

Traffic accidents are the second leading cause of deaths globally among 5 - 29 year-olds and the third leading cause of deaths among 30 - 44 year-olds. Road crashes kill 1.2 million people every year and injure or disable as many as 50 million more.

SafetyTraffic.eu aims to develop the skills of traffic instructors and exchange their experiences in teaching various learner groups about safe and responsible conduct in traffic. The Wiki offers free materials, including expert articles and specific teaching assignments, that can be adapted and used in any teaching situation. The materials are grouped in four sections according to the age of the students: pre-school children, school children, teenagers and young adults. All student groups require different kinds of approaches and tools for teaching and SafetyTraffic.eu aims to provide these tools to everyone.

Join now to develop your skills as a traffic instructor and share your own teaching methods and tricks with colleagues around the world!

SafetyTraffic.eu

Wiki for the Development of Professional Skills of Traffic Instructors

The Wiki is free to use and contains expert articles about the learning of different age groups and the challenges that, for example, children face in traffic. The Wiki also contains concrete curricula and training tools that can be used to teach different traffic safety topics to children, teenagers and young adults.
