Project Information

Title: Adapting Learning Programme for Energies of Renewable

Project Number: 2011-1-TR1-LEO05-27988

Year: 2011

Project Type: Transfer of Innovation

Status: running

Country: TR-Turkey

Marketing Text: Overproduction and overconsumption of energy are among the biggest problems confronting our world. Renewables and efficiency sector energy consumption emerges as having a great environment (clean energy, improving the quality of life) and economic (job creation, reducing dependence on third countries, development, tourism compatible). ALPER aims to transfer the results of previous Leonardo project EARTHCARE "and adapting them for vocational high schools. These results include the employment patterns of new RES-related occupations, training programs and materials to support training.

Summary: Over-production and over-consumption of energy are among the biggest actual problems in our globe. The Renewable Energies and efficient energy consumption Sector emerges as having great environmental (clean energy, improvement of the quality of life) and economic (job creation, decrease of dependency on third countries, development, tourism compatible). ALPER aims at transferring the results of the previous Leonardo project 'EARTHCARE' and adapting them for vocational high schools. These results include job profiles of new RES-related occupations, training curricula and training support material.

Aims of the project are:
To improve European dimension of the guidance in the specific field of emerging renewable energies related
occupations·
To improve careers information on these occupations·
To boost employment in the sector·
To contribute to the development of the renewable energy sector

ALPER envisages to the above aims through quality assurance processes and achieving the following results:
Developing curriculum on RES and energy efficiency as well as training modules, based on the EARTHCARE ones. Developing laboratory specifications
Organising two training of trainers in Turkey and one in Greece.
Implementing a set of dissemination and exploitation activities aiming at promoting the project results.

The partnership involves 9 partner organisations from 4 countries, namely Turkey, Greece, Spain, Lithuania. Partners
are vocational high schools, a University, a RES expert company, a consultancy company, a VET provider on RES, Kocaeli Provincial Directorate of National Education and Kocaeli Metrololitan Municipality.
Products will be available in TR, EN, GR, ES, LT.

Description:

Themes:
*** Labor market
*** Sustainability
*** Lifelong learning
*** Vocational guidance
*** Ecology
*** Continuous training
*** Initial training

Sectors:
*** Education
** Electricity, Gas, Steam and Air Conditioning Supply
** Professional, Scientific and Technical Activities

Project Information

** Information and Communication
* Water Supply; Sewerage, Waste Management and Remediation Activities
* Human Health and Social Work Activities

Product Types: description of new occupation profiles
modules
procedure for the analysis and prognosis of the vocational training requirement
program or curricula
website
