

Project title: Augmented Reality towards better understanding of Online Identities -
IDentifEYE - 2013-1-GR1-LEO05-13907

Empowering teachers towards Online Identities: IDentifEYE project has launched!

About IDentifEYE Project

IDentifEYE is an innovative approach that aims to **empower teachers** reach out to

children and educate them about the dangers of the Internet and online identities. Internet is a great tool that offers youngsters many additional opportunities to their education, entertainment or even social life. But, children today are in danger on the Internet because of not fully understanding the relevance of

data. Students either will reveal sensitive personal data to virtual strangers or they will believe that others truly are who they present themselves online to be. Both of these attitudes are making children vulnerable to third parties with potentially malevolent intentions. So, the best strategy to protect children is to train teachers that children already trust, to guide them through online activities safely.

What are the benefits for teachers?

Teachers will:

- ✓ Acquire essential training essential skills and essential knowledge on the subjects of online identities and internet safety,
- ✓ Benefit from a new curriculum module both in a traditional form (print) and online together with didactic material and multimedia instructions,
- ✓ Be a part of an international network oriented to these subjects,
- ✓ Be able to implement the new didactic approach themselves.

How the teachers will benefit?

Teachers will be the final receivers of an innovative curriculum which will utilise state-of-the-art technology (Augmented Reality game) and validated pedagogical approaches.
