

JUBILEE

Job Building Energy Efficiency

NEWSLETTER 3: COPENHAGEN // 11-13 May 2015

European Program	Life Learning Program Leonardo Da Vinci Multilateral Projects for development and innovation
Project number	2013-1-FR1-LEO05-49037
Duration	01 October 2013 – 30 September 2015

INTRODUCTION TO THE MEETING AND QUALITY MANAGEMENT

After a warm welcome given by Ms. Vibeke Holtum (head of the International office in TEC) together with Bjarne and Bent (our colleagues of TEC), Professor Marvillet made an introduction about the state of the art of the Jubilee project. He made a revision of the minutes of the last meeting in Paris and informed us about the meeting with the French National Agency concerning the Intermediate Report. He proposed an extension of the project of three months, and the partners agreed. Finally he introduced Mr. Antonio Mir who led the workshop on quality management.

Antonio made a detailed overview of the action points of each work package and the partners spoke about the progress of the project. Everybody agreed that we are moving in the right direction with the Jubilee project: we are focused on the future and we have improved working as a team.

TECHNICAL COMMITTEE AND STEERING COMMITTEE

The attendants split in two groups:

- **TECHNICAL COMMITTEE.** This group was led by CFI. They made a revision of all the training materials; it raised the question about giving unity to all the materials and the products. The second day this committee finally agreed on the number of training modules and their proper names. Anita's help with writing down action points and deadlines was very much appreciated☺.
- **STEERING COMMITTEE.** This group was led by CNAM.

JUBILEE - 2013-1-FR1-LEO05-49037

Representatives of each institution (except Radius College) revised the to do's and worked out an action plan. They tackled the issue of the leaving of FLS, and agreed with the proposal of the distribution of the budget. They also confirmed the role of XABEC as responsible of the WP of dissemination and sustainability.

PILOT TEST, DISSEMINATION AND SUSTAINABILITY

Guillermo Ferrando made a revision of the activities of Pilot Test done up until now, and partners shared their experiences. Syntra West and TEC explained their approach: they created online surveys to gather the necessary information from the testing companies.

Antonio Mir conducted the workshop about dissemination and presented the new “sustainability plan”.

DISSEMINATION EVENT: PANEL OF EXPERTS IN DOME OF VISION

In the evening of the first day TEC organized a special event, regarding different perspectives on energy efficiency in buildings, in a synergy with European VET schools. The speakers were the following:

- **Mette Quist**, director Green Building Council Denmark: “Sustainable buildings and city districts in Denmark - Experiences and future perspectives”.
- **VagnHolk Lauridsen**, manager of Center of Excellence energy saving, Danish Technological Institute: “Energy saving in buildings”.
- **Christian Garnæs**, Head of Partnership Management, DONG Energy: “Energy Management – unleash the full potential of your energy usage”

The round table was conducted by **Morten Emborg**, the Vice-President at Technical Education Copenhagen. Professor Marvillet was also in the group of experts. It was a very interesting activity, very valuable for the Jubilee partners: the participants could ask questions and gave their opinion about the matter.
