Information sur le projet

Titre:	Edilmap - Valider les expériences d'apprentissage et encourager la reconnaissance des aptitudes et des compétences dans le domaine de la construction
Code Projet:	LLP-LdV-TOI-11-IT-755
Année:	2011
Type de Projet:	Projets de transfert d'innovation
Statut:	Accordé
Pays:	IT-Italie
Accroche marketing:	Méthodologies et techniques pour la validation e certification de l'apprentissage non formel et informel dans le secteur de la construction
Résumé:	EdilMap project proposes an innovative methodology able to map and represent the tacit competencies and skills characterizing the sector and therefore ensures their replicability thanks to a sectorial and institutional certification's path.
Description:	EdilMap project is finalized to assure an effective and tailored transfer of a methodological innovation able to map, describe and certificate tacit knowledge characterizing the constructions' sector, in particular the green jobs, characterized by strong connections with the territory, by tacit and experiential knowledge and by non-formal/informal learning systems.In Italy, as well as in Europe, the constructions' sector is characterized by negative trend, with limited investments, while companies seek to improve their competitiveness, even by means of acknowledgement path of their workers. In this scenario, green economy is one of the key driver for the restart of the constructions' sector, as confirmed by the main institutional and market level stakeholders. Furthermore the project will test personnel certifications' paths in accordance with ISO international standards that the business community appreciates and the VET Regional System will include in its methodology. In this, the project contributes: (i) to the description, the formalization and enhancement of skills, abilities and competencies acquired in non formal and informal learning contexts; (ii) to the identification of at least four new profiles, consistent with the European framework; (iii) to the development of assessed curricula for the new profiles, built by unit of competence and learning aims; (iv) to the construction and testing of a certification's path for competence acquired in non formal or informal learning contexts, consistent with the national and regional guide lines; (v) to the cooperation between VET actors and labour market.
Thèmes:	*** Formation tout au long de la vie *** Validation, transparence, certification *** Formation continue ** Marché du travail ** Enseignement supérieur ** Orientation professionnelle ** Entreprise, TPE, PME ** Formation initiale
Sectors:	*** Construction ** Industrie Manufacturière ** Enseignement
Types de Produit:	Autres Programme/curriculum Transparence et certification Description de nouveaux métiers Site Internet Méthodes de distribution
Information sur le produit:	EdilMap produces a tool set comprising a knowledge base and a thesaurus able to represent the tacit knowledge and competencies as mapped by a huge and wide fieldwork activity involving key persons (sectoral experts). Three regional areas are involved: two in Italy (Lombardia and Marche) and one in Swiss (Ticino). An effective results' exploitation is assured by at least four new profile certified and assessed curricula. A multi-targeted dissemination activity accompanies all project's

Information sur le projet

life cycle with events, publications, web communication and social networks. The mainstreaming strategy produces guidelines for VET policy makers and a further intersectoral and geographical transfer of the innovation. The introduction of international certification schemes helps to enrich the system with new elements of the qualifications framework defined by the Region in a view of system integration. The partnership brings together methodological experts; key-stakeholders, experts in training design, European project management and quality assurance organizations coming from Italy, Swiss and Germany.

Produit 'Website'

Titre:	Website
Type de Produit:	Site Internet
Texte marketing:	Site web du projet, outils de réseautage social, communauté virtuelle
Description:	The project website is already active and being constantly updated, is made up of a home page that presents the main objectives of the project and pages devoted to the description of the activities, results, products, methodology. There are also links to social networks (Facebook and Twitter) and the internal community (affinitiz).
Cible:	Project team, task force, stakeholder (political, institutional, technical, commercial)
Résultat:	WP7 - RESULT N. 26 - PROJECT WEBSITE Project website, social networking tools, internal virtual community
Domaine d'application:	The website facilitates the spread of the objectives and results of the project edilmap. Through social network connected to it (twitter and facebook), website allows to develop a wider range of diffusion activities and facilitates the construction of a virtual network of actors involved in the area of green jobs and the construction industry. The site is also connected to the internal community that allows the exchange of materials, semi-finished products and information within the project team.
