SKILLS-UP: Verbesserung der Lehrer und Ausbilder in der Entwicklung, verbessern und Bewertung der Schlüsselkompetenzen und Soft Skills für Studenten und Ausbildern Erfolg und Mobilität auf dem Arbeitsmarkt

2012-1-IT1-LEO05-02796

http://www.adam-europe.eu/adam/project/view.htm?prj=9846

Projektinformation

Titel:	SKILLS-UP: Verbesserung der Lehrer und Ausbilder in der Entwicklung, verbessern und Bewertung der Schlüsselkompetenzen und Soft Skills für Studenten und Ausbildern Erfolg und Mobilität auf dem Arbeitsmarkt
Projektnummer:	2012-1-IT1-LEO05-02796
Jahr:	2012
Projekttyp:	Innovationstransfer
Status:	laufend
Land:	IT-Italien
Marketing Text:	Die SKILLS-UP-Projekt basiert auf den Ergebnissen der Projekt "Kompetenzen für den Arbeitsmarkt", bestehend aus einer Reihe von Ausbildungsinstrumente und Methoden für Trainerinnen/Lehrer basiert über 14 Soft-Skills/Schlüsselkompetenzen. Vor der Entwicklung der 14-Training-Tool-Kits, wurden umfangreiche Forschung getan Vermessung Tausende von KMU, Arbeitgeber und Schlüssel-Akteure in den Arbeitsmarkt. Die Training-Tool-Kits enthalten Material von methodischen Aspekte der Ausbildung und Lehre, Arbeitsbuch/Bewertungswerkzeuge. Jeder Lehrer/Trainer unterziehen diese Ausbildung kann somit zertifiziert werden, zur Schaffung und Gewährleistung der Qualität in der Zustellung. Die SKILLS-UP-Projekt fördert, zu Ausbildern in den Partnerländern, eine Auswahl von 2 der 14 Kompetenzen. Dies wird ihre Anstrengungen zur Verbesserung/Unterstützung der systemischen Veränderungen hin zu Kompetenz-basierte Systeme und damit zu entwerfen/liefern Ausbildung geeignet, gegründet Lernergebnisse zu stärken
Zusammenfassung:	This proposal is based on the result of a valid and acknowledged best practice “Competencies for the Labour Market” consisting in a bulk of training tools and devices which have succeeded in many different countries in teaching, developing, improving and evaluating a set of 14 basic soft skills & key competences. Moreover the number & typologies of the soft skills developed are the results of a concrete large scale survey carried on directly on thousands of SMEs employers, the key-actors of the labour market. The core of the best practice stands on the concept that SOFT SKILLS and KEY COMPETENCES are “difficult to measure & difficult to develop”. In order to cope with this, the BP developed complete training programmes for teachers/trainers for 14 soft skills & key competences identified, starting from the methodological aspects up to teaching/training techniques, devices & evaluation tools. The entire training of trainers has been then finalized to a certification and registration of certified trainers in a qualitatively guaranteed register. Therefore, under the selected priority, the proposal has been conceived in order to promote the geographical adaptation/transfer of the best practice, in order to: - promote the acquisition of competences enabling VET professionals to teach soft skills & key competences (2006 EU Recommendation on K-competences for Lifelong learning); - strengthen the response of VET professionals to systemic changes such as the shift to competence-based systems and consequently to learning outcomes. This project reflects important effects either on direct beneficiaries, i.e. teachers/trainers & VET Professionals in general, either on indirect/final target groups: VET students & adult trainees or adults/unemployed in the labour market. The impact envisaged for the VET Systems of the 5 countries involved is concerned with the insertion of the best practice in the institutional activities of the VET structures involved in the project, and, with a multiplier effect, the further extension of the best practice at National level through certified trainers, as a medium-long term impact effect. The partnership (IT;CZ;BE;PT;EL), having consolidated mutual cooperation experiences in transnational projects, included the owner of the best practice, and all partners are directly involved in the VET systems development and in direct contact with the project target groups. The foreseen outcomes has been the production - for at least 2 competencies per country - of translated/adapted complete training toolkits including: training manuals, interactive DVD-video (for trainers and trainees); training and certification tools for competencies (for trainers); competencies level testing tools (for trainees); certified trainers. Attention has been

Projektinformation

paid on the analysis of evaluation tools and their possible use within the ECVET System, in order to produce criteria of commonly shared assignment of credit points in function of learning outcomes.

Beschreibung: The SKILLS-UP project is based on the results of the project “Competencies for the Labour Market”, which consist of a set of training tools and methodologies concerning 14 basic soft skills and competences for trainers and teachers. Prior to developing the 14 training tool-kits, extensive research was done surveying thousands of SMEs, employers and key-actors in the labour market. The training tool-kits include material ranging from methodological aspects to training and teaching, to use of tools and assessment. Any teacher or trainer undergoing this training has been certified to use the training kits hence, establishing and guaranteeing quality in delivery. The SKILLS-UP project promoted, to VET trainers in the partner countries, a selection of 2 out of the 14 competences (as 2006 EU Recommendation on Key competences for Lifelong learning). Their training has strengthen their effort to enhance/support the systemic changes towards competence-based systems and consequently to design and deliver training suitable to established learning outcomes.

During the project’s duration, the 5 partner countries involved will test the training kits with their trainers and trainees and integrate them within their existing practices. The newly trained and certified trainers (will serve as multipliers) will train national trainers to deliver the selected soft skills training kits.In parallel the SKILLS-UP project will market and raise awareness of its activities through a dissemination campaign.

Themen:

Produktinformation: The Skills Up project proposal is based on the result of a valid and acknowledged best practice “Competencies for the Labour Market” promoted by the project partner RPIC-ViP of Ostrava (Czech Republic), consisting in a bulk of training tools and devices which have succeeded in many different countries in teaching, developing, improving & evaluating a set of 14 basic soft The number & typologies of the soft skills developed are the results of a concrete large scale survey carried on directly on thousands of SMEs employers.
The core of the best practice stands on the concept that SOFT SKILLS and KEY COMPETENCES are “difficult to measure & difficult to develop”.
In order to cope with this, the best practice has developed complete training programs for teachers/trainers for the 14 soft skills & key competences identified, starting from the methodological aspects up to teaching/training techniques, devices & evaluation tools.
The entire training of trainers is then finalized to a certification and registration of certified trainers in a qualitatively guaranteed register.skills & key competences.

Therefore, the expected products and results was:

Projektinformation

- Report of contexts and needs analysis in the partners countries, in order to derive the framework of application of education and trining in key-competences and soft skills in the partners countries and to match them with the requirements of entrepreneurial/productive/Labour Market systems
- Translated and adapted competences (At least 2 competences for each partner country, such as: Effective Communication; Entrepreneurship;
Problem-solving; Lifelong Learning; Pro-active approach; Stress Resilience; Flexibility; Customer Orientation;

- Create a first team of certified trainers in each partner country;

Produkt 'CONTEXTS AND NEEDS ANALYSIS REPORT'

Titel: CONTEXTS AND NEEDS ANALYSIS REPORT

Produkttyp: andere

Marketing Text: Report of Analysis:
Contexts and needs of the project target of beneficiaries in relation to teaching and training in key competences and soft skills: collection of national results and final comparative analysis
Output of the WP3

Beschreibung: The main scopes of this Report can be defined as the following:

- Derive a framework from each partner country of the context, pedagogical and didactical approaches with regard to teaching and training in key competences and soft skills within the Vocational and Educational Training (VET) Systems
- Derive a framework of the needs/requirements for key competences and soft skills of the labour market in the partners countries;
- Identify the elements of sustainability of the methodology and tools to be used in VET systems according to the description offered by each partner country.

In this product are, therefore, collected the information and reflections that link the results collected during the first working steps of the project with the following work packages of the project, i.e. the activities of adaptation, implementation and transfer of the selected Best Practice.
It is clear, therefore, that this report has been prepared by making use of the qualitative and quantitative information and reflections collected during the first transnational meeting, and the results of the research and survey phase carried out with VET providers and Enterprises in each partner country.

As a result of the activities provided by the WP3, this Report is structured in these parts:

- results of the desk research carried out by the partnership through the preliminary working paper, reported here for each partner countries
- Description of the didactical and methodological approaches used for training in soft skills in the partner countries, in order to derive the overall state of the art of the specific training area
- Description and analysis of the needs expressed by direct and indirect beneficiaries in terms of preparation and training in key competences and soft skills in formal (and informal) training pathways existing in the partners countries
- Results of the questionnaires administered.

The report, as required by the project, have been made available to project partners and, at a later stage, to project beneficiaries also for a better understanding of the referring situation and to draw attention to any other element that characterizes and represents a product that can be "serving" in the future other actions of transfer.

Zielgruppe: Project partners
Schools and VET Providers
VET stakeholders
Stakeholders of the entrepreneurial/productive/labour market systems

Resultat: Either from the preliminary contexts analysis, as well as through the contacts with the target necessary for the realization of the on line survey with Enterprises and VET Providers, it has been possible to derive important elements and suggestions for the next project phases

Produkt 'Comparative Matrix for the selection of competences and adaptation strategies Output of the WP 4'

Titel: Comparative Matrix for the selection of competences and adaptation strategies Output of the WP 4

Produkttyp: andere

Marketing Text: Comparative Matrix for the selection of competences and adaptation strategies Output of the WP 4

Beschreibung: 1. Comparison of qualitative and quantitative information contained in the national reports produced by each partner
2. Development and implementation of a comparative matrix of needs;
3. SWOT analysis of the best practice in the light of the information contained in the matrix;
4. Choice of the tools and competences of the Best Practice to be transferred in the contexts of the different partner countries;
5. Identification, in each partner country, of the type of organizations / institutions / systems to be involved during the transfer of innovation phase;
6. Production of guidelines for the process of adaptation of the Best Practice to ensure its sustainability and transferability to other geographic contexts / targets;

The activities related to the development of this product are the first five activities, and the sources of this documents are all the research documents produced by project partners in the previous WPs, and shared and validated during the 1st and the 2nd transnational workshop among all partners in Naples – Italy- and Athens - Greece.

In this product are, therefore, collected the information and reflections that link the results collected during the early working stages of the project with the following work packages of the project, i.e. the activities of adaptation, implementation and transfer of the selected Best Practice.

Zielgruppe: Project partners
Schools and VET Providers
VET stakeholders
Stakeholders of the entrepreneurial/productive/labour market systems

Resultat: Guidelines for the process of adaptation of the Best Practice to ensure its sustainability and transferability to other geographic contexts / targets;

Comparative analysis matrix for adaptation strategies

Produkt 'Guidelines for the adaptation process of the Best Practice Output of the WP 4'

Titel: Guidelines for the adaptation process of the Best Practice Output of the WP 4

Produkttyp: Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes

Marketing Text: The sources of this documents are all the research documents produced by project partners in the previous WPs, and shared and validated during the 1st and the 2nd transnational workshop among all partners in Naples – Italy- and Athens – Greece, and, specifically, the results of partners confrontation during the 2nd transnational workshop and dissemination seminar in Athens – Greece.

In this product are, therefore, collected the information and reflections that link the results collected during the early working stages of the project with the following work packages of the project, i.e. the activities of adaptation, implementation and transfer of the selected Best Practice.

Beschreibung: The main scopes of these “Guidelines for the adaptation process of the Best Practice” can be defined as the following:

- Identify the strengths of the selected Best Practice that can respond to the contexts and system conditions and to the needs emerged in the research phases of WP2 and WP3;
- Identify the elements of the selected Best Practice which require adaptation in order to match the needs identified and the contexts and system conditions identified in the partners countries;
- Identify the elements of sustainability of the methodology and tools to be used in VET systems according to the description offered by each partner country.

In this product are, therefore, collected the information and reflections that link the results collected during the early working stages of the project with the following work packages of the project, i.e. the activities of adaptation, implementation and transfer of the selected Best Practice.
It is clear, therefore, that these guidelines have been prepared by making use of the qualitative and quantitative information and reflections contained in the products 6 and 7 and, of course, validate by partners during the project meetings, ensuring the active involvement of all members of the partnership.

These guidelines are structured in three parts as a result of the activities provided by the WP4:

- results of the GRIDS AND REPORT of analysis of the Best Practice (Strengths of the BP capable to respond to the needs identified in the comparative matrix, elements of the BP which require adaptation to respond to the identified needs)
- detailed description of the elements of sustainability of the methodology and tools of the BP that can be transferred into systems in relation to other geographic contexts
- description of the typologies of the required adaptations (in response to what has been shown in the preceding points) and the modalities to carry out the transfer.

The guidelines , as required by the project have been made available to project partners and, at a later stage, to project beneficiaries also to draw inspiration for the adaptation of any other elements that characterize and represent a product that can be "serving" in the future other actions of transfer , so this document is characterized by conciseness (also guaranteed by the use of grids and matrices) and "simplicity" in order to make it usable also by "non-experts" subjects reached by the project activities.

DAY 3 - Second Training of Trainers Session in Bruxelles (BE): "TEACHING AND TRAINING IN KEY COMPETENCES AND SOFT SKILLS"

Datum 22.05.2014

Beschreibung The third day of the 2ND Training of Trainers Session in Bruxelles (BE): "TEACHING AND TRAINING IN KEY COMPETENCES AND SOFT SKILLS"
17 teachers/trainers of the partners networks joined the training of trainers session, in which the 2 experts of RPiC-ViP czech partner has participated as trainers.

The training session has been developed according to this schedule:

DAY 1
20/05/2014
Part 1: Introduction

Part 2: Icebreaking and energizing tips

Part 3: Market of competencies - competencies exercises chosen by participants (to be continued: Competencies: EffeCtive Communication, Entrepeneurship, Problem solving)

Part 4: Video example

Part 5: Q & A, discussion

Round table and Conclusion

DAY 2
21/05/2014

Part 1: Icebreaking and energizing tips

Part 2: Market of competencies - competencies exercises chosen by participants: Lifelong Learning, stress resilience, proactive approach

Part 3: Q & A, discussion
Part 4: Video example
Part 5: Dividing tasks for certification
Part 6: Time for preparation for the next day
Part 9: Icebreaking

DAY 3
22/05/2014

Part 1: Certification process – each participating trainee will deliver his/her part of training and will receive feedback from Czech trainers as well as from participating group
Part 2: Evaluation, Q & A, discussion
