

## HIPE 4 ASD - Help for Instant Professional Efficiency for ASD

2012-1-FR1-LEO05-34952

<http://www.adam-europe.eu/adam/project/view.htm?prj=10859>

## Project Information

Title: HIPE 4 ASD - Help for Instant Professional Efficiency for ASD

Project Number: 2012-1-FR1-LEO05-34952

Year: 2012

Project Type: Transfer of Innovation

Status: granted

Country: FR-France

Marketing Text: The autism is a neurological disorder concerning the socialization and communication functions. Nearly 5 million people would be concerned in the EU  
We note that classical vocational trainings (medical, educational, social, school) do not give any element of comprehension of the autistic disorders nor of the professional good practices. We propose a module court of "knowledge of bases on the autism" which will allow an immediate professional efficiency for any person brought to work near people with autism.

Summary: Autism issues start to be apprehended by the various governments as really requiring answers (and thus competences) specific.  
There are violent quarrels between various currents of thoughts: psychoanalytical and behaviorist in particular.  
Goals HIPE4ASD- To answer, following the example of the European recommendations, with the need for follow-up personalized and individualized people with ASD and for training of the professionals of ground on specificities for necessary pathology and them in terms of knowledge-being and know-how  
To qualify the professionals of the social accompaniment, educational, medical and of the companies employing of the people with ASD on knowledge and practices allowing an immediate occupational efficiency  
To mitigate the deficiencies of the trainings (social, educational, medical, services) in practical terms of knowledge on the ASD.  
To create a common culture of the professionals of the same territory (social, educational, medical world and companies) for a better inclusion and a better quality of service  
To contribute to the improvement of the accompaniment of the people with ASD and their entourage, combining educational, teaching and therapeutic interventions, for a better social participation and of a wellness increased.  
To define the criteria making it possible to identify the risks of dangerous drifts and contributes directly to the recommendations of Well-Treatment intended to prevent any form of ill-treatment.

Description: The autism became a real issue of company. One speaks today about "disorders of the autistic spectrum" so much the situations and the demonstrations of this disease are varied and often diverting At the level of the EU, it are nearly 4.5 million people who are concerned directly. All these people have the same needs as any citizen (care, education, schooling, professional insertion, services) but the specific needs of these people require an accompaniment, a pedagogy, a very specialized coaching. We make the report, at the level of the EU, that no initial vocational training prepares and does not give keys to understand and know quickly how to accompany the people with TED well. The professionals of the social and health sectors, specialized or non specialized education, companies or services are not prepared to the contact with ASD persons and to the adaptation of their knowledge/know-how to these persons. HIPE4ASD aims to transfer a short course (4 days) created in France on the basis of the Basic Knowledge and Practices which is now recognized in Europe and has been used successfully for 5 years. This course brings fundamental knowledge and competences to integrate the main features of the people with ASD in the daily professional practices. Partners of training sector (Spain), education (Greece), social services (Italy) and job-coaching for autistic persons (Denmark) stick to validate a set of transverse knowledge and competences for any professional who are daily in touch with autistic persons. The on-going activities of the project has been :  
- to put in coherence the French model with the various reference frames of competences of the categories of professionals targeted

## Project Information

- to define convergent expected competencies of targeted professionals (social sector, education, general services, enterprises) and to thus finalize a course "of immediate occupational efficiency" which can be thus transferred to any professional in link with people with ASD (already employed, improving qualification, recently engaged or applying for a new job). This course is an answer to the lacks of initial trainings (often poor on this field in particular in terms of practices) and meets the "immediate" requirements in terms for knowledge-being and know-how, which the offer in training does not propose.
  - to assess the pedagogical kit and prepare the last phase of the project : to finalize the course and evaluation tools after the testing phase
- HIPE4ASD will make it possible to create a common professional culture thus improving comfort of life but also the social and professional inclusion of the people with ASD.

- Themes: \*\*\* Lifelong learning  
\*\*\* Continuous training  
\*\*\* Initial training  
\*\* Utilization and distribution of results  
\*\* Social dialog  
\*\* Equal opportunities
- Sectors: \*\*\* Human Health and Social Work Activities  
\*\* Education

- Product Types: modules  
material for open learning  
teaching material  
evaluation methods

- Product information: The achieved 4-days course is modular, adaptive and transverse to all the professional targeted categories, including low level qualification profiles.

### Achieved results :

- Finalization of convergent work - European National Frames
- Professional involved in the training (target groups)
- Consensus on the needs of a person with ASD
- Expected competencies of targeted professionals
- Training index consensus
- Training program planning

## Project Files

### HIPE4ASD - Consolidated qualitative analysis of the testing phase - V8 - EN.pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE4ASD%20-%20Consolidated%20qualitative%20analysis%20of%20the%20testing%20phase%20-%20V8%20-%20EN.pdf>

This report is the final result of the testing phase. It will be enriched with the quantitative analysis and also with the results of local implementations. Then a final version will include the post-tests results (interviews and questionnaires done among the trainees 3 months after the training sessions).

### HIPE4ASD - Final evaluations of Steering committees - Italy.pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE4ASD%20-%20Final%20evaluations%20of%20Steering%20committees%20-%20Italy.pdf>

Each national expert steering committee has been involved in the project life and in the different steps of evaluation (finalization of the course and evaluation tools before testing and results of the tests). The course provided during the tests has been assessed by them.

### HIPE4ASD - leaflet 2 - After tests - EL.pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE4ASD%20-%20leaflet%20%20-%20After%20tests%20-%20EL.pdf>

### HIPE4ASD - leaflet 2 - After tests - EN.pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE4ASD%20-%20leaflet%20%20-%20After%20tests%20-%20EN.pdf>

This second leaflet has been done by done by the partners after the testing phase. It includes the achievements of the HIPE project. There will be a third final leaflet including major results of valorization after post-tests.

### HIPE4ASD - leaflet 2 - After tests - IT.pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE4ASD%20-%20leaflet%20%20-%20After%20tests%20-%20IT.pdf>

Italian version of the leaflet 2.

### HIPE - Consensus on the needs of a person with ASD (TM2).pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE%20-%20Consensus%20on%20the%20needs%20of%20a%20person%20with%20ASD%20%28TM2%29.pdf>

### HIPE - Expected competencies.pdf

<http://www.adam-europe.eu/prj/10859/prj/HIPE%20-%20Expected%20competencies.pdf>

After states of the art in partners countries and work between experts (autism and training field), an agreement has been done about the expected competencies from field professionals in daily relation with ASD persons.

## Products

- 1 HIPE testing phase - report

## Product 'HIPE testing phase - report'

Title: HIPE testing phase - report

Product Type: others

Marketing Text: In this section you will find the first documents about the testing phase. It has been successfully assessed by trainees, trainers and also by the steering committees members (all experts in autism or in the training field).

Description: The consortium has delivered the expected short course and related evaluation tools and procedures bringing to any targeted professional the requested competencies, in accordance with the validated European Framework of references.

Target group: 126 professionals from the 5 partners' countries have been trained and evaluated in the testing phase in the following categories :

- Education Staff (teachers)
- Social workers, Educators
- Health Staff
- General Services (cooking, security, maintenance, transportation...)
- Enterprises (job placement, professional coaching, direct management)

Result: Trainees from the tests confirm the adequacy of the course to their daily needs with a majority highlighting concreteness as a key feature of the course. They are satisfied in terms of acquired competencies.

Area of application: HIPE4ASD course (4 days maximum) provides basic competencies and skills to any professional, directly in touch with people with Autistic Spectrum Disorder (ASD) or requiring quickly basic knowledge and know-how :

- Education
- Social work
- Medical sector
- Enterprises
- but also general services to guaranty a shared approach inside each organization.
