We can see here the evidence of the Testing Action organized by Espazo in its action area (Nigrán, Dunar system and A Foz Estuary – Miñor River – SPA Natura 2000 Net). After the Pilot Course, an evaluation of the results was carried out to test the products transferred, once they had been being adapted to our country, area realities, needs and context.

A total number of 27 people from the foreseen target groups took part on this course which left a very good impression and evaluation result from all the members who participated. We can see these results in the final evaluation document of the course.
