

AGROSKILL Transferring methods for validation of informal learning to VET institutions in the field of sustainable agriculture

2013-1-FR1-LEO05-48134

<http://www.adam-europe.eu/adam/project/view.htm?prj=10921>

Project Information

Title: AGROSKILL Transferring methods for validation of informal learning to VET institutions in the field of sustainable agriculture
Project Number: 2013-1-FR1-LEO05-48134
Year: 2013
Project Type: Transfer of Innovation
Status: granted
Country: FR-France
Marketing Text: The European Commission is putting more and more emphasis on the need to recognize all the knowledge, skills and competencies of an individual, including those acquired outside the formal system. The specific programs for continuing education underline how the initiatives taken by EU Member should aim at "validation of non-formal and informal learning and be based on learning outcomes".

AGROSKILL is focused on the problem of validation of non-formal and informal learning, in one of the areas where non-formal training and knowledge-based expertise are the most pregnant, agriculture, trying to "preserve the benefits for the environment and the protection of nature and support training and education for professionals in sustainable agriculture" (European Action Plan for organic food and agriculture).

Summary: In the field of sustainable agriculture, some countries have taken recent validation initiatives in the context of the development of a national qualifications framework. In Spain, certification was created for staff in charge of supporting converted to organic agriculture farmers. In other countries, such initiatives have remained limited, reflecting a lack of national strategies, a lack of knowledge on how to implement this validation in practice and - in some cases - a lack of confidence in the validation on the part of individuals and employers as well as cultural and attitudinal barriers. This can also come from a culture that values informal learning at the expense of formal, often negatively judged as too "academic" or unsuitable to local or professional characteristics.

To achieve this goal, it is important that trainers, tutors and managers of vocational training institutions acquire skills for the implementation of a validation system, and they know the real needs of their citizens, to provide training offer and validation systems as relevant as possible. The idea of the project is to analyze the modalities of implementation of system validation, and test method validation transfers identified as innovative, starting with the skills necessary for the exercise of the professions (farmers, agriculture employees, advisers and trainers), acquired through informal or non-formal learning, which could be validated.

Description: The project objective is to adapt the content and transfer the best methodology for the recognition of non-formal and informal learning in the field of sustainable agriculture and eco-efficient, designed primarily for trainers and managers of the centers vocational training in European countries. In order to rely on concrete cases, the partners chose to focus on a form of sustainable agriculture, including organic farming.

The main problems identified in the partner countries, even if the agricultural sector is based on qualified stakeholders, training and qualifications of people are not necessarily formal, and is based primarily on the expertise (including the countries of eastern Europe and the Mediterranean) or non-formal training (France and Germany). Thus, vocational education in France, either for farmers or the accompanying organisms staff rarely the subject of a qualification after training periods.

The project also relies on the transfer of knowledge and products in terms of sustainable agriculture in Europe and on the identification of current market needs in order to take into account in agricultural training programs. In line with the priorities of the LEONARDO program, the AGROSKILL project aims to improve the skills of trainers by providing innovative tools for the validation of informal learning and

Project Information

expertise.

In addition, the project will also transfer innovative practices from learning structures that have previously participated in projects of the "long life training " program, involving teachers and companies in the design of new training modules that will lead to EU official curriculum and pilot courses.

To do this, the action plan is based on three main steps:

1 - analysis of skills needs in sustainable agriculture (WP2).

For this first action, carried out between October 2103 and september 2014, experts in organic agriculture and vocational training were surveyed in each country of the partnership, using a common questionnaire, and synthesis was performed (see the product n° 1).In parallel, projects dedicated to longlife training corresponding to the AGROSKILL theme were identified and analyzed (see the product n°2), and a transnational glossary of terminology specific to the theme "sustainable agriculture" was designed, so that partners use the same terms

2 – National analysis on the structure of non-formal and informal-formal learning and the current situation regarding the recognition of previous experience (WP3). Each partner conducted an analysis between meetings of Chania (April 2014) and Hamburg (September 2014)

It continues with the Implementation Strategy transfer: how to apply the transferring methods to the specific situations in each country? (WP3) For each country participating, partners write a proposal of transfer implementation, depending on national situation, and using shared guidelines, like a summary report about tranferred methods for validation training, and a general strategy for transfer implementation.

3 - implementation of pilot courses, during which the transfer will be experienced.(WP4)

Actions 3 and 4 relate to the year 2 of the project. It is expected that pilot courses are put in place by the end of April 2015. Their contents will be discussed during the meeting in Hamburg in october 2014.

In parallel, the partners have developed substantial actions to promote and recognize their efforts and to verify the efficiency of their project.

Their actions are supervised by a network of people identified as "experts" and who agreed to participate in the project by providing their opinions on the actions carried out and their results.

A communication plan is based on several complementary media to publicize the project : regular updating of the project sheet on the basis ADAM, realization of a website and brochures in all the languages of the partners, publishing newsletters , distributed to networks, various interventions in meetings ...

Project Quality evaluation plan to track the performance of the action plan and bring in financial partner all the elements necessary to properly evaluate the project. Two reviews financial and technical are provided on the project period, the first will be finalized by the end of November 2014 and will cover the first year of the project.

Themes: *** Quality
 *** Sustainability
 *** Lifelong learning
 *** Recognition, transparency, certification
 *** Enterprise, SME
 ** Vocational guidance
 * Labor market

Sectors: *** Education
 *** Agriculture, Forestry and Fishing
 * Information and Communication

Product Types: website
 program or curricula
 teaching material

Project Information

evaluation methods

Product information: Among the main products::

- 8 National implementation strategies for converting current non-formal courses into formal courses, and validating the previous learning
- 8 Pilot courses training more than 35 VET experts/teachers and more than 500 downloads of training units
- More than 65 members in the Labour Experts Validation Network, with more than 100 VET Centres identified

At the end of the first year of the project, many of these experts have joined the project and will AGROSKILL can bring their knowledge of the subject.

The main impact in the short term is to obtain:

- 1) qualification system and
- 2) validation tools for VET teachers in the sustainable agriculture field.

In long term, the VET teachers, trainers, tutors and VET institution managers will be able to provide new training, in:

- 1) new courses with EU structure and formal learning
- 2) Validate existing expertise into formal learning.

The tools developed will be subject to the opinions of the organizations in charge of validation systems at the scale of individual nations of Europe, which naturally require additional time and difficult to quantify, so this phase does not include the project.

Product 'Analysis of Questionnaire on National Skill Needs for Competences in Sustainable Agriculture (R13)'

Title: Analysis of Questionnaire on National Skill Needs for Competences in Sustainable Agriculture (R13)

Product Type: procedure for the analysis and prognosis of the vocational training requirement

Marketing Text: The present report summarizes the results of the national needs analysis survey conducted among professionals in VET and the world of work, in Spring 2014, to determine levels of awareness of available means to validate the KSC within the eco-efficient agricultural sector.

Description: For the needs of the Agroskill project and in order to complement the deliverables of WP2_ "Transfer of European training contents on eco-efficient/sustainable agriculture and identification of market skills needs" a survey based on questionnaires/interviews was set to professionals in VET and the world of work, to investigate their levels of awareness of available means to validate the skills knowledge and competencies within the eco-efficient agricultural sector.

Target group: Experts in Organig agriculture and/or informal and non-formal trainings.

Result: Best knowledge about the comptencies needed, with a large panel of answers from european experts. It's the first step on the Agroskill process consisting in discovering the competencies needed, how the current training and validation systems are able to learn and/or to validate theses competencies, and how to improve what already exists or create new opportunities.

Area of application: Vocational training in agriculture

Product 'Summary Report about transferred products on agriculture training (R14)'

Title: Summary Report about transferred products on agriculture training (R14)

Product Type: procedure for the analysis and prognosis of the vocational training requirement

Marketing Text: Organic agriculture (OA) is a certified sustainable farming system that promotes environmental protection, increased food safety, security and preserves landscapes and cultural heritage. A number of initiatives to develop VET programmes OA exist in EU member states of which, the standards of training vary widely, and none leads to a recognized, transferable, international qualification as an OA advisor/trainer/technician. For the needs of the Agroskill project and in order to complement the deliverables of WP2_ "Transfer of European training contents on eco-efficient/sustainable agriculture and identification of market skills needs" elements and products from previously executed projects, CerOrganic (Annex 1), AgroTrain (Annex 2), Forecologia (Annex 4), Ecolearning (Annex 5) and Soltec (Annex 6) were reviewed and selectively adapted for further utilization.

Description: For the needs of the Agroskill project and in order to complement the deliverables of WP2_ "Transfer of European training contents on eco-efficient/sustainable agriculture and identification of market skills needs" elements and products from previously executed projects, CerOrganic and AgroTrain were presented, reviewed and selectively adapted for further utilization by WP3. Filtrated outcomes of the ecoTools LdV project are also here presented.

Target group: AGROSKILL steering committee members.

Result: Improving knowledge about transferred Products and methodologies from previous projects.

Area of application: Implementation of Agroskill plan of actions.

<http://www.adam-europe.eu/prj/10921/prd/2/1/Summary-Report-about-transferred-products-on-agriculture-training.pdf>

R14: Summary Report about transferred products on agriculture training.

This document is a transfer of innovative structures from previous LLP experiences.

Product 'AGROSKILL Organic Farming Glossary (R15)'

Title: AGROSKILL Organic Farming Glossary (R15)

Product Type: others

Marketing Text: This Glossary meets all the specific terms used for describing organic farming. All partners have collected technical terms in order to establish a multinational glossary, in all partners languages and English. The glossary will be part of the training material and published on the project website.

Description: The glossary is organized for presenting the technical terms in the main areas of study :

- Principles of Agroecology
- OA Conversion Requirements & Certification Standards
- Agrobiodiversity & Genetic Resource Management
- Soil Quality & Fertility
- Composting Technology
- Plant production techniques
- Postharvest Handling
- Plant Protection

At the end of the glossary, a Glossary Sources gives all the sources used by the partners and can be a way for users to go further in their information.

Target group: All people using international exchanges or using international mobility, and who could need to know the translation of some terms : researchers, teachers and trainers, trainees, agricultural workers and managers...

Result: This glossary gives an "international technical language" about organic farm and breaks the potential gaps in a specialized discussion.

Area of application: Organic Farming

Product 'AGROSKILL dissemination tools : logo type, booklets, website (R8)'

Title: AGROSKILL dissemination tools : logo type, booklets, website (R8)

Product Type: website

Marketing Text: For supporting our dissemination actions, the AGROSKILL communication tools are divided in several realizations : logotype, a website dedicated on the project, and a booklet declined in two-languages versions, to communicate in each country with a document presenting our project and mixing english and each partner's language.

Description: 1 website, 6 several versions of the booklet (7 languages in Agroskill partnership : croatian, french, german, greek, hungarian, polish, spanish)

Target group: All target groups

Result: Communication through the several events organized by the partners, updating on the website, and dissemination of the results to all the target groups.

Area of application: Public and specific groups areas

Product 'AGROSKILL project newsletters (R7)'

Title: AGROSKILL project newsletters (R7)

Product Type: others

Marketing Text: Each six months, the partners write a project newsletters to update information about the project results. A good way to give news to their networks and to keep in contact with people interested in our project.

Description: This newsletter is written after each steering committee. It makes a balance of the last actions and explain the results obtained, it also gives the coming actions, with dead-lines and expected results. Finally it gives focuses on sustainable agriculture in each country participating.
The newsletters are both in english version and partners' language version.

Target group: Every people interested in Agroskill. the newsletters can be download in Agroskill website www.agroskill.eu, also in partners' websites, and can be sent to specific people, like experts, through emailing.

Result: Keeping in contact and showing how the project implementation is going on.

Area of application: People interested in Agroskill project

Summary report about others LLP projects (ADAM database)

Product 'AGROSKILL communication strategy (R5-R9)'

Title: AGROSKILL communication strategy (R5-R9)

Product Type:

Marketing Text: The AGROSKILL communication strategy (R5-R9) has created two results: the Communication and Dissemination Plan and the After-AGROSKILL Communication and Exploitation Plan.

The Communication and Dissemination Plan address the different stakeholder groups identified for every partner in a database in order to guarantee maximum impact of the dissemination. The After-AGROSKILL Communication and Exploitation Plan guarantees the continuation of the knowledge exchange after the life time of the project. (The R9 document is inside the R5 document)

Description:

Target group: General public, stakeholders.

R5-R9: The Communication and Dissemination Plan and The After-AGROSKILL Communication and Exploitation Plan

The Communication and Dissemination Plan address the different stakeholder groups identified for every partner in a database in order to guarantee maximum impact of the dissemination. The After-AGROSKILL Communication and Exploitation Plan guarantees the continuation of the knowledge exchange after the life time of the project. (The R9 document is inside the R5 document)

Product 'Summary Report about transferred methods for validation of training (R16)'

Title: Summary Report about transferred methods for validation of training (R16)

Product Type: others

Marketing Text: This document offers a methodology for the process of identification and validation of non-formal and informal learning (Procedure). It explains the aims and objective of a procedure, and describes its process. netEDUKACJA is transferring products developed under the LLP project EPANIL, and ECQA is transferring its methodology for certification and validation of professions and common training quality in Europe.

Description: The task of preparing a uniform accreditation of skills and professional qualifications of prior learning falls within the scope of the CZ/04/B/F/PP-168010 "European Common Principles for the Accreditation of Non-formal and Informal Learning in Lifelong Learning" (abbreviated as EPANIL) pilot project and run by the partners institutions on the basis of the Leonardo da Vinci program.

Target group:

Result: This methodology can be applied to sustainable agriculture, and it will be used for preparing the strategy for transfer implementation.

Area of application:

<http://www.adam-europe.eu/prj/10921/prd/8/1/Summary-Report-about-transferred-methods-for-validation-of-training.pdf>

R16: Summary Report about transferred methods for validation of training.

The aim of this document is to transfer of innovative certification and validation systems from identified LLP projects.

Product 'National analysis of Formal Validation per country (R17)'

Title: National analysis of Formal Validation per country (R17)

Product Type: others

Marketing Text: The partners describe national analysis about existing structure of formal, non formal and informal learning and the situation with regard to the accreditation of previous experience.

Description: For each country, you can find a specific document in two versions : english version and national language versions (croatian, french, german, greek, hungarian, polish, spanish).

Target group:

Result: Following these conclusions, and in links with the document "Summary Report about transferred methods for validation training" (R16), partners are able to build a "Proposal of transfer implementation" (depending on national situation, how could adapt the General Strategy for Transfer Implementation proposed by NetEDUKACJA and ECQA).

Product 'General strategy for transfer implementation (R18)'

Title: General strategy for transfer implementation (R18)

Product Type:

Marketing Text: The General Strategy for Transfer Implementation
In introduction, it explains Accreditation of Prior Learning (APL) and Accreditation of Prior Experiential Learning (APEL) within the AGROSKILL project and their function in the context of LLL.
It gives also a Guideline for validating non-formal learning into formal learning within agriculture sector, and a Guideline for validating experience (expertise).

Description:

Target group:

Result: This is a common guideline for partners to build their own National Implementation Strategy (R19), that they will test through a pilot courses (R20).

Area of application:

Homepage: <http://agroskill.eu>

Product Languages: English

product files

General-Strategy-for-Transfer-implementation.pdf

<http://www.adam-europe.eu/prj/10921/prd/10/1/General-Strategy-for-Transfer-implementation.pdf>

This document contains a proposal for a transfer implementation strategy, which will be a guide for approaching the transfer process.

Product 'National implementation strategy for converting current non-formal courses into formal courses, and validating the previous learning (R19)'

Title: National implementation strategy for converting current non-formal courses into formal courses, and validating the previous learning (R19)

Product Type:

Marketing Text: Each country prepares a national implementation strategy with two aspects, converting current non-formal courses into formal courses, and validating the previous learning.

Description: This strategy takes account the main documents generated until now :
- National skill needs analysis,
- National analysis of the current non formal learning,
- Strategy for transfer implementation.

Target group:

Result:

Area of application: This action makes part of the WP4. The objective of this Work package is to design and validate by pilots, national strategies for VET teacher/centers willing to convert their current courses to formal training in base to EU standards, and validate the previous non-formal learning and expertise of the student and convert it into formal learning. Once validated, the strategies per country will be proposed to the National Qualification Agencies.

Product 'Proposals to the Nationals Qualification Agencies (R22)'

Title: Proposals to the Nationals Qualification Agencies (R22)

Product Type:

Marketing Text: This is the last result of the Work Package 4, dedicated to the pilot courses and the experimentation of tranfert methods for validation.

Each partner sent a proposal to its National Qualification Agencies, showing the national strategy for implementation (R19), and most of them receipt answers and opinions. The joint documents present these exchanges and give some ways in which the partnership could valorize and proceed its results after the end of the project.
