Innovative modular training to specialist for renewable energy

Issue No.3
January 2013

About the project

solaris PLUS is an innovation transfer project as part of the EU - Program Leonardo da Vinci. It concerns themselves prevalently with the transfer to Germany of established contents of basic education and further education in the field of renewable energies, that will be implemented also in the educational institutions in Bulgaria, Hungary, Romania and Slovakia.

The project aims

Solaris PLUS main aim is the introduction of 9 training modules in the field of renewable energies. These modules will be implemented both in the initial education and in the qualification and retraining programs. They are based on ECVET criteria and on the national needs of the partner countries. The modules are tested in these countries and accredited for education and further education. The national chambers involved in the projekt are responsible for the accreditation.

Projekt activities: September - December 2012

After the kick-off meeting in Chemnitz, the meeting in Pleven (Bulgaria) and Kunfehértó (Hungary), the third partner meeting took place in Timisoara, Romania. In december 2012 trainers and other representatives of the partner organizations have attended a 4-day multipliers training in Chemnitz.

Partners Meeting Timisoara / Romania

The third partner meeting took place from 27th to 30th of November 2012 in Timisoara, Romania. The following activities were included in the agenda:

- Evaluation of the project - interim report
- Introduction of the Commerce and Industry Chamber of Brasov as a new project partner
- Agreeing for the implementation of modules and debate of common auditing standards
- Reception by the Mayor of Timisoara and project introduction to staff of the Municipality
- Visit of the National Research and Development Institute of Electrochemistry and Materials for Capacitors

Multipliers training in Chemnitz

From the 10th to 13th of December 2012, 12 multipliers from the partner countries or partner regions attended the training "Train the trainers" in Chemnitz. The event was organized by the project carrier solaris FZU and is based on similar course of their own professional training courses in renewable energy field organized for students from the energy educational center in Chemnitz.

Course of multipliers training:

- Introduction Theory and Methodology
- Presentation of the 9 basic modules solaris PLUS
- Visual demonstration of corresponding materials
- Explanation of the ECVETcriteria

- practical introduction to the construction of solar collectors
- PC - simulation of photovoltaic plants and solar thermal collector plants

- Excursions to demonstration plants
  - Small hydro power plant
  - Biogas plant
  - Wind park
  - Photovoltaic installation
  - Innovative heating technology
  - Educational energy trail

The excursions should be considered as an example, in order to find in their own region similar objectives which can be visited with students.
