Projektinformation

Titel:	PRIME
Projektnummer:	2011-1-NL1-LEO05-05208
Jahr:	2011
Projekttyp:	Innovationstransfer
Status:	bewilligt
Land:	NL-Niederlande
Marketing Text:	The PRIME-project emphasis the transfer of knowledge and the implementation and dissemination of the results of the former EQUAVET-project (AGREEMENT 2006-4042/001-001 LE2 78CQAF). The instrument for implementation that will be used is the EQUASS certification program. (EQUASS = European Quality in Social Services). The EQUASS approach on quality is used measuring performance for quality assurance for social services and for VET-services in the disability sector. EQUASS is the operationalization of the EQAVET framework for the VET-services, the Common Quality Framework for SSGI and the Voluntary European Quality Framework for SSGI.
Zusammenfassung:	The main aim of the PRIME-project is to improve the quality of the VET-services for persons with a disability, by transfer of expertise on quality assurance from a previous Leonardo project (Eqavet) and according to the European (Eqavet) quality framework. Primarily for the project partners, but eventually for all VET-providers who would like to implement the Eqavet framework in their services. The instrument for implementation that will be used is the EQUASS certification program. (EQUASS = European Quality in Social Services).
Beschreibung:	The aims of the project are: - Partners will improve the quality of their VET services through the implementation of the EQAVET framework. Knowhow and experiences of Expert partner (EPR) and practice experiences (RCN-Pluryn) will be brought in as expertise. This addresses the priority: supporting the implementation of EQAVET. - Partners will increase their capacity and competencies to implement the EQAVET Framework in VET through training in systematic self-assessment and internal auditing on EQAVET framework and indicators. This address the priority: Implementation of further professionalization of professionals in VET by training, by strengthening the links to 5 participating VET providers and increasing their knowledge of and capacity to assure quality in VET services. - Partners will increase their knowledge and experiences through the exchange and sharing experiences in implementing EQUAVET framework via the method of interactive workshops, bench learning and bench marking. This addresses the priority: Innovating continuous education by implementing concrete and innovative ways for training for employees. - Partners will increase their knowledge and expertise on quality assurance in VET through a cross reference study which will result in guidelines for VET-providers in implementing the EQAVET framework. This addresses the priority supporting the implementation of EQAVET. - Partners will exchange knowledge, experiences and examples of good practice through bench learning and benchmarking activities which will deliver concrete examples of implementing the EQAVET framework and the indicators. This will address the priority: supporting the implementation of EQAVET.

* Gesundheits- und Sozialwesen

Produkt Typen: Evaluierungsmethoden
Transparenz und Zertifizierung
Homepage

Produktinformation: The used methodology will lead to the following results (poducts):
- Cross reference study.
A comparison between quality requirements of EQAVET and EQUASS. The study contributes to a deep and clear understanding of the EQAVET framework, core indicators and the EQUASS Assurance certification as instrument for implementation.

- Systematic self-assessment of partners on the EQAVET framework.
The self-assessment is a reflection of the performance of the partners on the quality requirements of the EQAVET framework. The reflection will result in strengths and areas for improvement. It will confirm to the partners that the implementation of EQAVET framework will not start from scratch. The methodology for self-assessment will be part of the capacity building of the partners.

- Implementation of the quality EQAVET requirements.
Based on an implementation plan, derived from the results of the self-assessment, the partners will start the implementation of the EQAVET quality requirements which are not met yet.

- Learning and exchange.
Commonalities in implementation will be shared and coordinated. Project partners will exchange experiences of good practice.

- Peer review and internal auditing.
Partners will built on the knowledge, skills, competence and capacity to assess performance on the EQAVET quality requirements.

- External assessment.
The partners that have successfully implemented the EQAVET quality requirements will have the opportunity to verify their performance with independent external assessment (and certification).

Analysis-Equass-Assurance-self-Evaluation-(format).xls

http://www.adam-europe.eu/prj/8627/prj/Analysis-Equass-Assurance-self-Evaluation-%28format%29.xls

Each of the partners site will carry out a self-evaluation on the requirements of the EQAVET framework. The self-evaluation will be carried out with the EQUASS instrument (= questionnaire) for EQUASS Assurance self-evaluation. The data will be gathered and reviewed by the EPR key expert (sub-contractor). In a meeting, the EPR key expert will provide feedback on current performance against the core criteria of EQUASS Assurance. At this meeting the sites will define consensus in performance on the Key-Performance-Indicators (KPI). The meeting will result in an EQUASS Assurance profile of performance and recommendations for further development / improvement (action plan).

Cross-reference-report-EQAVET-vs-EQUASS.pdf

http://www.adam-europe.eu/prj/8627/prj/Cross-reference-report-EQAVET-vs-EQUASS.pdf

The cross reference study will be a comparative study between the EQUASS Assurance criteria / Key performance indicators and the EQAVET criteria, indicative descriptors and indicators. It is a comparative study in the EQUASS Framework for Quality and the European Quality Assurance Reference Framework for VET. The EQUASS quality approaches for quality assurance applicable for VET for people with disabilities will be compared with the EQAVET framework and performance indicators. This cross-comparative analysis will lead to two main outcomes: the recommendations to reform / adapt the existing EQUASS quality system to the lasted EQAVET demands and the recommendations to the EC for adjusting the EQAVET framework and performance indicators to VET servicers for people with a disability.

EQ-ASS-Example-feedback-test-audit.pdf

http://www.adam-europe.eu/prj/8627/prj/EQ-ASS-Example-feedback-test-audit.pdf

Each of the partners site will carry out a self-evaluation on the requirements of the EQAVET framework. The self-evaluation will be carried out with the EQUASS instrument (= questionnaire) for EQUASS Assurance self-evaluation. The data will be gathered and reviewed by the EPR key expert (sub-contractor). In a meeting, the EPR key expert will provide feedback on current performance against the core criteria of EQUASS Assurance. The meeting will result in an EQUASS Assurance profile of performance and recommendations for further development / improvement (action plan).

Format-experiences-SE-proces.doc

http://www.adam-europe.eu/prj/8627/prj/Format-experiences-SE-proces.doc

Each of the partners site will carry out a self-evaluation on the requirements of the EQAVET framework. The self-evaluation will be carried out with the EQUASS instrument (= questionnaire) for EQUASS Assurance self-evaluation. The data will be gathered and reviewed by the EPR key expert (sub-contractor). In a meeting, the EPR key expert will provide feedback on current performance against the core criteria of EQUASS Assurance. At this meeting the sites will define consensus in performance on the Key-Performance-Indicators (KPI). The meeting will result in an EQUASS Assurance profile of performance and recommendations for further development / improvement (action plan).

Implementation-plan-(format).doc

http://www.adam-europe.eu/prj/8627/prj/Implementation-plan-%28format%29.doc

Based on the feedback report on self-evaluation and the recommendations given, the partners will draft a detailed plan for implementation. The plan will be designed according a standardized format (provided by key expert of EPR). During the implementation process two project meetings will be organized to exchange the challenges and experiences of the partners in the implementation of EQAVET framework. The key expert (EPR) will act as 'help desk' for the partners during the implementation process. Project partners will select common topics for additional development / improvement, clarify the expected outcome and allocate tasks and responsibilities of each partner in this development. The project partners will exchange and review the results of additional development and commit themselves to implementation.

Speech-for-the-5th-EQAVET-Projects-seminar.doc

http://www.adam-europe.eu/prj/8627/prj/Speech-for-the-5th-EQAVET-Projects-seminar.doc

Successful inclusive education practices can be found in all Member States at national, regional or local level. Some of these practices are reflected in transnational projects that the European Commission supports under its Lifelong Learning Programme. The PRIME-project can contribute to successful inclusive education practices. The cross-reference analysis in the PRIME-project formulates recommendations for the quality assurance in vocational education. The recommendations emphasize the criteria that would make mainstream vocational education more successful for students with and without special educational needs.

Veranstaltungen

Final meeting

Datum	24.10.2013
Beschreibung	The International meetings‘ central items: Consensus document (on project content and responsibilities) Information seminar (on quality assurance systems) Cross-reference study EQAVET – EQUASS Consultant training Self-evaluation; Consensus meeting; Implementation plan Audit training Internal audit; Test audit / Peer review; External Audit Benchlearning sessions
Zielgruppe	VET services for people with disabilities
Öffentlich	Öffentliche Veranstaltung
Kontaktinformation	www.prime-leonardo.eu
Zeitpunkt und Ort	Brussels, Belgium

Auditor training

Datum	04.04.2013
Beschreibung	Transfer of information/skills: VET providers have skills in carrying out internal assessment and peer review on requirements for quality assurance in VET.
Zielgruppe	VET provider (project partner)
Öffentlich	Geschlossene Veranstaltung
Kontaktinformation	www.prime-leonardo.eu
Zeitpunkt und Ort	Ravensburg, Germany

Veranstaltungen

Consultancy training

Datum	31.01.2012
Beschreibung	Transfer of information training: VET providers have skills in applying the methodology and use of instrument self-assesment on requirements for quality assurance in VET.
Zielgruppe	VET providers (project partners)
Öffentlich	Geschlossene Veranstaltung
Kontaktinformation	www.prime-leonardo.eu
Zeitpunkt und Ort	Nijmegen, The Netherlands

Information seminar

Datum	21.11.2011
Beschreibung	Transfer of information: informed VET providers about the EQAVET requirements for VET.
Zielgruppe	VET providers (project partners)
Öffentlich	Geschlossene Veranstaltung
