIMAG and PREVENT), a technological partner (INFOART) who developed the learning platform, a university (ZEPF) that works in the methodological development for preventing any unhealth phycosocial situation, and finally a public institution that support the decission makers throuh the social research activities.

Beschreibung: The project aimed to create a collaborative learning environment intended to promote the health and safety at work through the prevention of psychosocial risks at work.
The partnership was formed by 5 institutions that cover the main working areas tackled by the project, carried out a deep analysis of the national situations in which concern the prevention of psychosocial risks. The analysis included a desk research based on national legislation, labour market situation and impact of psychosocial risks and training offer in the field and a collection of resources and good practices. Furthermore, experts and health and safety at work trainers were interviewed in order to detect their professional needs and better elaborate the project major product: the collaborative environment.
The project partners also defined the transference strategy: from bullying at school (VISIONARY project subject) to psychosocial risks at work. The partners implemented a SWOT analysis of the project in which the transference is based in order to update and upgrade previous contents and reach the new project target group.
The partnership implemented the dissemination and exploitation strategy by creating the channels to involve the target groups in the project. PREVENTION LAB 2.0 included traditional dissemination means such as posters, leaflets, newsletters and an official website available in all project partners' languages, but also interacted with the potential end users through more innovative means such as social networks (Facebook, twitter and LinkedIn)
During the project second year, the most important activities were related to the elaboration of the Web 2.0 tool in which the collaborative environment is based and tested it among experts and end users. Furthermore, the partners reinforced the exploitation strategy by developing a sustainability plan and creating a specific handbook on how to use the previous mentioned Web 2.0 tool after the Community grant.
The Intellectual Property Agreement is the formal document that gathers the main features of the further use of the Project results, both among partners and with other bodies or interested parties.

Projektdateien

10_FINAL VALORISATION REPORT.pdf

http://www.adam-europe.eu/prj/8505/prj/10_FINAL%20VALORISATION%20REPORT.pdf

This document describes all the dissemination activities carried out by the consortium during the project implementation. The report contains also proof documents like: photos, programmes, screenshots of the webpages in where the project was disseminated.... It presents an overview of the projectn impact on the target group. The document is addessed to the project consortium, the Spanish LdV Agency and those interested people.

11_EXTERNAL EVALUATOR MID TERM REPORT.pdf

http://www.adam-europe.eu/prj/8505/prj/11_EXTERNAL%20EVALUATOR%20MID%20TERM%20REPORT.pdf

This document includes the conclusions, recommendations and evaluation of the subcontracted external evaluator.

14_Internal Evaluation Report_Final.pdf

http://www.adam-europe.eu/prj/8505/prj/14_Internal%20Evaluation%20Report_Final.pdf

This document includes the conclusions of the evaluation procccess carried out internally by the partnership and the recommendations receveid from the pilot committees in all partners' countries.

16_FINAL REPORT.pdf

http://www.adam-europe.eu/prj/8505/prj/16_FINAL%20REPORT.pdf

The final report to be submitted to the OAPEE after the conclusion of the project contains a description of various aspects, such as results achieved, the objectives fulfilled, financial status, conclusions, etc. The report also includes a critical analysis of the project and a description of the mechanisms to be used to ensure its future sustainability.

2_REPORT_WP2.pdf

http://www.adam-europe.eu/prj/8505/prj/2_REPORT_WP2.pdf

The report analyses the state of the art in relation to psychosocial risks at the workplace from a EU perspective (especially in the partners countries: about Spain, Bulgaria, Germany, Belgium and Lithuania).

3_GUIDE FOR TRANSFERENCE_FROM VISIONARY TO PREVENTION LAB 20.pdf

http://www.adam-europe.eu/prj/8505/prj/3_GUIDE%20FOR%20TRANSFERENCE_FROM%20VISIONARY%20TO%20PREVENTION%20LAB%2020.pdf

For answering the actual challenges about psychosocial risk at work and considering the methodological proposal of the VISIONARY project, this Transference Guide analyses VISIONARY in deep (transferred project) and show the strengths and weaknesses of the conception. In the following step the Guide analyses the transferability of the different sections and give ideas for the realization in the new PREVENTION LAB 2.0 platform. Furthermore it aims to find new, modern, appropriate training pathways based on a Web 2.0 concept.

As the final result, the Transfer Guide defined the actual transference by listing concrete guidelines for the implementation. It shall help the partners with the design, the construction, the redaction of content as well as with the technical realization of the new conception.

5_PROJECT WEBSITE AND INTERNAL AREA.pdf

http://www.adam-europe.eu/prj/8505/prj/5_PROJECT%20WEBSITE%20AND%20INTERNAL%20AREA.pdf

7_VALIDATION REPORT.pdf

http://www.adam-europe.eu/prj/8505/prj/7_VALIDATION%20REPORT.pdf

The report gathers the conclusions on the validation process according to the results achieved in each partner country. It analyses both the technical approach (accessibility, facility to download contents, user friendly, speed of use, etc) and the training contents (adequacy to the target group, degree of comprehension, usefulness, etc).

8_INTERNAL EVALUATION METHODOLOGY.pdf

http://www.adam-europe.eu/prj/8505/prj/8_INTERNAL%20EVALUATION%20METHODOLOGY.pdf

This methodology establishes the criteria to follow in order to ensure a proper project management. It also includes indicators for assessing the achievement of the initial objectives. The methodological approach is flexible and can be updated according to the circumstances that may arise during the project lifetime.

Projektdateien

9_PILOT COMMITTEES METHODOLOGY.pdf

http://www.adam-europe.eu/prj/8505/prj/9_PILOT%20COMMITTEES%20METHODOLOGY.pdf

This evaluation is needed for donors to ensure that the project is implemented well and that the project objectives are being achieved. Although the project implementation will be monitored through project progress reports a more comprehensive and objective evaluation by external and independent entities or experts is deemed necessary to validate results reported and to highlight project successes.

EXPLOITATION STRATEGY.pdf

http://www.adam-europe.eu/prj/8505/prj/EXPLOITATION%20STRATEGY.pdf

The exploitation strategy contains the guidelines to follow in order to assure the project sustainability and awareness regarding the project products after the end of the grant. It is flexible and adaptable in order to meet the specific needs of the target groups and stakeholders after the project lifetime. It includes European and national strategies.

EXTERNAL EVALUATOR_SECOND YEAR.pdf

http://www.adam-europe.eu/prj/8505/prj/EXTERNAL%20EVALUATOR_SECOND%20YEAR.pdf

This document includes the conclusions, recommendations and evaluation of the subcontracted external evaluator for the years of project.

HANDBOOK_EN.pdf

http://www.adam-europe.eu/prj/8505/prj/HANDBOOK_EN.pdf

The handbook is aimed at facilitating the use of the PREVENTION LAB 2.0 platform. It underlines the most important concepts of psychosocial risks and links it to the PREVENTION LAB 2.0 tool. More concretely, it summarises the content of the website and serves as a manual through the platform.

LEAFLET_EN.pdf

http://www.adam-europe.eu/prj/8505/prj/LEAFLET_EN.pdf

As common dissemination action established within the Dissemination Plan, the consortium developed a common leaflet that wants to disseminate the project in general. The leaflet contains the following information:
- Project partners and contact data
- Project objectives and results
- Project activities.

NEWSLETTER 1_PREVENTION LAB_EN.pdf

http://www.adam-europe.eu/prj/8505/prj/NEWSLETTER%201_PREVENTION%20LAB_EN.pdf

Project tool addressed to disseminate the project activities and products.
