LEONARDO DA VINCI TRANSFERT OF INNOVATION

Cuénoud Thibault – ESCEM

Agreement number: 2010-1-FR1-LEO05-14505

Intermediate report – European commission feedback (ESCEM/MAC Team)

We will give you only main elements about European commission feedback.

WP 1 - Project management & Partnership meetings

ESCEM team moves during the project and we didn't ask at all partners a feedback about this evolution. European Commission **proposes an evaluation with partners** about project management.

The role and activities of each partner are not sufficiently developed in the narrative.

The candidate mentioned **the creation of a steering committee and the development of a Memorandum of Understanding, but the report does not state**.

WP 2 - Transfer and integration of innovative intial training

A summary of good practices must be conducted at the end to help each partner to apply the common module in his country.

A summary document would still have been appreciated.

The National Agency questions the fact that exercise might be before submitting the application.

WP 3 - European ToR in Social Economy

The SE competencies model is very interesting (about methodology and national feedbacks to obtain a generic framework).

But we didn't explain really how we will use the Competences Model for others parts of project…

It will be important **to create a link** between the **Competencies Model and the training module.**

WP - 4 Further development of Training solution in Management of Social Economy

Some confusion comes from reading the interim report on the WP (we aren't really clear for this WP).

It was mentioned in the application fee subcontract for **an external evaluation of the project by an expert.**

European commission asks **to clarify this point.**

WP - 5 Development of the Hungarian module and the corresponding transfer process

It is not stated in the report are the people identified to participate in the test phase.

It will be more **accurate in the final report on selected managers of organizations.**

WP 6 - Pilot seminars: Evaluation and validation of the training modules

A proposed evaluation strategy discussed in September 2011 is available on the Intranet, the training modules in all languages are not yet available online.

The State Agency finds that **the information provided is general for now and details are expected in the final report**.

WP 7 - Promotion, dissemination and Exploitation plan

A comprehensive dissemination plan is not included, nor those of Italian and English partners. The Agency is a lack of information on the actions envisaged by the partners as a whole.

The activities included in the application reported a **joint symposium Ariadne / CIRIEC in autumn 2011, and the production of brochures and posters** about the project.

These activities will be perhaps in the second part of the project, but it would have been appropriate to mention it.

Conclusion :

The second year may be charged with holding seminars tests in each country and the implementation of the training module in Hungary.

Experimentation and transfer are the heart of the project.

The role and work of some partners is not sufficiently developed or clarified (**as partner for the English Open University**).

There is no reference in the interim report certain items advertised in the application (**steering committee, joint conference, brochures, quality approach, etc**..)

The intermediate report suffers from this lack of detail.
