European Manager of Intelligent and Responsable Territories

510283-LLP-1-2010-1-ES-LEONARDO-LMP

http://www.adam-europe.eu/adam/project/view.htm?prj=9211

Project Information

Title: European Manager of Intelligent and Responsable Territories

Project Number: 510283-LLP-1-2010-1-ES-LEONARDO-LMP

Year: 2010

Project Type: Development of Innovation

Status: completed

Country: EU-Centralised Projects

Marketing Text: •Do you think that it is possible to build Intelligent and Responsible Territories?
•Would you be interested to know what the European Manager of Intelligent and Responsible Territories is about and the areas he has to dominate?
•Do you want to know the different strategies to create Intelligent and Responsible Territories?
•Would you like to know how to response the current demand of the labour European market in local development sector?
•Do you want to know what it is being doing in these areas?

THIS IS YOUR PROJECT!

Summary: GETIR is a pilot European project which seeks to create a professional profile of a Intelligent and Responsible Territories Manager and its curriculum based on the TIR model. This project arises from the need to respond to the demands of local development sector in the European job market, which have not been updated during the last years .
In this project DOCUMENTA acts as promoter its partners are Sweden, Bulgaria, Romania and Greece. There are 5 areas or fields that a GETIR manager must master: Corporate Social Responsibility and Knowledge Management in the territory, Social capital in the territory, Sustainable Local development, Good Governance, Social Participation and Empowerment, and New Technologies.

The main aim of this project is to contribute to give an answers to nowadays demands in European labour market, in local development sector where same training and skills have been used for the last 15 years- through the curriculum and professional training definition and testing of a new European profile named European managers of Intelligent and Responsible Territories (GETIRs).
The main beneficiaries of this project are: namely technicians from organizations involved and experts in local development, training centres, political responsible of education training and employment policies, at European Union level.
Main tangible products:
The Key products are: creation of professional profile of GETIR, definition of training curriculum and development of professional competences. Parallel to the definition of the profile, the project will create an online tool for the European training of these Managers as well as a social community, online campus in order to contacting and dissemination the definition, implementation and continuous evaluation of this process.

Description: ORIGIN
GETIR project story started at the beginning of the 2000´s, due to the extensive experience of the project coordinator (Documenta9 in the fields of research and innovation and the implantation of the local development model based on the definition of Intelligent and Responsible Territories. The first time when that concept was presented was in Rodhos, 2003 under the Greek EU presidence, during the European Forum on Local Development and Employment, and it was highlighted by Mrs. Diamantopoulo in her conclusions.
In that forum, Javier Farto, president of Documenta, explained that the concept of IRTs comes up from the idea of local environment: a network of local actors and the relations that form the productive system in which economic, social, political and institutional agents have specific ways of organization and regulation, their own culture, and they generate a dynamic of collective knowledge.
Since that, after several contacts asking for his presentation and new concept, he decided to write a book that was published in Spanish in 2005.

Project Information

All partners involved shares the obsolence of present LDAs´ profile which contents nave not been changed in the last 15 years.

PROFILE

GETIR consists of creating a professional profile for the European Manager of Intelligent and Responsible Territories. The profile includes new territorial management skills in local / regional area, following the Intelligent and Responsible Territories model (IRT) developed by DOCUMENTA.
Parallel to the definition of the profile, the project will create an online tool for the EU training of GETIRs, as well as a social community with and online campus in order to exchange experiences and contents and to disseminate the definition, implementation and continuous evaluation of this process.

The GETIR profile has an emphasis on 5 main areas that the agent must master:
1.Corporate Social Responsibility and Knowledge Management in the Territory
2.Social Capital
3.Local Sustainable Development
4.Good Governance, Social Participation and Empowerment
5.New Technologies.

An important part of the project is the testing of the content of training by experts in local development in order to validate all the process.

AIMS
General Aim
To contribute to give an answers to nowadays demand in European labour market, in local development sector where same training and skills have been used for the last 15 years- through the curriculum and professional training definition and testing of a new European profile named European managers of Intelligent and Responsible Territories (GETIRs)

Specific Aims:
•Define, test and validate at EU level, both the professional profile and competences of GETIR, including contents of its training curriculum.
•Design, test, validate and translate a blended learning pedagogical tool, thought from a perspective of an EU sustainable local development model which must be flexible and adaptable to the reality of each country.
•Create a virtual community 2.0 of GETIRs to be used both as support of the training tool and the networking, dialogue and Exchange among professionals and territories.
•Develop an innovative pedagogical process with previous tools and with a focused on cooperative learning, social/organizational learning, learning territories and knowledge regions.
•Make an effort translating main documents and tools to English, and profile and its tools to all partners' languages to guarantee dissemination, transference and a strong multiplier effect.
•Implement a continuous evaluation process thought –not as a negative thing- but as permanent learning and active dialogue process among the partners during the implementation of the Project.

Themes:
*** Labor market
*** Quality
*** Sustainability
*** Others
*** Lifelong learning
*** Higher education
*** Vocational guidance
*** Equal opportunities

Project Information

** ICT
** Social dialog
** Recognition, transparency, certification
** Continuous training
* Utilization and distribution of results
* Language training

Sectors: *** Professional, Scientific and Technical Activities
** Education
* Administrative and Support Service Activities

Product 'WP7. Evaluation and quality plan'

Title: WP7. Evaluation and quality plan

Product Type: others

Marketing Text:

Description: The implementation of the Evaluation and Quality plan of the project is based on the two separate (but complementary) approaches, following a bottom-up strategy which is combined with a top-bottom process.

The following reports have been processed along the project duration for the benefit of the overall activities, work efficciency and the quality assurance of the project products. All the reports were shared with the partnership

PRODUCTS OF THE INTERNAL EVALUATION:
Ex-ante Evaluation Report

The Ex ante evaluation report was elaborated at the beginning of the project. The main goal of this report was to present an initial analysis of the interests, feelings, fears and expectations of project partners about the teamwork, the definition of project activities and the foreseen implementation and realization of activities according to the scheduled timesheet.

Evaluation Guide
This methodological internal evaluation guide of the project was designed with the aim of, not just to have a closed tool to measure feeling and fulfillment of the partners, but also to open a debate and collect feedback from all partners involved which allows to enrich the project itself, its processes and final products / results. This guide and its questionnaires are defined as a participatory tool for all partners and final target of the project to contribute to improve project's development, while it also serves to detect the deviations taking place in the workprogramme and to essay tools to correct them.

Intermediary Internal Evaluation Report
This report reflects the development of activities approved and implemented during the first year of the project and the relationship and level of satisfaction between the partners involved.

Final evaluation report

This report reflects the development of activities approved and implemented during the second period of the project, involvement and level of satisfaction between the partners as well as an overall evaluation of the results and undertaken activities. analyze the progress of the work undertaken by the partners and the level of satisfaction with the project major achievements at the end of the project.

Evaluation reports of the four Transnational meetings: they collect feedback from the partnership and the level of satisfaction with regards to the issues of the meetings and the developed activities so far in each meeting. An assesment on the Final dissemination event was also carried out.

EXTERNAL EVALUATION

External Evaluation Guide

The external evaluation process tries to compare the results given by internal evaluation in order to check that those data are consistent, while it assesses the quality of main outcomes of GETIR project, and finally, it provides a future perspective by measuring partners' expectations, the future exploitation of the

Product 'WP.3. Testing the beta training tool for its final validation'

Title:	WP.3. Testing the beta training tool for its final validation
Product Type:	others
Marketing Text:	
Description:	Each partner contacted a number of experts in their countries to evaluate/test the Profile, training curriculum and professional training contents, as well as the beta version of the Training Tool and the GETIR Social Community 2.0 regarding the accuracy, applicabiliy and future expectations of all these products in their territories. Partner elaborated their own evaluation report with the results of test in their countries. The coordinator elaborated a report with all the recommendations so that every partner would be able to improve their modules and DIMITRA could adjust the Training Tool to these recommendations. A set of common guidelines was stablished by the project coordinator to develop testing activities by the partnership.
Target group:	
Result:	Recommendation report with the feedback of experts in each participating country
Area of application:	Partnership countries
