Projektinformation

Titel: -

Projektnummer: 2012-1-GR1-LEO05-10054

Jahr: 2012

Projekttyp: Innovationstransfer

Status: bewilligt

Land: EL-Griechenland

Marketing Text: -

Zusammenfassung: Recognizing and responding to the need to provide support for parents of DS children and professionals that come into contact with them, was the LdV DoI multilateral project PoD - Professional Training for Parents of Children with Down Syndrome. Undertaken in 2007-2009, with a partnership that included Spain, Italy, Greece and Romania, it designed, developed and implemented a new training tool for family members that helped stimulate and educate people with DS throughout their lives, beginning in early childhood.

The conditions for persons with DS and the challenges facing those involved in their care and education that inspired the PoD project in the original partner countries are more entrenched in countries of the eastern part of Europe. In view of this, and owing to the fact that the results from the DoI project showed unequivocally that PoD is worthy of further development for use across Europe, KMOP, as a defining member of the original partnership, seeks to adapt the existing PoD tool to the needs – socio-economic and linguistic - of two new EU countries: Hungary and Bulgaria.

The project is carried out by a consortium with two partners in each country, representing NGOs, DS associations and educational partners. The Greek NGO KMOP, as part of the original developing consortium with extensive experience in management of EU funded projects is joined by fellow Greek MAST, a private SME with technical expertise, which served as the technical backup of KMOP during the development of the original PoD tool. In Bulgaria, DDBZ, as an experienced VET provider with extensive experience in training and European projects, is joined by a special needs school that has a particular focus on children with DS. In Hungary, the Down Syndrome Association will work closely with a progressive educational centre that has the technical expertise and experience to undertake the adaptation of the tool for the Hungarian context. The project also benefits from several associated partners that in various ways offer their support.

The main project outcome will be the revised tool in Bulgarian, Hungarian and English, accompanied by an e-learning platform and a complementary teaching methodology. Collateral outcomes will be dissemination and exploitation tools, such as the web site, public presentations, articles and press releases.

In terms of envisaged impact, it is expected to be significant both numerically (the partnership can reach over 3000 final beneficiaries, end-users and stakeholders) and in terms of results, empowerment of target groups and final beneficiaries.

Beschreibung: During the Re-PoD project, which is a 24 month project, the following will be implemented for the successful delivery of the final training tool:

- Identification of the actual needs of parents/relatives of persons with Down Syndrome in Bulgaria and Hungary
- Proposal for the areas of the existing PoD tool to be adapted so as to develop a tool which will correspond to the actual needs of parents of persons with Down Syndrome in Bulgaria and Hungary.
- Development of the functional prototype and revised tool
- Piloting of the prototype
- Designing and implementation of a teaching methodology for the final training tool
- Implementation of Training of Trainers (ToTs) and Training of Users (ToUs) sessions in both Bulgaria and Hungary to create a network of active stakeholders who will facilitate the sustainability of the project.

Produkt '1st project article'

Titel: 1st project article

Produkttyp: andere

Marketing Text: 1st article on the launch of the Re-PoD project, main objectives and expected outcomes

Beschreibung: provide information on the project progress and its outcomes after the finalisation of important stages (needs analysis results). At the 1st year of implementation one article has been published by each partner

Zielgruppe: NGOs, parents of children with DS, professionals, general public

Resultat: Raise awareness, attract interested stakeholders for the piloting of the prototype tool and for the training sessions to be conducted within 2014.

Anwendungsbereich: Informaitonal material

Homepage:

Produktsprachen: Englisch
Bulgarisch
Ungarisch
Griechisch

Produkt '2nd project article'

Titel: 2nd project article

Produkttyp: andere

Marketing Text: 2nd article on the general information of the Re-PoD project, progress and upcoming activities

Beschreibung: provide information on the project progress and its outcomes after the finalisation of important stages (needs analysis results) and further provide information on the next steps.

Zielgruppe: NGOs, parents of children with DS, professionals, general public

Resultat: Raise awareness, attract interested stakeholders for the piloting of the prototype tool and for the training sessions to be conducted within 2014.

Anwendungsbereich: Informational material

Produkt 'Needs Analysis Report'

Titel: Needs Analysis Report

Produkttyp: Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes

Marketing Text: The needs analysis reports aims to investigate and reveal the areas in which the needs of the parents and relatives of people with Down syndrome in Bulgaria and Hungary substantially differ from those examined in the previous PoD project, so as to be able to identify those areas that need to be adapted in such a way that it will fit to the needs of the under consideration target groups

Beschreibung: The needs analysis reports aims to investigate and reveal the areas in which the needs of the parents and relatives of people with Down syndrome in Bulgaria and Hungary substantially differ from those examined in the previous PoD project, so as to be able to identify those areas that need to be adapted in such a way that it will fit to the needs of the under consideration target groups

Zielgruppe: -Parents of persons with Down Syndrome
-professionals work with persons with Down Syndrome

Resultat: It clearly defines the preferences and needs of the target group, in which the consortium was based on in order to continue to the next step, thus the "Proposal for platform and contents specification"

Anwendungsbereich: for the determination of the next task concerning the proposal for platform and contents specification

Produkt 'Progress Reports'

Titel: Progress Reports

Produkttyp:

Marketing Text: Progress Reports contributed not only in the efficient monitoring and evaluation of the project implementation process and its products/ deliverables, but also in the identification of its strong and weak aspects and provided significant information of how any issues to be overcome. It was more considered as a supporting tool providing important information regarding the overall implementation of the project, which assisted the consortium to operate in a proactive approach, rather than being reactive and act when a problem was already emergent.

Beschreibung: Progress Reports contributed not only in the efficient monitoring and evaluation of the project implementation process and its products/ deliverables, but also in the identification of its strong and weak aspects and provided significant information of how any issues to be overcome. It was more considered as a supporting tool providing important information regarding the overall implementation of the project, which assisted the consortium to operate in a proactive approach, rather than being reactive and act when a problem was already emergent.

Zielgruppe: Project partners

Resultat: 1st Internal Progress Report regarding the overall implementation (WP1, WP2, WP6) - presentation of the work during the 1st quarter of implementation, including an outline of the key activities for the 2nd quarter - (Delivered: 8 January 2013)

2nd Internal Progress Report: (WP1, WP2, WP6) - presentation of the work during the 2nd quarter of implementation, including an outline of the key activities for the 3rd quarter - (Delivered: 12 April 2013)

3rd Internal Progress Report: (WP1, WP2, WP3, WP6) - presentation of the work during the 3rd quarter of implementation, including an outline of the key activities for the 4th quarter - (Delivered: 11 July 2013)

Interim Report (4th): presentation of the work during the 1st year of project implementation, including an outline of the key activities for the 2nd year- (Delivered: end of October 2013)

5th Internal Progress Report: (WP1, WP3, WP4, WP6) - presentation of the work during the 1st quarter of 2nd year of implementation, including an outline of the key activities for the 2nd quarter of the 2nd year - (Delivered: 20 January 2014)

6th Internal Progress Report: (WP1, WP3, WP4, WP6) - presentation of the work during the 2nd quarter of 2nd year of implementation, including an outline of the key activities for the 3rd quarter of the 2nd year - (Delivered: 18 April 2014)

7th Internal Progress Report: (WP1, WP4, WP5, WP6, WP7) - presentation of the work during the 3rd quarter of 2nd year of implementation, including an outline of the key activities for the 4th and final quarter of the 2nd year - (Delivered: 14 July 2014)

Produkt 'Handbook of quality benchmarks for project'

Titel: Handbook of quality benchmarks for project

Produkttyp:

Marketing Text: This document outlines the Quality Management Plan for the Re-PoD: "Re-investing Expertise: Expansion of Professional Training for Educators and Parents of Children with Down's Syndrome" project and introduces the procedures and criteria (indicators) that are used to ensure that the project aims are met to the highest standard.

Beschreibung: This document outlines the Quality Management Plan for the Re-PoD: "Re-investing Expertise: Expansion of Professional Training for Educators and Parents of Children with Down's Syndrome" project and introduces the procedures and criteria (indicators) that are used to ensure that the project aims are met to the highest standard.

Zielgruppe:

Resultat: The aforementioned handbook of quality benchmarks evaluates and ensures the efficiency and quality of the project implementation process and sets the areas where close attention must be paid in order to keep the implementation of the project on track.

Anwendungsbereich:

Homepage:

Produktsprachen: Englisch

Produkt 'External Assessment Report'

Titel: External Assessment Report

Produkttyp:

Marketing Text: The external assessment report aimed at evaluating the course of the project and its outputs from an independent view and provide feedback and consultation on any areas for which further attention should be paid or responsive actions should be taken

Beschreibung: The external assessment report aimed at evaluating the course of the project and its outputs from an independent view and provide feedback and consultation on any areas for which further attention should be paid or responsive actions should be taken

Zielgruppe: Projects' partners, stakeholders interested on the quality of the project

Resultat: P0 (coordinator) and external evaluator were into close cooperation from the very beginning of the project (1/2013-9/2014); This fact facilitated the overall management of the project since P0 had a direct contact point to be consulted on specific issues related to the effective management of individual tasks and actions to be taken so as the required quality standards of the outputs to be succeeded. Further monitoring meetings with the external evaluator assisted the management team of the project to efficiently schedule the forthcoming tasks in time, identify potential risks and be able to act timely, always in a proactive basis.

Produkt 'Final tool'

Titel: Final tool

Produkttyp:

Marketing Text: The final tool was developed after the completion of the piloting phase of the prototype. The final tool was consisted of a DVD set (DVD, CD, booklet) and an online platform, in which participants could find the educational tool in English, Bulgarian and Hungarian

Beschreibung: The final tool was developed after the completion of the piloting phase of the prototype. The final tool was consisted of a DVD set (DVD, CD, booklet) and an online platform, in which participants could find the educational tool in English, Bulgarian and Hungarian

Zielgruppe: Parents/relatives of people with Down Syndrome, professionals in the field of DS, relevant stakeholders/organisations

Resultat: During the piloting testing of the tool any errors came on the surface and the partnership proceeded to the fine tuning of the final tool.
The piloting phase of the tool was implemented by involving both target groups in each country (professionals and parents&relatives). The overall procedure that was followed and the piloting testing results are described in detail in the overall piloting testing report that is additionally submitted for the purposes of the final report

Produkt 'Teaching Methodology Guide'

Titel: Teaching Methodology Guide

Produkttyp: Lehrmaterial

Marketing Text: Teaching methodology guide added a new dimension to the Re-PoD tool with its aim to outline didactical guidelines or learning paths on how to use the tool in different educational settings and to indicate the methodology to be followed by DS organisations to develop specific training programmes for their members, as well as a variety of professionals based on the tool. It further aimed training trainers and users on RE-PoD contents.

Beschreibung: Teaching methodology guide added a new dimension to the Re-PoD tool with its aim to outline didactical guidelines or learning paths on how to use the tool in different educational settings and to indicate the methodology to be followed by DS organisations to develop specific training programmes for their members, as well as a variety of professionals based on the tool. It further aimed training trainers and users on RE-PoD contents.

Zielgruppe: Parents/relatives of people with Down Syndrome, professionals in the field of DS, relevant stakeholders/organisations

Resultat: Training methodology guide was a core element of the tool since with its use trainers and users were able to get involved in an interactive training session, which enabled them to keep their interest in the tool, share experiences and learn on issues they had to face with DS. After taking into consideration the feedback received from the training sessions that were implemented in both countries, it can be said that teaching methodology and its clear objectives helped in the development of a network of trainers which are able to diffuse the project's outcomes to other stakeholders in the future

Anwendungsbereich: NGOs, organisations of both public and private sector engaged in the field of Down Syndrome, as well as voluntary bodies, associations for persons with DS, and higher educational institutions.

Produkt 'Exploitation Plan'

Titel: Exploitation Plan

Produkttyp:

Marketing Text: The Exploitation plan directs the partners on how to exploit the project's results and promote them towards interested organizations and other stakeholders. Important part of the plan is the processes of integration of the proposed strategies and priorities in interested organizations. In addition it includes guidance on how the partners can integrate inclusive educational methods and programmes in the various training services that they currently offer.

Beschreibung: The Exploitation plan directs the partners on how to exploit the project's results and promote them towards interested organizations and other stakeholders. Important part of the plan is the processes of integration of the proposed strategies and priorities in interested organizations. In addition it includes guidance on how the partners can integrate inclusive educational methods and programmes in the various training services that they currently offer.

Zielgruppe: Project's partners

Resultat: Exploitation plan indicated individual exploitation thought so as partners to find the channels through which they could diffuse project outcomes. It outlined the strategies to be followed so as initially set objectives to be achieved; it created a network of trainers who will sustain the life of the tool. On this frame, certain stakeholders (organisations) were approached after the training sessions (ToTs and ToUs), which expressed their interest in incorporating Re-PoD tool and the respective teaching methodology in their providing activities to train their staff and any interested individuals. This particular fact was a success point for the project since project outcomes will be sustained after project's conclusion.

It outlined the strategies to be followed so as initially set objectives to be achieved; it created a network of trainers who will sustain the life of the tool. On this frame, certain stakeholders (organisations) were approached after the training sessions (ToTs and ToUs), which expressed their interest in incorporating Re-PoD tool and the respective teaching methodology in their providing activities to train their staff and any interested individuals. This particular fact was a success point for the project since project outcomes will be sustained after project's conclusion.

Produkt 'Training Sessions (training sessions implemented in national languages [HU, BG] and evaluation report delivered in English)'

Titel: Training Sessions (training sessions implemented in national languages [HU, BG] and evaluation report delivered in English)

Produkttyp: andere

Marketing Text: In the frame of work package 5, a new dimension was introduced compared to the previous PoD tool, with its aim to outline didactical guidelines or learning paths on how to use the tool in different educational settings. This teaching methodology was the basis for the conduct of the training sessions that followed in both Bulgaria and Hungary. These sessions aimed at training trainers and users on RE-PoD's contents and also aimed at the benefits from its use.

Beschreibung: In the frame of work package 5, a new dimension was introduced compared to the previous PoD tool, with its aim to outline didactical guidelines or learning paths on how to use the tool in different educational settings. This teaching methodology was the basis for the conduct of the training sessions that followed in both Bulgaria and Hungary. These sessions aimed at training trainers and users on RE-PoD's contents and also aimed at the benefits from its use.

Zielgruppe: NGOs, Parents/relatives of people with Down Syndrome, professionals in the field of DS, relevant stakeholders/organisations

Resultat: Through the ToT activities, a network of trainers was created that ensures the long-term impact of training sessions – they became human multipliers of the knowledge acquired. ToU (envisaged as a step by step parent guide) was also key to sustain project result, since it was the members of the DS organisations – usually parents of DS children - that have acquired and directly apply the new knowledge themselves inadvertently 'coaching' other parents and relatives. The learning for trainers and users was achieved through presentations by expert project staff as well as through group work.
