

Support against Vocational Training and Education Dropout

2013-1-RO1-LEO05-28787

<http://www.adam-europe.eu/adam/project/view.htm?prj=11871>

Project Information

- Title: Support against Vocational Training and Education Dropout
- Project Number: 2013-1-RO1-LEO05-28787
- Year: 2013
- Project Type: Transfer of Innovation
- Status: granted
- Country: RO-Romania
- Marketing Text: Set of innovative tools for preventing and combat early school leaving and vocational training leaving and other related phenomena, easy to use for all stakeholders.
- Summary: SaVED addresses one of the most actual problem: education and training drop out that has increased in recent years due to the economic crises. In 2011, at EU 27 level, 13.5% of all 18 to 24 year old left education and training having only lower secondary education or less. In Romania, the school dropout rate of learners bellow ISCED4 increased by one third over the last 9 years. The statistics are also alarmingly in most European countries and the chances to achieve the targets agreed by the European Council for each country are low, unless action is taken in this respect. The main aims of SaVED project was: to diminish the drop out process and absenteeism by adapting and transferring in RO, UK, BG, GR, TR the results of "Stop Dropout!" project; to improve the quality of learning process and conditions by extending the aim of Risk Detector(RD) and produce a new tool namely the Institutional Profile(IP); to foster cooperation inside of Flexible Prevention and Support System(FPSS). The objectives were: adapting the tools from the previous project to specific conditions from partner countries; identifying the institutional factors that influence the drop out phenomenon; developing new tools for improving the quality of education and training services and avoid school drop out; develop a dedicated online platform as support for FPSS. The consortium consisted in 7 partners from 5 UE and 1 non UE countries (see B.5.), all having the necessary skills and expertise for contributing to the successful development of the project. The promoter and coordinator INCSMPS(RO) is a national research institute for labour market and social protection, BLICK(AT) the coordinator of previous project is specialised in developing methods and tools for persons' integration into the world of work, INFOART(BG) and POINT(TR) are companies with a large expertise in ICT use for VET and European projects implementation, HMA(GR) is a very experienced Vocational Training Centre with strong connexion with the labour market, GINGERBRED(UK) is a membership organization for lone parents which provides a range of services including training, CJRAE(RO) is a public institution for supporting the educational process at local level. The project's outcomes: Risk Detector(RD), Personal profile(PP), Institutional Profile(IP) and Flexible Prevention and Support System(FPSS) will be integrated on an online platform. The early school leaving indicator assesses the performance of the educational and training systems, but signals some important aspects of social&economic life that can influence people's access to education and have negative impact on their integration on the labour market and access to quality jobs. The estimated project impact on long term is lowering early school leaving, improving the quality of education and training processes, increasing the stakeholders' collaboration for preventing the drop out and absenteeism.
- Description: SaVED project aimed to adapt the tools developed in the previous project to specific conditions from partner countries; identifying the institutional factors that influence the drop out phenomenon; developing new tools for improving the quality of education and training services and avoid school drop out; develop a dedicated online platform as support for FPSS. A consortium from 7 countries implemented the project in 24 months for obtaining a set of innovative instruments and creating a network of stakeholders for preventing and fighting against drop out and related phenomenon. The project implementation was organized on work packages led by a partner of consortium recommended by its expertise and is responsible with achievement of planned products respecting the deadlines and the planed quality. During all period of implementation the partners developed dissemination activities for make the project and its results known and for ensure the active participation of target group

Project Information

of the project. At the end of project a Final Conference was organized for presenting the project results and for collecting useful suggestions, recommendations in support of sustainability of final product FPSS.

Themes: *** Access for disadvantaged
*** Equal opportunities
* Others
* Lifelong learning
* Social dialog
* Initial training

An useful collection of good practices in the field of prevention and combating the drop out phenomenon

PersonalProfile-DE.pdf

<http://www.adam-europe.eu/prj/11871/prj/PersonalProfile-DE.pdf>

Das Persönliche Profil ist ein strukturierter Beratungsansatz, der verschiedene Techniken aus Psychotherapie und Beratung in sich vereint und potenzielle Ausbildungsabbrecher/innen unterstützen kann.

PersonalProfile_EN.pdf

http://www.adam-europe.eu/prj/11871/prj/PersonalProfile_EN.pdf

Personal Profile (PP) is an other tool developed in the project. It is a structured interview scheme for counsellors and other specialists to use when working with individuals at transition points in their lives. The Personal profile can be used by counsellors, including tools for applying the story telling technique during career and school counselling of potential dropouts and enhancing their decision making capacity. For a better understanding of the PP way to use was produced a movie available on the ON-line platform of the project.

Risk detector_DE.pdf

http://www.adam-europe.eu/prj/11871/prj/Risk%20detector_DE.pdf

Der "Risiko Check" steht Berater/innen zur Verfügung und besteht aus einem Fragebogen, der sich direkt an die Jugendlichen wendet und einem Computerprogramm, das aus den gegebenen Antworten Risikofaktoren berechnet, um gefährdete Jugendliche identifizieren zu können.

Risk detector_EN.pdf

http://www.adam-europe.eu/prj/11871/prj/Risk%20detector_EN.pdf

"Risk Detector", one of the principal tools for screening and intervention to prevent school and training dropout. It aims to identify young people at risk of abandoning school by collecting and interpreting information on the incidence of situations and problems these phenomena of dropout, with threatening impact on the development and professional life. The questionnaire contains 157 questions divided into various fields like: personal data (gender, age, residence), educational level, family background (educational level of parents), attitudes and beliefs of parents about education and its importance for young people, pupil's situation to education, school environment, school activities and compliance with school rules or desirable behaviour of the student's, social relationships with peers and teachers, the existence of support or assistance needed in case of difficulty, about the experience of practical training and desired occupation, personal attitude to study and a few filter questions.
