

EFFIVET

Transferring European VET Structures to cover skill needs in the Energy Efficiency Sector

**Workpackage 8:
Consultancy Meetings**

Final Report

1. INTRODUCTION

This report is part of the Work Package 8: Consultancy Meetings — Transferring European VET Structures to cover skill needs in the Energy Efficiency Sector.

Leader of the work package: Local Councils' Association, Malta

2. OBJECTIVES OF WORK PACKAGE 8

The aims of these meetings are not only exchange or knowledge transfer, but also a "lobbying" tool in order to reach an integration of the innovation into the national VET-system. The partners will undertake consultation meetings with the National Qualification Institution and other stakeholders, like branch associations, VET-institutions, ministries, scientific institutions, etc. in order to promote the further usage and development of the innovations.

3. METHODOLOGY FOR CARRYING OUT THE WORK

All the partners had to organize three meetings with the Qualification Institutions, other stakeholders and related entities, who already received the Training Guide, prepared in WP 4. During these meetings the partners had to:

- Fill out a survey with interviewed opinion about the Training Guide
- Fill out a supporting document that shows that they have received information about the EFFIVET project. This document was signed by a representative of the institution

4. MEETINGS HELD

The meetings were held as follows:

ANESE: ENACE, TUV Rheinland and IDEA

CLUSTER DE LA ENERGIA DE EXTREMADURA: MERCATEL FORMACION, DG FORMCION PARA L'EMPLEO and AFIMEC FORMACION

LOCAL COUNCILS' ASSOCIATION: MCAST, UNIVERSITY OF MALTA and National Commission for Further and Higher Education

Bfw: HWK Service GmbH, IFEU, NA BIBB and Uni Bremen

INTELIGENTNA ENERGIJA: Technology Development Centre – Development Agency of Brod-Posavina County Ltd, REGEA and Development Agency Zagreb – TPZ Ltd.

STRATAGEM: Cyprus Energy Agency, Limassol Chamber of Commerce and Industry and G. Trikkis & Sons Engineering Ltd.

GLOBAL COMMERCIIUM: National Agency for Employment, Regional Centre for Continuing Training for Local and Public Administration Bucharest and National Agency for Public Servants

AEPMDD: National Art College “Octav Bancila” Iasi, Technical College “D. Leonida” Iasi and Technical Agriculture College Miroslava.

5. ANALYSIS OF THE SURVEY

5.1 Do you think that the project deliverables fill a need in the existing VET national structure for Energy Manager?

All the experts interviewed agreed that the project deliverables do fill a gap in the existing VET structure of Energy Manager.

5.2 Do you find that the VET products will allow a further development of the Energy Management training at EU level?

The answers, given by the experts interviewed, were mixed. We had some experts agreeing that it will allow for further development at EU level, other found them insufficient and then there were other who said that such issue is to be first tackled on a national basis before the European Union one.

5.3 Do the products developed in the EFFIVET project show accordance with the National and European structures required to develop a Certified Qualification in your country?

All the experts agreed that the products developed in the EFFIVET project are near the National and EU qualification structure. All of them agreed that these have to be further developed and made in accordance to certain national requirements such as number of hours required. They also stated that a legal framework has to be developed in order to conform to national regulations.

5.4 Do you find any Document missing in order to implement the Energy Manager profile in the National Qualification Structure?

The final question also had mixed answers as in some countries there were no documents missing so as to implement such as Croatia, Cyprus whilst in other countries, such as Spain , Romania and Malta this still lacks some key documents and approvals so as to be implemented

6. CONCLUSIONS

From the meetings held and the surveys collected we can clearly see that the project's Training Guide was well received by the experts and all the institutions contacted. From the above questionnaire we can also clearly see that there was the need for such project as almost unanimously all the experts declared that there was a gap in the VET structure which this project tackled.
