Ready - Steady - Internship

Matching students with companies to find the right internship

The Project

Ready - Steady - Internship aims to support the placement, organization and implementation of internships during the vocational educational training (VET).

Support for School Teachers & Students

The website shall provide teachers/trainers with a simple and coherent concept to support the search and choice process of internships

The Project's main Goal

The project's ultimate goal is to have more VET students starting an internship, which really matches their interest field, skills and competencies. Only if the intern fits to the

placement company and if the intern works on the tasks that matches his / her own competencies, skills and interest, then the placement will be a win-win situation for all parties involved.

An Engaging Approach

The Ready - Steady - Internship project has an engaging approach for involving the students and the VET teachers. The project will make use of the student's own channel of communication: the internet. Instead of providing the internship information in the old fashioned way (paper), the project will

actively involve the students on the website by using engagement games to make the information more memorable.

Link Vocational Schools and Companies

The project additionally creates a link between the VET institutions and the Companies. In the end the student as well as the VET teacher will have access to a national wide company databank for placements.
