

SALM - Skills and Labour Market to Raise Youth Employment

527690-LLP-1-2012-1-PT-LEONARDO-LMP

<http://www.adam-europe.eu/adam/project/view.htm?prj=12021>

Projektinformation

Titel: SALM - Skills and Labour Market to Raise Youth Employment

Projektnummer: 527690-LLP-1-2012-1-PT-LEONARDO-LMP

Jahr: 2012

Projekttyp: Innovationsentwicklung

Status: abgeschlossen

Land: EU-Zentralisierte Projekte

Marketing Text: Ziel dieses Projekts ist die Überprüfung Maßnahmen zur Jugendarbeitslosigkeit und die Nichtübereinstimmungen von Kompetenzen in beiden Bereichen, Senioren Tourismus und soziale Dienste zu reduzieren und verbessern die Jugendlichen Kompetenzen und zwar im Bereich der selbständigen Erwerbstätigkeit und des Unternehmertums . Partner werden ihre Best Practices, innovative Produkte (Toolkits), Erfahrungen und Ergebnisse mit nationalen Qualifikationsrahmen zu präsentieren. Austausch von Best Practices und Erfahrungen zwischen den Partnern geteilt.

Zusammenfassung: Faced with rising levels of unemployment, it is becoming harder for young people to find work. The youth unemployment in Europe is strongly linked to lack of appropriate competences required by the labour market and it varies from country to country- Member States need to ensure that their education and training systems are fit to equip young people with relevant skills in an efficient way. So conceptually this project deals with unemployed young people as a target group.

Reducing youth unemployment is a task that implies a stronger commitment of businesses and the public sector to provide work and training opportunities to young people through the development and sharing of good practices in the area of entrepreneurship, including social entrepreneurship. The promotion of self employment including effective business support by young people through adequate training and coaching measures can contribute to opening up labour market to young job seekers .Background experiences and pilot tests are conducted to provide further insights in these innovative approaches, aiming at their mainstreaming in our countries and, possibly, at EU level.

The youth unemployment is a very relevant issue for the Europe 2020 strategy which contains several targets being one of them to achieve an employment rate of 75% at the EU level in 2020. This project, will concentrate in the issue of the youth unemployment, lack of young people competencies and the opportunities generate by the needs of the market in , senior tourism and social services in order to decrease the youth unemployment, increasing competencies.

General aim of the project: to contribute to the development of innovative approaches and specific instruments for the reduction of the youth unemployment rate equipping people with the right skills for employment which is considered crucial for one of the main target of the 2020 Strategy, for the participation in LLL and a better integration in society.

Beschreibung: This project aims at reviewing measures to reduce youth unemployment and the mismatches of competencies in both sectors, senior tourism and social services, and to improve the young people competencies namely in the field of self employment and entrepreneurship. This project aims at reviewing measures to reduce youth unemployment and the mismatches of competencies in both sectors, senior tourism and social services, and to improve the young people competencies namely in the field of self employment and entrepreneurship. Partners of this project will provide analysis of their challenges and policy framework and also their measures and programmes in reducing youth unemployment field . Partners will test in their countries/training entities as a pilot project, the tools and practices of an experience with good results.

In the project , information will be collected from partners in order to make a comparative analysis of the policies and practices in interaction to support the reduction of the youth unemployment rate. Each partner will provide different measures (good practices) adopted to fight the mismatches of competencies in both sectors, the key success factors and a battery of benchmarking indicators.

Projektinformation

This project aims to develop a model incorporating the success factors of the training action in order to assure the adequate competencies of young people to the labour market in a perspective of anticipating the knowledge skills needs .

Through innovative tools and strategies for young people, employers and employment counsellors to promote integration into labour market and to strengthen the role of different stakeholders in order to find new approaches to solve the mismatches problems.

This project aims to reduce the youth unemployment phenomenon and to achieve the target of 75% of employment rate one of the priority of the ET 2020, bringing together more closely the worlds of employment , education/training through exchanges of good practices via the open method of coordination.

Produkt 'FINAL REPORT'

Titel: FINAL REPORT

Produkttyp: andere

Marketing Text: The SALM project investigated: (1) the new occupations in the senior tourism and social services sectors; (2) bridging the information gap (youth lack information concerning the job potential in these sectors); (3) tests on youth skills gap; (4) evidence on entrepreneurs' needs and their recruitment/internship policies and other matching activities; (5) counselors' needs and their role in introducing youth to jobs prospects in these sectors; and (6) evidence from pilot projects in order to check and improve the tools proposed in the project.

Beschreibung: Soft skills, like communication, team work, bearing responsibility, time management, are considered key features which youth lack (UK). Moreover, specific skills that are considered essential requisites to work in the social care sector are equally missing, i.e. competences to deal with psychologically frail individuals; they would also lack the emotional competences to tackle high risk situations.

There is a mismatch issue in both youth's lack of information and competences needed for the social sector and senior tourism jobs. Skills mismatches in SALM labour markets have been growing, with different origins such as:

- The composition of skills emerging from EU universities and training systems does not fully support a truly innovation-driven economy;
- Imperfect information and structural rigidities impair workers and businesses who aren't provided with a balanced level of skills in the right areas, which damages competitiveness in particular of smaller enterprises;
- The educational and professional choices of young men and women are continually influenced by traditional gender distortions (for instance, in choices regarding STEM streams) which constitute one root cause of skills shortages, for example in technical occupations.

Zielgruppe: Youth 15-24 years old; employment counsellors; social economy entrepreneurs; education and training leaders and labour and social policy makers.

Resultat: Pilot projects in Malta, Scotland, Portugal and Spain and the improved toolkits used were considered useful to trainers, youth and entrepreneurs.

Anwendungsbereich: Better information to youth on future career prospects in senior tourism and social services. Toolkits to identify skills need in these 2 sectors. Networking with social enterprises and potential youth entrepreneurship.

In the SALM project, national teams in Malta, Romania, Portugal, Scotland and Tuscany (Italy) have mapped trends in youth (un)employment as well as policies and specific programmes that governments at various levels have deployed to foster youth employment. Such policy-mapping exercise is illustrated in country reports (WP2 reports) that can be found in the appendix of this text which serves as a general introduction to such reports.

SALM_D7_WP2_PT.docx

http://www.adam-europe.eu/prj/12021/prd/1/1/SALM_D7_WP2_PT.docx

The employment in the sectors of tourism and social services (total including public and private sectors) aged between 15 and 24 years was in 2012, 52.9 thousand (according EUROSTAT database).

According to administrative data based on the declaration of companies to the Ministry of Employment, in October 2011, around 6000 young people (15-24 years) worked in the hotel and catering sectors as well as in human health care and social support.

Still according to the same source the percentage of workers aged over 60 years was, in 2011, 5.8% in the social services sector, and 4.7% in the sector of hotels and services related with the tourism which may induce a need for replacement of manpower in the coming years, enabling the integration of young people.

SALM TUSCANY REGIONAL REPORT (1).pdf

<http://www.adam-europe.eu/prj/12021/prd/1/1/SALM%20TUSCANY%20REGIONAL%20REPORT%20%281%29.pdf>

Generally speaking in Tuscany from 2008 to 2012 the fall in employment was 1.1%, lower than the percentage at the national level (-2.2%), the one in Lombardia region (-1.6%), Piedmont region (- 2.1%) and it was in line with the percentage of the Veneto region (-1.1%). Between 2012 and 2011 in Tuscany the trend in employment is better compared to other Italian regions: -1.1% (Piedmont), +0.2% (Lombardy), +0.1%(Veneto).

Trend of the labour market is to reflect the evolution of the economic cycle in delay, and it provides na indication of things getting worse in the coming months. On the one hand there is a stagnation of the employed labour force, whilst on the other the unemployment rate is expected to rise in 2013 up to 9%, the highest level since 1990.

SALMWp2 report Scotland.pdf

<http://www.adam-europe.eu/prj/12021/prd/1/1/SALMWp2%20report%20Scotland.pdf>

Scotland shares with many European countries specific youth employment issues: young people are likely more exposed to unemployment than senior citizens; youth from ethnic minorities along with youth with disabilities and those with low educational qualifications are more likely to be unemployed than, respectively, white Scots, able young people, and youth with higher educational achievements; unemployment is not equally distributed across the country, rather it hits hardest on specific local areas which have experienced at least a two decades long history of deprivation and underdevelopment.

Scotland has elaborated a proper 'strategy'

which focuses on: modern apprenticeships to ease transition from school to work; involvement of private and public actors, including the voluntary sector, in the

creation of training opportunities; making youth employment a cross-cutting priority in the overall Governmental activity; reforming the post-16 education system; continuing with the 'no tuition fees' for Scottish students in higher education.

Recent data on youth unemployment (May 2013) showing an improvement compared to last year (and even compared to the rest of the UK) seem to provide evidence at support of such a strategy. Criticism to the Scottish Government youth employment strategy points out, though, that the strategy's decision to focus on unemployment neglects the multiple problems arising from precarity and underemployment which characterize the current labour market for the youth in Scotland like in many other European countries.

SALM WP2 RONSEL FOUNDATION.pdf

<http://www.adam-europe.eu/prj/12021/prd/1/1/SALM%20WP2%20RONSEL%20FOUNDATION.pdf>

From an economic and social perspective, the most significant change in the structure of the Spanish population in recent decades has been its progressive ageing. So, in this sense, it is of great interest to try to approximate the factors that impact on its evolution in the future to try to respond to possible imbalances.

If we focus on the evolution of the population according to ages up to 14 years old, we can see through the following table with data, the increase in population in the majority of ages. A different conclusion is observed after the analysis of the evolution of population from 15 to 34 years old, showing the decrease of population in all sections of age. From 12.374.106 people under 35 to October 2009, to 11.146.267 people in October 2012.

Produkt 'WP2 OVERVIEW REPORT'

Titel: WP2 OVERVIEW REPORT

Produkttyp: andere

Marketing Text: Youth unemployment in Europe, included SALM countries, is not a new phenomenon or one that has been provoked by the post 2008 economic and financial crisis. Over the past fifteen years, in fact, in the European Union, member states have not been successful judging from their capacity to create jobs for young people: the EU average unemployment rate in fact has never gone below 15% in the period 2000-2013.

Beschreibung: On the supply side, the most salient challenges to youth employment are made by:

- young people demotivation and disengagement (due to lack of work opportunities) which keeps them away from actively seeking a job or even from re-engaging with studying;
- early school leaving;
- poor education/professional training;
- social class bias and similar socio-cultural features (ethnic minorities, migrants, women) or issues of physical and intellectual capability (disabled people).

On the demand side, the most salient challenges to youth employment are made by:

- economic circumstances limiting the capacities of the private and public sector to create jobs;
- lack of entrepreneurial skills and capabilities;
- young people's lack of work readiness (young people see often as overeducated but under-skilled, included soft skills);
- business preference for flexible and non-standard working contracts.

Zielgruppe: youth 15-24; employment counsellors; trainers; social services entrepreneurs.

Resultat: Description of policies and measures undertaken in each SALM country to reduce youth unemployment and foster better skills to improve employability and entrepreneurship.

Anwendungsbereich: Labour market research in SALM countries.

Produkt 'WP3 SYNTHESIS REPORT'

Titel: WP3 SYNTHESIS REPORT

Produkttyp: Beschreibung neuer Berufsprofile

Marketing Text: FG discussed future youth competencies to meet social services and tourism services for the elderly, identifying discrepancies in national qualifications framework.

Policies to raise youth employment emphasize the role of the third sector or the social economy in the creation of new jobs.

This is a sector with low participation of young people mainly female; with predominance of low skilled workers;

On skills needs, the most important are soft skills; mainly human relations and interpersonal skills(team work and coaching);

In terms of future perspectives, the creation of additional jobs: higher technical qualifications physiotherapists, psychologists and socio-cultural animators.

Beschreibung: The main objectives of WP3 are: to identify the main mismatches, and the respective main reasons; and to detect the future competences for the young people required by the labour market in the Senior Tourism and Social Services sectors.

Zielgruppe: Youth 15-24; employment counsellors, trainers, social services entrepreneurs.

Resultat: Soft Skills are considered as core skills for all the professionals working within both these Sectors - personal qualities/attributes (self-control, assertiveness, initiative, responsibility, etc), communication skills (referred as strategic) and Human Relations and Interpersonal Skills (Coaching, dealing with conflicts, Interaction and collaboration with peers, Cooperation and team working, sharing of information) are competences to be acquired and developed within all learning pathways (formal/non formal) leading to Social Services and Senior Tourism Qualifications.

Furthermore, the creation of two new jobs/qualifications was suggested:

- Operational therapists and
- Health and Well-being Coaches.

In the geriatric field level considering the increasing number of dementia situations within senior population, the need for specialized training is more and more critical. Within healthcare and social services units, all professionals, at all levels, must be trained and prepared to deal with these particular situations and deal with the specificities of dementia people care needs.

Anwendungsbereich: Public and private employment services to provide guidance and info to youth on the 2 sector potential; employment counsellors; youth in search of training and future career or business opportunities.

Produkt 'WP4 MALTA GOOD PRACTICES'

Titel: WP4 MALTA GOOD PRACTICES

Produkttyp: andere

Marketing Text: Successful examples used in Malta to generate employment, especially for youths between 16-24 years old. By far they are not the only examples; these 'practices' have been reproduced and researched in detail to give a clear picture of how the 'schemes' operate.

Beschreibung: The good practices were discussed in detail in the Focus Group conduct by ITS (SALM Focus Group – November 2013) where a number of stakeholders coming from different social fields: educators, tourism, the National employment agency (ETC), the Ministry for Tourism, the Malta Tourism Authority (MTA), public policy makers, psychologist working with youths and college councillor

Zielgruppe: Youth 16-24; employment counsellors; public employment services

Resultat: A social tourism initiative targeting Maltese citizens is considered to be feasible by all stakeholders. Looking at the different target groups, it can be seen that there are indeed persons who do not have the required financial capability to go on holiday. The disability pension stands well below the minimum wage in Malta, making disabled persons some of the poorest in Malta (especially if they live on their own). Most families with three or more children and senior citizens aged 65 and over cannot pay for an annual holiday of one week abroad. However, all the four target groups would be interested in participating in holiday activities, if they had the possibility.

Anwendungsbereich: Services; tourism; social policy.

Produkt 'WP4 RONSEL SYNTHESIS REPORT'

Titel: WP4 RONSEL SYNTHESIS REPORT

Produkttyp: andere

Marketing Text: Good practices identified by RONSEL Fundacion are relevant to the youth employment and entrepreneurship issues.

Beschreibung: Daily life of the family and home are currently high levels of self-provisioning activities such as the dependent care (the elderly), cleaning and care of the home and clothes shopping daily, home repair, relocation of the children to school, their vigilance and attention during lunchtime or during working hours if they are very small. These activities "naturally" the developed any member of the feminine sex-usually extended family, are being transferred to "providers" by external changes in the role of women in family and work and the modification of the traditional family. Currently, there is a high unmet demand for jobs related to the daily lives of families and an outstanding level of dissatisfaction with how they are resolved in the present. Other services of everyday life That will bring up new occupations are helping youth with difficulties In their education or risk of social exclusion and all mediation services and advice in the resolution of family, school, work Conflicts, justice or administration.

Zielgruppe: Youth 15-24; employment counsellors; social services providers

Resultat: Jobs and skills needed in social services; entrepreneurship to raise youth integration.

Anwendungsbereich: Public employment services; job counsellors; education; new skills.
