

elearning environment for disable learners

2009-1-PL1-LEO05-05028

<http://www.adam-europe.eu/adam/project/view.htm?prj=5431>

Projektinformationen

Titel: elearning environment for disable learners

Projektnummer: 2009-1-PL1-LEO05-05028

Jahr: 2009

Projekttyp: Innovationstransfer

Status: abgeschlossen

Land: PL-Polen

Marketing Text: Im Projekt eFESTO wurde ein innovatives Umfeld für gehörlose Studenten gestaltet, das es ihnen ermöglichen soll, mittels e-learning vielfältige Informationen zu akquirieren. Grundlage dafür war eine Analyse der Erfordernisse gehörloser Studenten, die auch sprachliche Schwierigkeiten haben und sich daher mit erheblichen Problemen bei der Informationsbeschaffung und -verarbeitung konfrontiert sehen. eFESTO entwickelt ein spezifisches didaktisches System und eine Methodik basierend auf Fernunterrichtstechnologien und stellt sowohl theoretische Inhalte als auch praktische Übungen zur Verfügung. Es zielt speziell darauf ab, Lern- und Sprachschwierigkeiten gehörloser Studenten zu überwinden und die soziale und berufliche Einbindung derselben zu fördern.

Zusammenfassung: Some specific analysis in Poland highlighted that the highest number of people with disabilities is employed in agriculture, hunting and forestry as well as in manufacturing (respectively 30% and 19% of all employed people with disabilities). The main reason that justifies this situation is due to low levels of education and inadequate vocational qualifications. In that case created e-learning platform in eFESTO project broke a barrier inside the deaf people world. On e-learning platform prepared in the project specific Learning Objects (courses) were put inside in the different levels of knowledge. Moreover direct and indirect aims of the eFESTO project were achieved by transferring and adapting existing e-learning platform and training modules from previous projects which were implemented in Italy (projects previously funded by the Ministry of Education in Italy); other achieved goal of the project was the creation of the distance learning environment, in order to help deaf people acquire skills and competencies to perform the work desired to the market roles and occupations; eFESTO project focused on LA.DI.RE and PSELDA projects which have been transferred to the environment of polish deaf people conditions; in fact it was additional development of a new didactic methodology specified for deaf learners and workers based on interactions, video of National and International Sign Languages and based on dynamic subtitles; it was the adaptation of theoretical courses, and the development on new one, regarding the specific needs of deaf learners and workers; adaptation of already existed practical course and developed specific components to it for deaf workers; via a dedicated eFESTO e-learning platform, project unlocked another doors for deaf people, tried to understand their situation and helped in communication.

Beschreibung: eFESTO project was oriented in particular to satisfy the needs of deaf and hardhearing learners and workers in Poland. In fact specific analysis in Poland highlighted that the highest number of people with disabilities are employed in big supermarkets, agriculture, hunting and forestry as well as in manufacturing. The main reason that justifies this situation is due to low levels of education and inadequate vocational qualifications.

Produktinformation: - MAIN PRODUCT:e-learning eFESTO platform,where Learning Objects are put for different levels of knowledge; there are courses of Maths, Physics, English language, and Computer Science + laboratory experiment prepared only for polish deaf workers.
 Other products of the project:
 - General Web Portal;It was web portal prepared in eFESTO project. Web portal informed Consortium Partners as well as interested parties (European Commission, National Agency/ies, stakeholders, institutions, federations,social parties, schools for the deaf students, others) about the project progress.
 -Theoretical Updating Courses is the description of the Theoretical Learning Objects which were prepared in different levels: from primary, intermediate, secondary level of deaf learners and for deaf workers. The deliverable describes the concrete learning objects prepared in eFESTO project: English contents (prepared for primary, intermediate,secondary level of deaf learners and for workers in Polish, Italian and Hungarian Sign Languages + International Signs-for workers only in Polish Sign Language and International Signs), Mathematic contents (prepared for primary, intermediate,secondary level of deaf learners in Polish and Italian Sign Languages), Physics contents (prepared for intermediate and secondary level of deaf learners in Polish and Italian Sign Languages) and Computer Science contents prepared only for deaf workers in Polish Sign Language. Bulgarian partner have been modified learning objects according to the Bulgarian National Requirement for the Didactic Content and needs of children from Special School for Children with Damaged Hearing in Sofia. Partner have been developed and designed new Learning Objects entirely for primary level of deaf learners which refer to:MATHEMATICS, MAN AND NATURE, MAN AND SOCIETY, BULGARIAN LANGUAGE AND LITERATURE. Theroretical updating courses is the deliverable which describe what was prepared in the theoretical meaning;
 - Practical Updating Courses; the description of the Practical Learning Objects which are Theoretical Learning Objects which goes with the videos of the particular Sign Languages (Polish, Italian, Bulgarian and Hungarian Sign Languages) and text synchronisation;
 -Installation Manual;this booklet describes the software for the laboratory server which is used for connecting an external laboratory to the eFESTO system;
 - User Manual;this manual booklet concerns the procedure to access the eFESTO learning system and environment. In detail, this booklet, translated to all partners' languages, is a very short and simple manual for the users reporting the actions to execute in order to use the services of the developed environment;
 -Quality of System Method Questionnaire;this special created questionnaire was distributed to users (participants of the testing phase in Poland and Italy) after the experimental phase;
 -Quality of System Estimation Statistic Report;this document describes statistic representation for answers given by deaf learners (testing made in Italy and Poland) and workers (testing made in Poland) to the Quality of System Method Questionnaires which were distributed after each pilot actions which took place in Poland and Italy;
 -Workshop documentation:this documentation are minutes (short reports) which was prepared by each partner and shows the different workshops on which consortium partner was engaged or personally organised during the different phases of the

Projektinformationen

- project (in the 2 years of the project);
- Scientific papers;during the whole project progress, scientific papers were used as dissemination materials used in local/international/ events, conferences. Scientific papers showed the approach of using e-learning as a tool which helps deaf learners and workers function in the real world;
 - Final Documentation;this is the documentation with all deliverables prepared as an abstracts + appendix with the tasks and deliverables achieved during the whole project progress;
 - Meeting Documentation;this is the documentation (short reports) which was prepared by each partner and shows the different meeting on which consortium partner was engaged or personally organised during the different phases of the project - including consortium meetings and skype conferences with partners;
 - User Needs Analysis Document;it is a document describing social studies methodologies; it is a data collection and analysis report.
 - State of the Art document; it is a social studies research methodologies, qualitative and statistical analysis;
 - Design Document of Didactic Methodology;this is the document, which describes the didactic contents proposed in the eFESTO project which are related to scientific subjects, English and laboratory activities. This is an educational and Instructional learning design document;
 - eFESTO Environment Design Document;this is the deliverable which describes the eFESTO environment where the methodology is already put;this report indicates ICT designing and methodologies;
 - Graphical Interface Design Document;this is the document shows usability, accesibility and special pedagogy used in eFESTO project system;
 - System Pilot Run; testing activity of the e-learning platform, was a pilot action and moreover short report prepared after the whole pilot action done in Poland, Italy and additionally in Bulgaria. This short report from the platform testing in Poland, Italy and Bulgaria describes how pilot actions were organized in each country, timming, participants, and furthermore the document includes suggestions for enhancement of the eFESTO platform made by deaf users after pilot actions
 - Test Document; deliverable focused on graphical design of the interface of practical activities to manage remote or local apparatus;
 - Dissemination Plan; plan for the dissemination of the objectives and of the results of the eFESTO Project;
 - Exploitation Plan; deliverable which provides the exploitation plan performed by the Consortium in the framework of the eFESTO project. It summarises the final project results and the exploitation strategy both at Consortium and partners level, and shows the market potential for project result. The document contains the market study (carried out under the same task) and gives updates and extends the state of art analysis of other European initiatives, providing further details and refinements taking into account the results achieved within the project;
 - Quality Management Plan;managerial plan, which describes the partners' roles in eFESTO project, communication and managerial aspects to be used in the whole project duration, main consortium meetings to be held (plus additional ones, which can be organised) and PMC-Project Management Committee, which are representatives from the coordinator part as well as WP Leaders and Dissemination Leader;
 - Progress Reports (4) and Technical and Financial reports (4) which was internal reportshowed the situation in the project, tasks and deliverables achieved, dissemination activities done by partners, financial issues needed to be respected by partners;
 - Quality Management Final report;internal managerial plan, which describes the partners' roles in eFESTO project, tasks in work package 7 and 8 achieved under the project management activities, communication and managerial aspects used in the whole project duration, all consortium meetings held with the technical one,PMC-Project Management Committee, which are representatives from the coordinator part as well as WP Leaders and Dissemination Leader and description of the internal monitoring used in the whole project duration with the feedbacks came from the evaluation survey prepared by coordinator and sent to consortium partners,

Projektinformationen

regarding:

1) Technical and administrative issues

2) Substantive and financial issues;

-Dissemination materials; materials prepared under the eFESTO project to be disseminated in a wide range of dissemination activities, like: local/international events, workshops, meetings with users, stakeholders, and during any other dissemination campaigns organised by partners or other parties.

Produkt 'D.1-General Web Portal - eFESTO'

Titel: D.1-General Web Portal - eFESTO

Produkttyp: Homepage

Marketing Text: The eFESTO general objective was to deliver learning services for deaf learners to acquire modern competences as required by the actual market jobs and roles. Moreover the aim was the inclusion and employment of deaf citizens in specific job sectors and fields and regarding this aim the e-learning environment was created for deaf learners to deliver learning services to empower requested and marketable competencies. The e-learning platform created can be easily used by learners with language and physical disabilities.

Beschreibung: eFESTO web portal informed Consortium Partners as well as interested parties (European Commission, National Agency/ies, stakeholders, institutions, federations, social parties, schools for the deaf students, others) about the project progress. General eFESTO web portals have been created in EN, PL and IT versions, however basic information about the project are also available in Hungarian and Bulgarian languages. On the eFESTO web portal there is an access to the virtual lab where the platform were created.

Zielgruppe: Social partners, VET institutions, deaf adults: workers and unemployed, deaf students, deaf students who search for a work, universities also their teachers, mentors, trainers, employers, individuals, potential clients, project partners, National Agencies.

Resultat: It was a web portal which was the tool for consortium partners to gather more interested parties and target sectors in the field of deafness.

Anwendungsbereich: Web portal is also a tool, where Learning Materials created during the project progress are available (there is an access to eFESTO e-learning platform via eFESTO web portal). Web portal is a perfect tool to search information regarding the project, consortium, to build new contacts and find new perspectives for the next project applications in common field.

Produkt 'D.12-User Needs Analysis Document'

Titel: D.12-User Needs Analysis Document

Produkttyp: Lehrmaterial

Marketing Text: In eFESTO project the first particular aim was to specify the needs of the deaf people on each partner country; this report was produced in the framework of WP1, based on documents submitted by partner organisations and presents: 1. specific needs of project ' target groups - young deaf workers and learners; 2. inventory of EU strategies, policies and programs. The report present an overview of all needs identified by the different user needs analysis carried out by all partners.

Beschreibung: It is a document describing social studies methodologies; it is a data collection and analysis report.

Zielgruppe: National Agencies, other interested parties in the deaf environment area, teachers, trainers, professors, individuals, project partners.

Resultat: User Needs Analysis documentation regarding Poland, Bulgarian, Hungary and Italy.

Anwendungsbereich: This report (document) can be used in the next project proposals as a report used by teachers/professors. Can be used as a good analysed study about deafness in Poland, Hungary, Italy and Bulgaria.

Produkt 'D.13-State of the Art Report'

Titel: D.13-State of the Art Report

Produkttyp: Lehrmaterial

Marketing Text: It is a social studies research methodologies, qualitative and statistical analysis.

Beschreibung: In eFESTO project the first particular aim was to specify the needs of the deaf people on each partner country and state of the art regarding the didactic methodologies and IT technologies; this report was produced in the framework of WP1, based on documents submitted by partner organisations and presents: 1. implementation context needed for a transfer - institutional and legal system, labour market conditions, technological devices; 2. didactic methodologies; 3. assistive methodologies; 4. electronic technologies.

Zielgruppe: eFESTO partners, National Agencies, other interested parties in the deaf environment area.

Resultat: State of the Art Report regarding Poland, Bulgarian, Hungary and Italy.

Anwendungsbereich: This report (document) can be used in the next project proposals as a report used by teachers/professors. Can be used as a good state of the situation about deafness in Poland, Hungary, Italy and Bulgaria.

Produkt 'D.9-Scientific papers'

Titel: D.9-Scientific papers

Produkttyp: Unterlagen für offenen Unterricht

Marketing Text: Scientific papers showed regarding the whole project progress and regarding different phases of the project the innovative results of the project about the design, development and dissemination. This results was presented by partners. It was several scientific papers prepared by partners which are connected to particular events

Beschreibung: Scientific publication prepared by teachers/experts/professors, technicians, managers from the eFESTO consortium .

Zielgruppe: Deaf learners, workers, students, teachers, trainers, beneficiary of other LdV projects, other interested parties, project partners.

Resultat: Scientific publication regarding the situation of the deafness, e-learning technology, methodology of the e-learning platform used, others. Papers prepared in every partners' language.

Anwendungsbereich: Scientific papers are useful publications which shows how the situation of deafness is showed in european countries, how are the studies on the situation, how e-learning solution can help in the world of deaf.

D.9.zip

<http://www.adam-europe.eu/prj/5431/prd/4/1/D.9.zip>

Produkt 'D.14-Design Document of Didactic Methodology'

Titel: D.14-Design Document of Didactic Methodology

Produkttyp: Lehrmaterial

Marketing Text: This deliverable describes the strategy of the methodology design in the eFESTO project, the prior aim of the project. Regarding the contents centered on scientific subjects and English, a new didactic methodology has been devised tailored to their end-users specific learning needs and basically based on the combination of sign language and writing. Each subject content is translated in the national language of each partner country and is accompanied also by an optional video translation in international sign language. The aim of this facility is to give the deaf an occasion to know the development of the international signs, originating from reference to signs in BSL (British Sign Language) and ASL (American Sign Language).

Beschreibung: This is the document, which describes the didactic contents proposed in the eFESTO project which are related to scientific subjects, English and laboratory activities.

Zielgruppe: Teachers, professors, trainers, deaf learners, workers, Foundations, Institutions, individuals, National Agency, other interested parties also in relation to other initiatives

Resultat: This is an educational and Instructional learning design document. This deliverable is produced in EN, however abstracts in PL, IT, BG and HU.

Anwendungsbereich: This deliverable can be used as a material of other initiatives preparation in the meaning of methodology usage. This document perfectly described the methodology developed in the eFESTO project, which can be transferred to other countries/other sectors.

Produkt 'D.26-Dissemination Materials'

Titel: D.26-Dissemination Materials

Produkttyp: Verbreitungsmethoden

Marketing Text: D.26-materials which was prepared by disseminating eFESTO project among users/stakeholders/other interested parties/professors/experts, etc.

Beschreibung: those dissemination materials are: folder, brochure, business card, CD label, CD booklet, poster (which is creating exclusively for conferences), newsletters, articles in newspapers (polish newspaper "Silent World" -wiat ciszy, "Echo of the city" - Echo Miasta, "Whats up" - Co sycha), template of the PPT presentation

Zielgruppe: National Agency, associations, Universities, institutional partners/actors, users, stakeholders, professors, experts in deafness, companies, others.

Resultat: eFESTO dissemination materials used in many wide-range dissemination activities

Anwendungsbereich: Dissemination materials were used in many different aspects in the project: dissemination actions, valorisation, exploitation phase. Available in EN, however some materials means also presentations, posters, brochures, prepared in partners' languages.

Produkt 'D.2-Theoretical Updating Courses'

Titel: D.2-Theoretical Updating Courses

Produkttyp: Module

Marketing Text: Description of the Theoretical Learning Objects which were prepared in different levels regarding deaf learners and workers level of knowledge. Bulgarian partner have been modified learning objects according to the Bulgarian National Requirement for the Didactic Content and needs of children from Special School for Children with Damaged Hearing in Sofia.

Beschreibung: "Theoretical updating courses" is the deliverable which describes the concrete learning objects prepared in eFESTO project: English contents (prepared for primary, intermediate, secondary level of deaf learners and for workers in Polish, Italian and Hungarian Sign Languages + International Signs-for workers only in Polish Sign Language and International Signs), Mathematic contents (prepared for primary, intermediate, secondary level of deaf learners in Polish and Italian Sign Languages), Physics contents (prepared for intermediate and secondary level of deaf learners in Polish and Italian Sign Languages) and Computer Science contents prepared only for deaf workers in Polish Sign Language. Bulgarian partner have been modified learning objects according to the Bulgarian National Requirement for the Didactic Content and needs of children from Special School for Children with Damaged Hearing in Sofia.

Zielgruppe: deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), social partners, VET institutions.

Resultat: "Theoretical updating courses" is the deliverable which describes all theoretical contents of the eFESTO platform which have been created after the methodology description and graphical and technical aspects of the project. The main pedagogical aspect and aim of the project was achieved, which described the transfer and adaptation (with additional creation) of the theoretical materials (pedagogical materials), which are: e-learning multimedia courses of English language for the deaf learners and workers, e-learning multimedia courses of Mathematics for deaf learners, e-learning multimedia courses of Physics for the deaf learners, e-learning multimedia courses of computer science for the deaf workers.

Anwendungsbereich: Theoretical courses shall be a base of creating new learning objects, more complex and in wider dimension. Those materials can be transferred to other countries (TOI perspective) or can be used as a base of writing new projects proposals in the dimension created to deaf people.

D.2 - THEORETICAL UPDATING COURSES.zip

<http://www.adam-europe.eu/prj/5431/prd/8/1/D.2-%20-%20THEORETICAL%20UPDATING%20COURSES.zip>

Produkt 'D.3-Practical Updating Courses'

Titel: D.3-Practical Updating Courses

Produkttyp: Module

Marketing Text: Description of the Practical Learning Objects which are Theoretical Learning Objects which goes with the videos of the particular Sign Languages (Polish, Italian, Bulgarian and Hungarian Sign Languages) and text synchronisation. Moreover, Within the scope of eFESTO project there were developed e-laboratories in relation to sampling and data acquisition particularly for the polish deaf workers. All the instruments are connected to a measurement server, which provides the experiment by Internet. Inseparable part of the e-laboratories is tutorial, a movie which allows to better understand how to perform a laboratory experiment. It is intended to be used before to begin a laboratory experiment, in order to understand how the experiment has been realized how it can be conducted by Internet. In order to make laboratories accessible for polish deaf workers it was essential to translate tutorial to Polish Sign Language and making polish subtitles.

Beschreibung: "Practical updating courses" is the deliverable which describes all practical contents of the eFESTO platform, which are whole theoretical updating courses created by partners as a text and put on the platform with the particular Sign Languages videos (Polish, Italian, Bulgarian and Hungarian Sign Languages) and text synchronisation. From the LADIRE project it was transferred a laboratory experiment which previously have not been focused on deaf learners needs. In the eFESTO project the laboratory experiment in the engineering studies level was adapted to the needs and expectations of the deaf workers in Poland.

Zielgruppe: deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), social partners, VET institutions, Foundations, individuals; professors, teachers, others.

Resultat: This is description of the Practical Learning Objects which are Theoretical Learning Objects which goes with the videos of the particular Sign Languages (Polish, Italian, Bulgarian and Hungarian Sign Languages) and text synchronisation.

Anwendungsbereich: Practical courses (visualisation of the theoretical courses) can be used for other project proposal writting, those system created can be a base of new and wider system creation, new learning objects creation and adaptation to the created e-learning platform.

D.3 - PRACTICAL UPDATING COURSES.zip

<http://www.adam-europe.eu/prj/5431/prd/9/1/D.3%20-%20PRACTICAL%20UPDATING%20COURSES.zip>

Produkt 'D.11-Meeting Documentation'

Titel: D.11-Meeting Documentation

Produkttyp: andere

Marketing Text: This documentation are minutes (short reports) which was prepared by each partner and shows the different meeting on which consortium partner was engaged or personally organised during the different phases of the project (in the 2 years of the project), which were: Consortium Meeting (4 CM); Technical meeting in Brescia, Italy, other

Beschreibung: Meeting documentation (minutes) were one of the 'tools' which were used as the dissemination activities in the whole project duration. It is a documentation based on the big events with potential users of the eFESTO platform, where was a possibility to meet teachers, professors, experts, stakeholders, where eFESTO platform were presented or any other results of the project regarding different phases of the project.

Zielgruppe: Participants of the substantial workshop, particularly deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), teachers, professors of the deafness also trainers, teachers, stakeholders, participants of the other LdV projects.

Resultat: Meeting documentation (minutes) were one of the 'tools' which were used as the dissemination activities in the whole project duration and were helpful while the Dissemination Plan report preparation regarding the whole partners activities.

Anwendungsbereich: Those minutes were very good tool while Dissemination Plan preparation, moreover was helpful in showing the dissemination actions in done on the project. Those procedure of documentation preparation from each dissemination actions should be used in each project proposal also as a monitoring report valuable for the coordinator and dissemination leader.

Minutes from the 4 Consortium Meetings as well as from the technical meeting are put on the eFESTO website.

Produkt 'D.18-Test Document'

Titel: D.18-Test Document

Produkttyp: Lehrmaterial

Marketing Text: This document shows the technical aspects of eFESTO system. Preliminary tests were performed to verify the eFESTO portal and the communication, by mean of the SOAP protocol, between the portal and the LMS. Specifically, the tests definition and execution involved strongly the innovative functionalities added to the LMS (Moodle):

- the specific educational tools designed to meet the needs of deaf learners;
- the module for remote control of measurement instrumentation.

For the tool imported from the LMS (such as chat, glossary, electronic documents) only the correctness of the link itself was tested considering these educational tools properly working and already tested.

Beschreibung: This deliverable is focused on graphical design of the interface of practical activities to manage remote or local apparatus.

Zielgruppe: teachers, trainers, professors, professionals/technicians/interested parties in the meaning of new initiatives

Resultat: This document shows the technical aspects of eFESTO system. This deliverable is focused on graphical design of the interface of practical activities to manage remote or local apparatus. Deliverable available in EN, abstracts in PL and IT.

Anwendungsbereich: This internal document shows the technical aspects of the e-learning platform created and changes which need to be done after the testing phase of the platform by end-users. This type of document can be used in other proposals writting.

D.18.pdf

<http://www.adam-europe.eu/prj/5431/prd/11/1/D.18.pdf>

Produkt 'D.19-Dissemination Plan'

Titel: D.19-Dissemination Plan

Produkttyp: andere

Marketing Text: This deliverable describes the plan for the dissemination of the objectives and of the results of the eFESTO Project.

Document is divided into two parts:

- 1) contains the description of the planned dissemination activities for the project;
- 2) contains all the performed activities conducted and completed by the consortium or by the each partner.

The plan intends to raise awareness and interest on the developed technology, methodology and solutions among the target groups such as the users, the scientific community, the Governmental Institutions, the involved industry and the general public. The major focus of the deliverable is to ensure that the projects research and outcomes are widely disseminated to the appropriate target communities, at appropriate times, via appropriate methods.

Beschreibung: This deliverable achieved the dissemination part of the project and all WP5 tasks and objectives, which were:

- elaboration of detailed dissemination plan of the results of the project (which is D.19)
- production of the dissemination materials and updating them regarding the project progress (production new one if necessary)
- web communication and updating of the website
- each partners' participation in workshops, conferences and events related to distance learning for the students with deafness or with language disabilities or physical disability in a local/international dimension

Zielgruppe: National Agency, eFESTO partners, any other interested parties

Resultat: Dissemination Plan of the project, with the dissemination strategy used in the whole project duration, dissemination actions made by whole consortium, dissemination materials prepared by dissemination leader and additionally by other partners.

Anwendungsbereich: Dissemination Plan in very important document which shows all the dissemination plans of the consortium which were used during the whole project duration. This document should be put in every projects proposals.

<http://www.adam-europe.eu/prj/5431/prd/12/1/D.19.pdf>

Produkt 'D.20-Exploitation Plan'

Titel: D.20-Exploitation Plan

Produkttyp: andere

Marketing Text: This deliverable provides the exploitation plan performed by the Consortium in the framework of the eFESTO project. It summarises the final project results and the exploitation strategy both at Consortium and partners level, and shows the market potential for project result. The document contains the market study (carried out under the same task) and gives updates and extends the state of art analysis of other European initiatives, providing further details and refinements taking into account the results achieved within the project.

Beschreibung: This deliverable achieved the exploitation part of the project and WP6 tasks and objectives, which aimed to define and implement the exploitation plan (and related activities) in order to effectively sustain eFESTO system services, results and contents after the project ending.
Achieved tasks related to WP6:
T6.1 Elaboration of the exploitation plan, which results is detailed exploitation plan developed based on the results of the project
T6.2 Exploitation of eFESTO results: creation of the wide awareness basis, a network of contacts, a wide range of pilot users.

Zielgruppe: National Agencies, eFESTO project partners, other interested parties

Resultat: This deliverable achieved the exploitation part of the project and WP6 tasks and objectives, which aimed to define and implement the exploitation plan (and related activities) in order to effectively sustain eFESTO system services, results and contents after the project ending.

Anwendungsbereich: Exploitation Plan is very important document, which shall be used by all partners while the decision of the commercialisation of the project results will be made. All consortium partners shall know their role in the project and their eventual responsibilities after the project progress. Exploitation Plan is very important report in the project.

<http://www.adam-europe.eu/prj/5431/prd/13/1/D.20.pdf>

Produkt 'D.21-Quality Management Plan'

Titel: D.21-Quality Management Plan

Produkttyp: andere

Marketing Text: Internal managerial plan, which describes the partners' roles in eFESTO project, communication and managerial aspects to be used in the whole project duration, main consortium meetings to be held (plus additional ones, which can be organised) and PMC-Project Management Committee, which are representatives from the coordinator part as well as WP Leaders and Dissemination Leader.

Beschreibung: This deliverable achieved the dissemination part of the project and all WP7 and WP8 tasks and objectives, which were:
-activities which performed the management procedures necessary to assure that the project address the goals in the specified milestones:
T7.1 Coordination and communication with partners:
(implementation of management principles which based on methodologies largely used and tested in the projects management, carrying out quality control and security procedures together with partners);
T7.2 Meetings:
(the Coordinator of the project organised the monitoring meetings of the project, which are conected with the consoritum meetings);
T7.3 Consortium meetings:
(the coordinator of the project organised and conducted the project consortium meetings);
T8.1 Quality management plan:
(the activity leaders applied the quality methods defined in the project quality plan in order to assure that the outputs fulfil the stated requirements)

Zielgruppe: eFESTO consortium partners, other interested parties

Resultat: Internal managerial plan, which describes the partners' roles in eFESTO project

Anwendungsbereich: This report is important in the project in the meaning of managerial aspects: tasks and activities division, work packages leaders, role of the coordinator in the project, communication strategy, others

Produkt 'D.24-Quality Management Final report'

Titel: D.24-Quality Management Final report

Produkttyp: andere

Marketing Text: Internal managerial plan, which describes the partners' roles in eFESTO project, tasks in work package 7 and 8 achieved under the project management activities, communication and managerial aspects used in the whole project duration, all consortium meetings held with the technical one, PMC-Project Management Committee, which are representatives from the coordinator part as well as WP Leaders and Dissemination Leader and description of the internal monitoring used in the whole project duration with the feedbacks came from the evaluation survey prepared by coordinator and sent to consortium partners, regarding:

- 1) Technical and administrative issues
- 2) Substantive and financial issues

Beschreibung: This deliverable achieved the dissemination part of the project and WP7 and WP8 tasks and objectives

Zielgruppe: eFESTO consortium partners, other interested parties

Resultat: This deliverable achieved the dissemination part of the project and WP7 and WP8 tasks and objectives

Anwendungsbereich: This report is important in the project in the meaning of managerial aspects: tasks and activities division, work packages leaders, role of the coordinator in the project, communication strategy, others. In eFESTO project coordinator prepared 2 managerial plans: the first one at the beginning of the project and the final one moreover with results of evaluation questionnaires also created by coordinator.

Produkt 'D.4-Instalation Manual'

Titel: D.4-Instalation Manual

Produkttyp: Beschreibung neuer Berufsprofile

Marketing Text: This Instalation Manual booklet describes the software for the laboratory server which is used for connecting an external laboratory to the eFESTO system. It can be used to set up new laboratories in the eFESTO project. Moreover this document specifies the installation procedures Server Side, because on the client side the learning environment does not require any specific application or software.

Beschreibung: Installation manual booklet is showing the potential user how to use the system in the technical point of view, to be more familiar with the technical contents and aspects of the eFESTO platform. It is presented: 1) system requirement (hardware and software description of requirement), 2) installation procedures, 3) configuration

Zielgruppe: deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), technical partners who would like to use the platform in another projects (regarding agreement to another call), technicians.

Resultat: Installation manual booklet

Anwendungsbereich: This instalation booklet can be used as a tool of the system understanding regarding the technical aspects of the paltform cretaed. Can be used as a manual for technicians how this e-learning platform was created and how can be used in otehr context (for examplae with other learning objects).

Produkt 'D.5-Users Manual'

Titel: D.5-Users Manual

Produkttyp: Beschreibung neuer Berufsprofile

Marketing Text: This manual booklet concerns the procedure to access the eFESTO learning system and environment. In detail, this booklet, translated to all partners' languages, is a very short and simple manual for the users reporting the actions to execute in order to use the services of the developed environment.

The activities that will be described in the following manual concerns the main steps to use the learning services delivered by eFESTO environment:

1. Login, 2. authentication phase, 3. choice of the course, 4. choice of the learning content and activities;

a. theoretical content

b. laboratory contents

c. test

In order to make the access to the platform much easier, some explicative snapshots of the different steps to follow are shown.

Beschreibung: User Manual as well as Installation Manual booklet is showing the potential user how to use the system, this time more "manual", not technical: how to get into the website and find the virtual lab, how to do the authorisation, which username and password to put to find the particular Learning Objects, how to find and choose the course. It is more guideline how to get to the eFESTO platform manually.

Zielgruppe: deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners) / Foundations, Institutions, Organizations which help deaf people, hard of hearing people and deaf-blind people, Universities and Secondary Schools with Deaf students and Hard of Hearing People, particular deaf employees, Employers who employ deaf people, Teachers / Interpreters of Polish Sign Language, Other interested parties, dealing with problems of auditory disability, Experts: professors, teachers, educators, psychologists, Special Schools for the Deaf and Hard of Hearing People.

Resultat: Manual booklet concerns the procedure to access the eFESTO learning system and environment

Anwendungsbereich: This booklet can be a manual base how this kind of e-learning platform can be used by potential users; this booklet can help understand the system from the user point of view and can help understand common deliverable in other potential project.

Produkt 'D.6-Quality of System Method Questionnaire'

Titel: D.6-Quality of System Method Questionnaire

Produkttyp: andere

Marketing Text: This questionnaire is regard the quality of the eFESTO platform in the technical aspects. This special questionnaire was distributed to users (participants of the testing phase in Poland and Italy) after the experimental phase. User, which were participated in the pilot actions organised in Poland and Italy (pilots in Poland: 23-24/05/2011, 08/06/2011, 16/09/2011, in Italy - 08/06/2011 and 06/07/2011) gave their contribution regarding the platform after the testing. The questionnaire design based on the SERVQUAL method.

Beschreibung: Quality of system method questionnaire particularly regarding the technical and funcional aspects of the eFESTO system gave a feedbacks of the usability of the platform, the needs of using the system by the deaf community and it serviceableness. Moreover it was dditional questions regarding the methodological aspects of the Learning Objects - if the level proposed of: e-learning multimedia courses of English language for the deaf learners and particularly in Poland for workers, e-learning multimedia courses of Mathematics for deaf learners, e-learning multimedia courses of Physics for the deaf learners, e-learning multimedia courses of computer science for the deaf workers was satisfactory, too low or too high for the user.

Zielgruppe: Deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), teachers, professors of the deafness

Resultat: Special questionnaire which was used during the pilot phase of the project in Poland and in Italy.

Anwendungsbereich: The form and structure of the questionnaire can be helpful in other projects realisation (in the pilot phase of the project).

Produkt 'D.7-Quality of System Estimation Statistic Report'

Titel: D.7-Quality of System Estimation Statistic Report

Produkttyp: andere

Marketing Text: This document describes statistic representation for answers given by deaf learners (testing made in Italy and Poland) and workers (testing made in Poland) to the Quality of System Method Questionnaires which were distributed after each pilot actions which took place in Poland and Italy. With a specific questionnaire distributed to users after the experimental phase, consortium partners compared the expectation of the users with their real perception.

Beschreibung: This product describes in detail all testing phases done with concrete dates and participants in Poland and Italy and described with the deep analysis all feedbacks which were given by learners of the eFESTO platform to the Quality of System Method Questionnaire questionnaire. Moreover the document consists all comments, suggestions and feedbacks regarding concrete technical and installation aspects of the platform as well as methodological ones regarding learning objects (courses) which were done by deaf learners and workers in Poland and deaf learners, workers and teachers in Italy.

Zielgruppe: eFESTO partners, National Agencies, deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), teachers, professors of the deafness.

Resultat: This product describes in detail all testing phases done with concrete dates and participants in Poland and Italy and described with the deep analysis all feedbacks which were given by learners of the eFESTO platform to the Quality of System Method Questionnaire questionnaire

Anwendungsbereich: This report could be a base how to prepare statistics report, how to analyse the questionnaires and put the data in the right forms.

Produkt 'D.8-Workshop documentation'

Titel: D.8-Workshop documentation

Produkttyp: CD-ROM

Marketing Text: This documentation are minutes (short reports) which was prepared by each partner and shows the different workshops on which consortium partner was engaged or personally organised during the different phases of the project (in the 2 years of the project), which were: internal meetings with experts, teachers, professors in the deafness environment, also pilot actions with deaf users and local, international interactive workshops which topics are connected to e-learning environment for disable people / local, international, european interactive events in the topic of LdV projects, e-learning environment, disabled -people environment.

Beschreibung: Workshops documentation (minutes) were one of the 'tools' which were used as the dissemination activities in the whole project duration. It is a documentation based on the meetings with potential users of the eFESTO platform and the real one, with teachers, professors, experts, stakeholders where eFESTO platform were presented or any other results of the project regarding different phases of the project.

Zielgruppe: National Agencies, Participants of the substantial workshop, particularly deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), teachers, professors of the deafness also trainers, teachers, stakeholders, participants of the other LdV projects.

Resultat: Documentation from wide range of dissemination actions on which eFESTO consortium partners were participated

Anwendungsbereich: This documentation was helpful while Dissemination Plan preparation; minutes showed all the actions made by partners, all external and internal meetings, skype conferences, personal meetings during which was discussion regarding eFESTO objectives, aims and deliverables as well as potentiality of using the project results after the project end. (Exploitation and Valorisation phase of the project).

Homepage: Internal result available only on CD

Produkt 'D.10-Final Documentation'

Titel: D.10-Final Documentation

Produkttyp: andere

Marketing Text: This documentation is the all deliverables presentation in abstracts put in one document

Beschreibung: This is the report, which is the final documentation of every deliverable prepared during the whole project progress. This document can be used for the dissemination of the project even after the project progress and can be a material for new call preparation (eFESTO as a transferred project) In that case this deliverable can be a material to discussion while having all deliverables written in one report.

Zielgruppe: VET institutions, SMEs specialised in the e-learning area, teachers, professors of the deafness, companies, Universities, Foundations as a potential partners in another projects initiatives.

Resultat: All deliverables prepared in the abstract version - deliverable can be easily used as an exploitation and valorisation document

Anwendungsbereich: This deliverable can be used in potential new project proposal writing as a quick look on the whole deliverables prepared in the project and as a tool of managing the deliverables in the project proposal. This document can be also used by interested parties to have a look on whole project deliverables and to assess the valency of the project.

Produkt 'D.15-eFESTO Environment Design Document'

Titel: D.15-eFESTO Environment Design Document

Produkttyp: andere

Marketing Text: This document shows the architecture of eFESTO system, that is mainly based on LADIRE and PSELDA projects, previous projects concerning distance education and distributed learning in which the researchers of the University of Sannio (P1) have been involved. However, the environment design includes extensions and improvements necessary to meet the purposes of the eFESTO system devoted to train deaf learners in the use of electrical and electronic apparatus. Knowing of deaf peoples high need for visualization, a high amount of visualization is needed to adapt the educational methodology to the needs of the deaf. By using the medium internet, many more deaf learners can be reached by the eFESTO platform than with conventional teaching methods.

Beschreibung: This deliverable describes the eFESTO environment were the methodology is already put - this report indicates ICT designing and methodologies.

Zielgruppe: Foundations, Institutions, deaf learners, students, workers, interetsed parties in the relation to LdV project proposals, individuals, others.

Resultat: Environemtn Design Document which presents the architecture of eFESTO system based also on the past 2 projects: LADIRE and PSELDA.

Anwendungsbereich: This deliverable can be used as a tool of transfer of the project to other countries/other sectors. This result is more technical one, shall be useful for technicians and experts in e-learning area.

Homepage: Internal result available only as a text file

Produktsprachen: Englisch

Produkt 'D.16-Graphical Interface Design Document'

Titel: D.16-Graphical Interface Design Document

Produkttyp: andere

Marketing Text: The deliverable describes the design of the graphical interface of the EFESTO system, as one of the main project aims achieved. It has been divided into two activities. The former aimed to define the graphical user interface of the distance learning platform. The latter aimed to define the graphical interfaces of the e-learning tools provided by the platform. The graphical user interface of the distance learning platform has been developed in a web portal separate from the Learning Management System (LMS), which hosts all the didactical content of the EFESTO system.

Beschreibung: This document shows usability, accesibility and special pedagogy used in eFESTO project system

Zielgruppe: Teachers, trainers, technicians, interetsed parties, individuals, others.

Resultat: This document shows usability, accesibility and special pedagogy used in eFESTO project system

Anwendungsbereich: The type of this document can be used in other applications, new project proposals-this document shall be vital for technicians who develop e-learning platforms and systems.

Homepage: Result available only as a text file

Produkt 'D.17-System Pilot Run'

Titel: D.17-System Pilot Run

Produkttyp: Verfahren zur Analyse und Prognose des Berufsbildungsbedarfes

Marketing Text: This deliverable is a testing activity of the e-learning platform, is a pilot action and moreover short report prepared after the whole pilot action done in Poland, Italy and additionally in Bulgaria. This short report from the platform testing in Poland, Italy and Bulgaria describes how pilot actions were organized in each country, timing, participants, and furthermore the document includes suggestions for enhancement of the eFESTO platform made by deaf users after pilot actions.

Beschreibung: System Pilot Run is a Pilot Action done in the project in Poland, Italy and Bulgaria.

Zielgruppe: Deaf adults: workers and unemployed, deaf students, deaf students who search for a work, deaf learners (primary, intermediate and secondary level of deaf learners), teachers, professors of the deafness.

Resultat: Testing phase of the eFESTO project made in Poland, Italy and Bulgaria among deaf children, student, learners and workers

Anwendungsbereich: The testing phase is used in the project as a normal procedure of test the created system among target users in the project. In eFESTO the users came from the environment represented by deaf learners and workers from Poland, Italy and Bulgaria.

Homepage: Event and short report is available as a text only

ISBIS(OGIK)2011-International Symposium on Business Information Systems. place: Szechenyi Istvan University

Datum 11.11.2011

Beschreibung The International Symposium on Business Information Systems was organized by SEFBIS, the Scientific and Educational Forum for Business Information Systems (SEFBIS, a Special Professional Community of the John von Neumann Computer Society) with the aim of providing researchers, practitioners, developers, consultants, end-users and PhD students. This Community gave an opportunity to join in a common place sharing experience and knowledge in the field of IT-supported business information systems. The ISBIS is intended to be a forum to expose and share current and future research work and innovations in this area, as well as in the relationship among them. One of the primary objectives of ISBIS is to promote and encourage the participants to present their results in the interdisciplinary research and in the development and application of technical solutions. It was poster, ppt. presentation and article presented of eFESTO project of symposium.

EFESTO Final Conference organised in Bulgaria

Datum 12.10.2011

Beschreibung The conference programme included the following presentations: "Policies for people with disabilities - the European and Bulgarian context", made by Ms. Nadejda Harizanova - senior expert with the MLSP; "Six National Programmes for assistance for people with disabilities", made by Ms. Mila Vukova - senior expert with the NAPD; "Online tool for teaching children with hearing disabilities available in Bulgaria", made by Ms. Svetoslava Sueva - specialist in speech and hearing rehabilitation, from the Southeast University "Neofit Rilski"; and, Mr. Stoyan Faldjiyski - national coordinator of eFESTO project in Bulgaria from TIME Foundation. The conference was the best occasion to gather many different environments, specially those directly connected to the deaf people. As a comprehensive product the platform (content for children, students and workers) is being developed in Poland. Bulgarian participation is measured by the development of miniplatform designed to teach deaf pupils while presenting eFESTO advantages to their families and the institutions. In the current stage of the project, the team has developed lessons on various topics: man and nature, math, shopping, jobs, weather for the primary stage of the Bulgarian educational system. Development of those lessons would have been impossible without the help and professionalism of The Sofia Secondary specialized school with kindergarten for children with hearing disabilities-Prof. Dr. Decho Denev. The conference was attended by representatives from the Bulgarian Union of Deaf, The Sofia Secondary specialized school with kindergarten for children with hearing disabilities, The Polish Embassy in Sofia, The Ministry of Education, Youth and science, The Ministry of Labour and Social Policies (MLSP), The National Agency for Social Assistance, and the National Agency for People with Disabilities (NAPD).

Zielgruppe The conference was attended by representatives from the Bulgarian Union of Deaf, The Sofia Secondary specialized school with kindergarten for children with hearing disabilities, The Polish Embassy in Sofia, The Ministry of Education, Youth and science, The Ministry of Labour and Social Policies (MLSP), The National Agency for Social Assistance, and the National Agency for People with Disabilities (NAPD). The conference was also attended by 14 media groups that reported the event in the national media.

EDEN 2011

Datum 19.06.2011

Beschreibung EDEN - the European Distance and E-Learning Network - exists to share knowledge and improve understanding for professionals in distance and elearning across the whole of Europe and beyond, and to promote policy and practice for this field of endeavour.

Zielgruppe EDEN is for all those concerned with distance and e-learning, in all sectors and phases of education and training. With more than 200 institutional members and over 1100 members in the Network of Academics and Professionals, EDEN holds annual conferences attracting more than 550 participants; holds additional conferences on research and on the schools sector every two years; has launched and supports the European Journal of Open, Distance and E-Learning (EURODL); and provides support and advice for a range of projects in the European sphere.
Like in EDEN 2010, mainly professors and teachers associations were interested in the results of the eFESTO project and how the Learning Objects will look like on the e-learning platform. It was expressed from professors that they will disseminate project itself among other interested parties. It was scientific paper prepared exclusively for the EDEN 2011 as dissemination materials.

1st EFESTO Conference organised in Bulgaria (before the last one)

Datum 18.03.2011

Beschreibung Discussion regarding existing online tools were presented and it was agreed that such technologies in the meaning of e-learning are very useful for the target group. There was a little problem with the Bulgarian Union of Deaf stating that all educational content transmitted with the sign language as method must be verified by them-the creators of the official Bulgarian sign language. Schools and researchers responded that the sign language is very dynamic and pupils cannot be forced to use the official language if they prefer to use other expressions. There was a lot of interest in the project results and the Final Conference was said to be much anticipated.

EDEN Annual Conference 2010

Datum 09.06.2010

Beschreibung EDEN - the European Distance and E-Learning Network - exists to share knowledge and improve understanding for professionals in distance and e-learning across the whole of Europe and beyond, and to promote policy and practice for this field of endeavour. Acting as the supporters of professional development of ODL and e-learning, which are acknowledged factors of modernisation, EDEN conferences have proven their potential to attract an essential pool of valuable contributions from leading practitioners and academics.

Dida Network and the University of Sannio, partner of the eFESTO project, presented a poster about the eFESTO results at the EDEN on Line conference.

Zielgruppe EDEN is for all those concerned with distance and e-learning, in all sectors and phases of education and training. With more than 200 institutional members and over 1100 members in the Network of Academics and Professionals, EDEN holds annual conferences attracting more than 550 participants; holds additional conferences on research and on the schools sector every two years; has launched and supports the European Journal of Open, Distance and E-Learning (EURODL); and provides support and advice for a range of projects in the European sphere - EDEN is the smart network for the professional community, and a professional community for smart learning.
