

## Pilot Study Report on [www.bmtcare.com](http://www.bmtcare.com)

### Interactive Training Portal for Pediatric Bone Marrow Transplantation Nurses Project

#### Prague, CZ

This pilot study report on [www.bmtcare.com](http://www.bmtcare.com) interactive training portal for BMT nurses aims to conclude the feedback received via trainee satisfaction survey applied after the pilot studies in Turkey and interviews during the study sessions in a way to propose main strengths, weaknesses and benefits of the bmtcare web portal as well as mentioning expectations and possible improvements suggested by the target groups.

The pilot study in the Czech Republic was conducted in the only pediatric transplant unit in the country – in University Hospital Motol, Prague. Only brief information was provided to participants as they are already informed about this elearning programme and activities. Information on the demographics of the participants in line was provided in **Part A: Personal Information of the Trainee Satisfaction Survey** (consisted of items of gender, age, education, institution, job title, experience, previous trainings). Following the introductory information, a summary of feedbacks will be provided on the basis of questions in the **Part B: Participants' Feedback of the Trainee Satisfaction Survey**.

University Hospital Motol is the biggest and the main university referral hospital in Czech Republic for childhood diseases including malignant and non-malignant diseases. Pediatric BMT unit is a part of Department of Pediatric Hematology and Oncology, has 10 patient hepa-filtered rooms. Approximately 450 children underwent allogeneic HSCT and further 120 autologous HSCT since the start of a programme in 1989. In the Unit and yearly 35 patients undergo HSCT. About 65% of the patients have received HSCT for diagnosis of a malignant disease and the rest consists of non-malignant diseases. The list of participants and photos from the pilot studies are attached to this report.
