Projektinformationen

Titel: I-EDUCATE (Ich-ERZIEHEN Sie)

Projektnummer: UK/09/LLP-LdV/TOI-163_254

Jahr: 2009

Projekttyp: Innovationstransfer

Status: abgeschlossen

Land: UK-Vereinigtes Königreich

Marketing Text: ERZIEHUNG DER ERZIEHER Helfen, Technologiesperren in den Erziehern zu überwinden und Verbessern der Fähigkeit, auf das `connected Erzeugung einzuwirken.

Zusammenfassung: The purpose of the project was to educate vocational teachers in technologies and innovations for learning and prepare them to get better connected with a new generation of learners.

The project offered teachers across Europe and the UK the opportunity to get free training and experience in developing e-learning through a virtual teacher training island, live training courses and workshops, an e-learning course and website.

This ambitious project was backed by a partnership of organisations across Europe including Sweden, Germany, Hungary and Bulgaria and led by a UK Coventry based e-Learning Studios (a division of Research House UK Ltd).

Beschreibung: The i-Educate project transferred learning technology innovations developed in European and other projects which were originally developed for and with learners to VETPROS across Europe through experiential approaches including an e-learning course on Learning Technologies with accompanying handbook, a virtual teacher training island in Second Life with virtual workshops and resources, a resource Website and 'live' training courses. There was a reciprocal arrangement whereby VETPROS in receipt of training/support were encouraged to provide ideas on how they have implemented technologies in their learning for use by others, thus forming a continuous cycle of exchange and transfer across Europe. The partnership was made of up 6 partners from the UK (x2), Sweden, Bulgaria, Hungary, Germany, with a wide range of complementary skills and expertise including expertise on technologies for learning/e-learning, access to vast numbers of VETPROS across Europe, research and evaluation and experience and contacts to facilitate an effective dissemination/valorisation process.

The project increased the numbers of VETPROS in Europe using technologies in their teaching practice, contributing to actions described in the Lisbon Agenda to support its actions in the areas of making Europe the most competitive and dynamic knowledge based economy in the world and making Europe's education and training systems a world reference.

Produkt 'Project Website'

Titel: Project Website

Produkttyp: Homepage

Marketing Text: Share and consume documents, audio, video, events, news about the application of technology to assist teaching and training

Beschreibung: A website which provides useful resources, news, events, information, tools and opportunities in relation to technologies for learning between VETPROs and project partners. It supports rich media, allowing visitors to view video, listen to and download audio, and to ask for help and advice. We also implemented Google Translate and an easy way to operate this across the whole website.

Zielgruppe: VET professionals, Networks, Associations

Resultat: 5
Website

Anwendungsbereich: Used by VETPROs, VETPRO associations, Partners to share and consume documents, audio, video, events, news about the application of technology to assist teaching and training

Produkt 'iEducate Virtual Training Island in Second life'

Titel: iEducate Virtual Training Island in Second life

Produkttyp: Homepage

Marketing Text: A virtual training island in Second Life for VETPROs and partners to interact, deliver training, share/consume resources, and try developing their own virtual objects and buildings.

Beschreibung: A virtual teacher training island that can be accessed by any European VETPRO or policy person to obtain training and undertake workshops in the uses of Second life, learning technologies and technologies for use around our project themes.
The island was developed with 9 areas for VETPROs to use, including some flexible areas that can change, such as one area which was used as a giant advent calender during Christmas 2010 providing cultural and technology information to visitors.
Many resources were available for VETPROs to download, and other resources added regularly.
We delivered a range of presentations and tours on the virtaul training island. These presentations often incorporated voice, presentation slides, and video.
Avatars have interacted with and downloaded the large range of data partners have placed on the island including; pictures, text information, building and learning tools, presentations, audio & video. Numbers for these downloads spread across all data sources are in the thousands. One of the most popular destinations on the island (by visitor minutes) is the Museum of Europe area which has hosted several different exhibitions from a Winter wonderland with facts about the Christmas period in different European countries to a virtual DNA strand representing the people and countries of Europe. This innovative structure contains pictures of many World Heritage sites to be found in Europe. The Sandbox/Chill Out area and the conference zones are the second and third most popular areas.

Produkt 'Course Handbook on 'Learning Technologies''

Titel: Course Handbook on 'Learning Technologies'

Produkttyp: Lehrmaterial

Marketing Text: A handbook on Learning Technologies for use by VETPROs across Europe

Beschreibung: A handbook on Learning Technologies for use by VETPROs across Europe. Content was gathered from partners, drawing on transfers, and updated to ensure accuracy and relevance. A comprehensive version is available in English, which also combines the main content with the four themes of the project. The main content is also available in Swedish.

Zielgruppe: VETPROs engaged in all forms of training

Resultat: 3

A printed and bound handbook, and also available as a PDF to download from the project website and sent by email to VETPROs

Anwendungsbereich: Used by VETPROs to discover technologies to assist in their teaching. The handbook also includes lesson plans to assist this.

Homepage: www.ieducate.eu

Produktsprachen: Englisch
Schwedisch

Produkt 'Training Course on Technologies for Learning'

Titel: Training Course on Technologies for Learning

Produkttyp: Module

Marketing Text: A training course covering a range of learning technologies, often tailored to a specific sector(s).

Beschreibung: A training course covering a range of learning technologies, often tailored to a specific sector(s). Used in combination with the Handbook (Result 3).

Zielgruppe: All sectors, but with specific sessions targeting the project's themes.

Resultat: 4

A Training Course, delivered through a series of sessions across Europe

Anwendungsbereich: Partners delivered these sessions to a cross section of VETPROs across Europe.

Homepage: www.ieducate.eu

Produktsprachen: Englisch

Produkt 'Certified e-Learning course on Technologies for Learning'

Titel: Certified e-Learning course on Technologies for Learning

Produkttyp: Fernlehre

Marketing Text: An e-Learning course to educate VET Professionals and Teachers to create effective e-Learning that is pedagogically sound.

Beschreibung: An course on creating high quality, engaging e-Learning. It was delivered via webinars, e-Learning modules, a social learner network, and individual study by participants.

The aims and objectives of the Course are:

To provide an introduction to a range of different approaches to e-Learning

To provide guidance, resources and opportunities for practice to vocational teachers and trainers in creating and delivering a range of different types of e-Learning

To understand and apply pedagogically sound principles to e-Learning design

To be able to construct and conduct a needs analysis and understand key principles in inclusivity in e-Learning design

To gain basic instructional design skills in order to be able to create well structured, interactive and engaging e-Learning solutions

To understand and apply to principles of good practice to e-Learning solutions.

Zielgruppe: VETPROs

Resultat: 5

An e-Learning course, which during the project was supported by webinars and a social learning network.

Anwendungsbereich: Delivered to a group of VETPROs from across Europe, but with the majority coming from the UK as a UK accreditation was attached to it.

Homepage: <http://ieducate.eu/aelearning.php#menuDiv>

Produktsprachen: Englisch

Produkt 'PDF Publication on technology for the project's four themes.'

Titel: PDF Publication on technology for the project's four themes.

Produkttyp: andere

Marketing Text: A series of documents which overview the specific learning technologies of particular use for the projects four thematic areas

Beschreibung: A series of four different documents (in difference languages, so seven documents in all) which overview the specific learning technologies of particular use for the projects four thematic areas, and examples of how VETPROs can use them. They are all available in English, and three of them are available in the relative partner language that produced them.

Zielgruppe: VETPROs, Community organisations, Disability organisations, decision makers, Museums, Archives, Heritage

Resultat: 8
PDF Publications

Anwendungsbereich: The production of these publications helped us to structure the project to address certain themes, and also to deliver tailored workshops for these themes. As the information produced was so good we then decided to integrate into the final Course Handbook (Result 3) to create an even more comprehensive document of 152 pages!

The Media, Language and Communication theme publication contains the basic technologies that could be used in vocational education and the basic steps of launching an internet radio.

The ICT & Disabilities theme publication is a guide for all VETPROs who work with people with different disabilities, explaining what the barriers for the people with different disabilities, what are the approaches and tools can be used to overcome them.

The handbook on Culture & Heritage is essential for delivering any future course in this area, as this area often doesn't incorporate a lot of technology in their teaching.

The Enterprise & Entrepreneurship theme document introduces various technologies and techniques to help teach enterprise.

Produkt 'Press Pack'

Titel: Press Pack

Produkttyp: andere

Marketing Text: Press pack for the iEducate project

Beschreibung: The press pack gives details of the project for any potential press contacts to use. There is an overview of the project, the partners and the themes that are used throughout the project. To support the press pack specific press releases were issued to promote specific events.

Zielgruppe: Partner and media

Resultat: 10
PDF in English and German

Anwendungsbereich: By partners, media and other interested parties to find out more about the project.

Homepage:

Produktsprachen: Englisch
Deutsch

Produkt 'iEducate Conference'

Titel: iEducate Conference

Produkttyp: Film

Marketing Text: Video of the iEducate project's Final Conference

Beschreibung: The iEducate team gave an informative insight into fascinating new technologies and demonstrated how technology can assist vocational education and training professionals across Europe to bridge the technology gap with learners.

In diverse workshops and plenary sessions attendees experienced Virtual Worlds for education, Media to enhance learning, Social Learning, ICT for people with Disabilities and technologies for Culture & Heritage, Enterprise, Emerging Technologies and more...

This final conference in the UK was supported by a smaller event in Brussels in July where some of the themes were presented and the whole event streamed online.

Zielgruppe: VETPROs, Policy Makers,

Resultat: 14
A film made of the iEducate final conference

Anwendungsbereich: The Final Conference was an excellent way to draw the project together and present all of the different aspects of the project together, in one space. All four themes were covered, the Handbook was presented to VETPROs, new methods of engaging learners, such as social learning networks, were also included, and VETPROs gave their input to the future of learning technologies through feedback cards and a final plenary discussion.

Homepage:

Produktsprachen: Englisch

Produkt 'Radio Programmes about e-Learning'

Titel: Radio Programmes about e-Learning

Produkttyp: Audiokassetten/Videokassetten

Marketing Text: A series of radio programmes on Learning Technologies, in Hungarian

Beschreibung: A series of programmes were created by Civil Radio, the Hungarian partner using the ideas and materials generated by the project. These were broadcast on Civil Radio in Budapest. In addition to this the technologies highlighted in the project were presented by Future 21 Century Foundation on radio in Bulgaria. Some of the items that were discussed during this series were then presented by our Bulgarian partner on radio in Bulgaria. The podcasts are all hosted on the Web 2.0 site. When in Budapest, Hungary for a partner meeting and workshops several partners produced a live radio programme incorporating technologies with culture. Video of the recording was also streamed to the web and partners engaged with listeners via social media.

Zielgruppe: VETPROs, policy makers, companies and learners

Resultat: 16
Four MP3s of radio programmes.

Anwendungsbereich: Civil Radio broadcasts across Budapest to a wide cross section of people, including VETPROs and policy makers. It works closely with NGOs and professional organisations and is well regarded for its factual output. Radio is one of the best methods to engage with people, and provided an excellent way for us to reach people that may not have engaged with other areas of the project initially, such as the Second Life island or website. The radio was also a good tool to introduce and popularize the new media technologies and platforms that are able to enhance learning – and of course it was a good element to promote the whole project.

Datum 07.09.2010

Beschreibung A main workshop for Bulgarian VETPROs on learning technologies. This session was practical, with the VETPROs getting a chance to create an avatar and experience the virtual island, and produce other work such as a Web Quest. This was supported by a second event, for a larger group, where the project was presented then various learning technologies were demonstrated.

Project Kick-Off Meeting and main-streaming event

Datum 01.12.2009

Beschreibung An initial project meeting and dissemination event were held in Coventry, UK in December 2009. Project plans were drawn up and an event held for 30 VETPROs, policy people and other interested parties to present project plans and gather feedback.

For the launch we invited a mix of training companies, vocational education providers, SME's working in technologies exploited by the project, and policy makers. This gave us the chance to present the project and it's aims to them and to then gather feedback from the attendees. The partners met all attendees and could question them on their involvement of the UK VET sector. We received very useful feedback from the attendees, which we then brought into the project.

Zielgruppe training companies, vocational education providers, SME's working in technologies, policy makers
