Information sur le projet

Titre:	PIRI REIS: Le réseau, la collaboration et le développement pour géographes
Code Projet:	2011-1-TR1-LEO05-28023
Année:	2011
Type de Projet:	Projets de transfert d'innovation
Statut:	Accordé
Pays:	TR-Turquie
Accroche marketing:	Nous croyons que les formations pour les diplômés en géographie n'ont pas la qualité désirée, le réseau parmi les géographes n'a pas un niveau suffisant et les possibilités de collaboration pour les géographes professionnels sont limitées. Donc, en Piri Reis projet, nous voulons améliorer les possibilités de réseau entre les géographes, développer une culture universitaire et la plate-forme de collaboration et développer les compétences académiques et les compétences des géographes professionnels en organisant des ateliers, des conférences, des rencontres académiques, le lancement de journaux en ligne, la fondation d'une nouvelle association géographie et publier des livres dans le domaine de la recherche et de la formation en géographie.
Résumé:	VET system for the education and training of geography academics lacks of basic competencies. This is reflected in the number of the quality of the work produced and citation rates in international indexes such as SSCI. One of the main reasons for this is the problem in the vocational educational training (VET) system in geography programs. Geographers trained without sufficient VET skills such as basic research method courses have difficulties in training their fellow students, producing quality publications and involving international collaboration. Also, professional geographers in their vocational educational training in the course of their career lack network opportunities and platforms. There is no institution to provide services organizing regular conferences, meetings and publishing academic journals. The Project, PIRI REIS, aims to 1) provide training for geography academics in the areas where they lack skills and knowledge. PIRI REIS will also organize workshops for developing a basic competencies for professional geographers. 2) It will establish a geographical association for networking among geographers. A journal will be formed to create a platform for the presentation of research and collaboration. It will be the first online geographical journal with free access of all parties interested.
Description:	PIRI REIS is expected to have impact the nature of VET for geography academics in terms of research skills and competencies. The project will have an impact the in reformation of graduate programs under dramatic changes with Bologna Process. Finally, we envisage that after the completion of PIRI REIS, there will be more network, collaboration and internationalization among geography academics.
