Fourth working seminar for health precaution of long-term unemployed and their trainers

The H-CoDe consortium (Health COmpetence DEvelopment) held its fourth meeting in LODZ (after Erfurt, Barcelona and Sofia), welcomed by the BOIE Company, the local partner of H-CoDe. This meeting gave the opportunity to sum up the situation regarding the progress of the project since the beginning: meetings, learning situations, learning fields (training modules), Moodle platform, dissemination, leaflet, newsletter,

During the previous meeting in Sofia (Bulgaria), six learning fields have been set forth by the partners linked with the different learning situations they meet in their respective organizations with the different groups of disadvantaged persons they have to train. The six learning fields stemmed from different human and personal situations, ratified in Lodz are:

The Learning fields are part of the development of the curriculum for the trainers who train afterwards the trainers in organizations

website, presentation of the evaluation plan... It mainly gave the opportunity to focus on two important points:

- The learning situations and learning fields as part of the development of the curriculum for the trainers who, afterwards, train the trainers in different organizations.
- The drawing up and validation of a common declaration précising clearly our "action development plan".

Learning situations and learning fields:

- Nutrition.
- Self confidence.
- Physical training.
- Recognition of addictions.
- Management of emotions.
- Mood disorders.

These topics are given a common working process divided in three axes: Competencies, contents, methods. And each of these axis concerns trainers on one hand, trainees on the other hand.

Common declaration

This project has been funded with support from the European Commission.

Lifelong Learning Programme

The responsibility for the contents of this publication reflects the views only of the author, the Commission cannot be held responsible for any use of the information contained therein.

One of the main points discussed was the drawing up of an official declaration to be approved by the consortium.

The Health COmpetence DEvelopment consortium project applies to produce and adapt different methods for health precaution training for several groups of disadvantaged Person on the labour market. In the frame of this project, the consortium wants to:

- Adapt and test special guidelines and training modules for trainers in order to improve the product quality.
- Define a competence profile according to the European standards (EQF level).
- Implement a test and certifying system for the trainers on European level.

Next steps:

Modules Implementation and experimentation

Our team in Lodz:

All the partners declared that they agree with these objectives and the implementing of the following visions:

- The curriculum developed remains the intellectual property of all partners, will become core component in the training of their staff, and will be transferred to background decisions makers, organizations, institutional authorities responsible for fighting unemployment.
- The findings will be transferred at any emergent opportunity into civil society.
- At the end of the project a central control system will be put in place for future marketing, knowing that Rein can exclusively license the partners of H-CoDe for marketing.
