

TRINNODD: Transfert de l'Innovation sur le Double Diagnostic

2008-1-LU1-LEO05-00041

<http://www.adam-europe.eu/adam/project/view.htm?prj=5532>

Information sur le projet

Titre: TRINNODD: Transfert de l'Innovation sur le Double Diagnostic

Code Projet: 2008-1-LU1-LEO05-00041

Année: 2008

Type de Projet: Projets de transfert d'innovation

Statut: Accordé

Pays: LU-Luxembourg

Accroche marketing: TRINNODD est un projet européen de formation destiné aux professionnels travaillant directement auprès des personnes présentant à la fois une déficience intellectuelle et des problèmes de santé mentale. Cette problématique est identifiée sous le terme de Double Diagnostic. Le projet TRINNODD vise à mettre en place des modules de formation dans les 4 nouveaux pays partenaires, en se basant sur les conclusions du projet TRIADD (même thématique) et sur les apports des partenaires actuels.

Résumé: Après une analyse de besoins menée dans chaque pays (Espagne, Italie, Portugal, Roumanie), les partenaires ont développé des modules de formation se basant sur les conclusions et recommandations du projet TRIADD www.triadd.lu, sur les résultats de l'analyse de besoins et sur des apports scientifiques récents. Un accent particulier a été mis sur l'augmentation de la qualité de vie pour les personnes handicapées visées. Les formations se dérouleront de novembre à février dans les 4 pays partenaires. L'année 2010 sera consacrée à l'évaluation spécifique des modules et à la dissémination des résultats du projet. La Conférence Finale est prévue en septembre 2010 à Sibiu, en Roumanie. Le promoteur de ce projet est la fondation APEMH, qui travaille en partenariat avec les organisations suivantes : Ucos (RO), Sirm (IT), Cte (IT), Aeecrm (SP), Fenacerci (PT), Arfie (BE).

Description: The Trinnodd project (Transfer of Innovation on Dual Diagnosis) is a 2-year project which aims at updating the previous TRIADD product www.triadd.lu and transferring practice knowledge about issues related to DD to new target groups in Italy, Portugal, Spain and Romania. The project workplan is divided in 5 phases: Assess the needs of professionals, users and families in the 4 partner countries, develop the new training modules on the basis of TRIADD conclusions and actual partnership's input, deliver the training modules in partner countries, evaluate the training sessions and disseminate the project results within local, national and European networks.

Brochure_TRINNODD_final[1].pdf

http://www.adam-europe.eu/prj/5532/prj/Brochure_TRINNODD_final%5B1%5D.pdf

A Final Achievements Brochure was created by the consortium at the very end of the project lifetime. The aim of this brochure was to present the project aims and outcomes using the Knowledge Transfer and Exchange model (KTE) by Saini, M. and Brown, I (2010), Toronto, Canada.

CORE CURRICULUM.ppt

<http://www.adam-europe.eu/prj/5532/prj/CORE%20CURRICULUM.ppt>

The Core Curriculum gathers the topics that partners found most relevant when providing training to staff on the Dual Diagnosis issue. It was used as a reference material to deliver the second edition of the training sessions in the 4 partner countries.

The Core Curriculum was made up of 7 training topics (themes): Mental Health and Behaviour Problems, Quality of Life, Vulnerability and Resilience, Assessment, Intervention, Stress Management, Conclusions from the Sibiu Final Dissemination Conference (Sibiu Declaration). The Core Curriculum is available in Powerpoint Format.

DATABASE short and long term evaluations.xls

<http://www.adam-europe.eu/prj/5532/prj/DATABASE%20short%20and%20long%20term%20evaluations.xls>

The results of the evaluations carried out in the 4 partner countries during the two sessions were gathered in a database, so as to compare the results between the three phases of the evaluation process (before, after and long-term) and between the partner countries as well. The database is available in Excel format.

Newsletter_2010_V2.pdf

http://www.adam-europe.eu/prj/5532/prj/Newsletter_2010_V2.pdf

This Newsletter was the first one to be produced by the partnership in September 2009. It showed the aims and achievements of the project so far. It was used as a dissemination tool.

Newsletter_V4.pdf

http://www.adam-europe.eu/prj/5532/prj/Newsletter_V4.pdf

This was the second Newsletter to be produced by the partnership. It was released in April 2010 and showed the achievements of the project at that time. It was used as a dissemination tool.

PARTICIPANT BEGINNING of session evaluation form.doc

<http://www.adam-europe.eu/prj/5532/prj/PARTICIPANT%20BEGINNING%20of%20session%20evaluation%20form.doc>

A participant evaluation questionnaire was designed by the partnership in order to assess the importance of defined topics. This evaluation questionnaire was filled in by all participants before the beginning of each training session in each partner country.

PARTICIPANT END of session evaluation form.doc

<http://www.adam-europe.eu/prj/5532/prj/PARTICIPANT%20END%20of%20session%20evaluation%20form.doc>

This second participant evaluation questionnaire was designed by the partnership to find out whether the training provided had met the needs and expectations of staff. Through this questionnaire, partners wanted to be sure that they had focussed on topics that were relevant to the participants' work and that partners had provided effective information and resources.

This evaluation questionnaire was filled in by all participants at the end of each training session in each partner country.

PARTICIPANT LONG TERM evaluation form.doc

<http://www.adam-europe.eu/prj/5532/prj/PARTICIPANT%20LONG%20TERM%20evaluation%20form.doc>

This third evaluation questionnaire was designed by the partnership as well. The aim of this questionnaire was to focus on the impact of the training six months after the training session. All the participants responded to this questionnaire. The results have been gathered in the database.

POWERPOINT presentation Trinnodd Project.ppt

<http://www.adam-europe.eu/prj/5532/prj/POWERPOINT%20presentation%20Trinnodd%20Project.ppt>

This Powerpoint presentation was produced (with the LLP and Trinnodd Logo) to present the project aims and achievements in various dissemination activities during the project lifetime.

Produit 'Results from needs assessment surveys carried out in new partner countries'

Titre: Results from needs assessment surveys carried out in new partner countries

Type de Produit: Autres

Texte marketing:

Description: A survey on staff, users and families needs was carried out in Spain, Romania, Italy, Luxembourg and Portugal. A 17-item questionnaire was completed by 170 experienced staff members (educators, psychologists, social workers, nurses, ...) and 160 persons with Dual Diagnosis and their families. They were randomly selected in different settings across the 4 countries participating in the project. Staff were asked to describe the context of their work, the subjects related to DD that could have been useful to them, the principles or practices their team was following and the specific training they had received so far. Families and users were asked to express which topics should be developed by the support team to help them achieve a better quality of life. Within the settings of these four countries, the following subjects were identified as a priority for training: stress prevention, assessment of individual and family quality of life, complexity of individual vulnerability, environment (family and community), different approaches to intellectual disability, technical knowledge of Dual Diagnosis, effective communication. These conclusions (which were added to recommendations from the former project TRIADD and results drawn from recent research studies) helped partners to start developing new training modules in their respective countries.

Produit 'Training Modules (1st edition)'

Titre: Training Modules (1st edition)

Type de Produit: Modules

Texte marketing:

Description: • TRAINING MODULE IN ROMANIA

The training was organised in Sibiu, between October 3d, 2009 and February 9th, 2010. The training session lasted 30 hours and was divided in 6 sections, 2 times a week. 27 trainees attended the training: doctors, psychologists, nurses, caregivers. The trainees group was homogeneous at the beginning of the session, and then heterogeneous.

The training focused on areas of innovation: emotional (stress factors and management of stress), quality of life (carers' health and patients' health), the stigma (stigma and autostigma, the relationship between stigma and depression), technical (challenging behaviour, vulnerability, multidisciplinary approach and bio-psychosocial pattern). Trainees discussed case studies in order to optimize the training session results. Small group activities, role plays (e.g method of hat thinkers = hats of different colours to express different feelings), SWOT analysis, were carried out throughout the whole training session (innovative methodological dimension).

Psychiatrists were actively involved during the training session. It was an important element in the Transfer of Innovation since the involvement of psychiatrists was one of the key recommendations from the Triadd project.

• TRAINING MODULE IN PORTUGAL

The training modules were delivered in 5 sessions of 6 hours each, for a total of 30 hours. 14 trainees participated to the sessions. The trainees were day care centre and residential units staff members with and without higher degrees (coordinators, social workers, therapists, rehabilitation technicians, psychologists, carers, educators and assistants). The sessions were scheduled between November 7th, 2009 and January 9th, 2010.

The sessions were initially prepared to be delivered to homogeneous groups in the first three modules, the last one being a heterogeneous group.

The modules focused on the following topics (areas of innovation):

Module 1: Professionals mental health (mental well-being) considering professional and personal experience, concept of Quality of Life.

Module2: Basic knowledge on Intellectual Disability, Mental Health Disorders and Dual Diagnosis, vulnerability factors to develop MH problems, Challenging behaviour, International and National Rehabilitation Concepts.

Module 3: Multidisciplinary team intervention regarding DD, overview of mental health problems in ID, overview of intervention strategies and pharmacology.

Module 4: Emotional support strategies, stress prevention.

The methodology used was the following: preparatory reflection, theoretical presentations, role play, discussion on case studies, work in smaller groups and report back to the group in plenary. The Portuguese approach was more theoretical than the Romanian, but it kept a dynamic transmission approach.

• TRAINING MODULE IN ITALY

The modules were delivered in 4 sessions, in 2 days, for a total of 20 hours.

28 trainees took part in the sessions held in Florence and Modena. The modules were held in January 2010.

The training focused on the 4 areas of innovation: emotional (stress prevention for staff and people with disabilities, improving Quality of Life within families), technical (vulnerability of people with disabilities), environmental (different approaches to intellectual disability) and methodological (preparation work of trainees before the training session itself, interactive involvement of the trainers through a morning workshop, presentation of case studies about inclusion, the role of family and empowerment).

• TRAINING MODULE IN SPAIN

The Spanish module was held on March 22d, 23d and 24th 2010 in Reus, for a total of 20 hours. The Fundacion Villablanca helped in the course preparation. Health professionals and front line carers participated in the courses where up-to-date

Produit 'Training Modules (1st edition)'

Description: theoretical and practical information were delivered. The course focused on interactivity and study of practical cases.

The course focused on the following topics: Intellectual disability; the role of the mental healthcare professional; the relationship with the patient; basic psychopathology and early detection of symptoms; intervention in specific situations: suicide, aggressiveness, sexual behaviour; rehabilitation intervention for people with and mental illness, main approaches; social interventions in intellectual disability and mental illness; Quality of Life concept. A CD with documentation was handed out to participants as well as cases to study at home.

Produit 'Core curriculum'

Titre: Core curriculum

Type de Produit: Modules

Texte marketing:

Description: An amendment to the project was asked to the National Agency since the partnership had some budget left. It was decided that partners would carry out extra dissemination activities as well as deliver a new edition of the training courses. Partners found interesting, at that stage, to extract the common topics from the training sessions held at the beginning of 2010 and create a common core curriculum to be used in the second edition. This core curriculum was designed with the input of all partners between September and November 2010. A teleconference was organised to discuss the topics which they would use. The Core Curriculum would gather the topics that partners found most relevant when providing training to staff on the Dual Diagnosis issue. It was used as a reference material to deliver the second edition of the training sessions in the 4 partner countries. The Core Curriculum was made up of 7 training topics (themes): Mental Health and Behaviour Problems, Quality of Life, Vulnerability and Resilience, Assessment, Intervention, Stress Management, Conclusions from the Sibiu Final Dissemination Conference (Sibiu Declaration). The Core Curriculum is available in Powerpoint Format.

Produit 'Training modules (second edition)'

Titre: Training modules (second edition)

Type de Produit: Modules

Texte marketing:

Description: • TRAINING MODULE IN ITALY

The second training session was delivered in Florence (CREA Training Centre) on November 18th and 29th 2010 for a total of 21 hours.

The topics were: Dual Diagnosis, Autism Spectrum Disorders, Burnout, Family Burden, Challenging Behaviour, Vulnerability, Resilience and Distress, transition and Life Events, Quality of Life. Each topic has been developed according to the TRINNODD interactive methodology.

The group of trainees was composed of 21 professionals (8 male and 13 female) coming from different regions of Italy (Emilia Romagna, Toscana, Lazio, Puglia). All the trainees were frontline staff (social educators, social services educators, social health educators, social service technician, psychologists, nurses) working in day care centres or residential units. A high level of attendance and interaction was noted during this session.

• TRAINING MODULE IN PORTUGAL

Portugal managed to carry out 2 training modules editions within the 3 months additional project timeframe.

The first edition was held in Leiria on the 16th, 23d and 25th October 2010, for a total of 21 hours. The second training session was delivered in Lisbon on the 6th, 13th and 15th November 2010, for a total of 21 hours. The main topics covered were: Basic knowledge on Dual Diagnosis, Mental Health (professional and personal experience), Multidisciplinary team interventions, Emotional Support Strategies. These topics were taken from the core curriculum produced by the partnership. The group of trainees was composed of 14 professionals (all female) most of them coming from Lisbon. The professions represented in the training were mainly technicians with high degree studies such as, psychologists, social service workers, therapists and social educators, working in day care centres or residential units. All participants had a high level of course attendance. In both editions the national team managed to involve a client from CERCIZIMBRA on Module 3 delivery. Teresa Rocha, explained in her own words her experience of intellectual mental health problems and the way she felt, how she overcame them and how she is feeling now.

• TRAINING MODULE IN ROMANIA

The second training module was delivered in Sibiu on the 8th and 10th December 2010, for a total of 24 hours.

The 27 participants held high degrees: psychologists, physiotherapists, speech-language pathologists, managers of services, specialized educators, social workers, coming from residential services and day care centres.

The main topics were taken from the core curriculum designed by the consortium and were the following: Stress, distress, eustress - Definition, recognition, prevention - Quality of life, quality of life assessment at people with intellectual disabilities - Mental health problems, behavioral disorders in people with intellectual disabilities - Vulnerability and resilience in people with intellectual disabilities.

• TRAINING MODULE IN SPAIN

The second training module was delivered in Reus on 4th, 8th, 11th, 15th and 18th November 2010, for a total of 20 hours.

The 15 participants were all auxiliary care givers (frontline staff).

The main topics were, like in the other partner countries, taken from the core curriculum: Mental Health and Behaviour Problems, Mental Health (multidisciplinary

Produit 'Training modules (second edition)'

Description: teams), Vulnerability, Quality of Life and Stress management.

The methods used were the following: theoretical presentations, discussions on cases, explanatory videos, practical examples, role plays, work in small groups, presentation of the Core Curriculum slides.

Produit 'Evaluation Form (before the training session)'

Titre: Evaluation Form (before the training session)

Type de Produit: Méthodes d'évaluation

Texte marketing:

Description: A participant evaluation questionnaire was designed by the partnership in order to assess the importance of defined topics. Participants were asked to rate the importance of those topics on a scale from 1 to 6.

The aim of this task was mainly to define which topics are the most important for staff when they work with people with disabilities and to draw a comparison with the evaluation questionnaire filled in by the same participants at the end of the training (as to whether the training met their needs).

This evaluation questionnaire was filled in by all participants before the beginning of each training session in each partner country.

Produit 'Database'

Titre: Database

Type de Produit: Méthodes d'évaluation

Texte marketing:

Description: The results of the evaluations carried out in the 4 partner countries during the two sessions were gathered in a database, so as to compare the results between the three phases of the evaluation process (before, after and long-term) and between the partner countries as well. Trainees were asked to fill a short term questionnaire (15 item) before and after the course, a satisfaction questionnaire (9 item) after the course, and a long term questionnaire (11 open questions). Trainers were asked to fill only a short term questionnaire (5 item) after the course to be included in each partner' internal evaluation form.

All the participants (around 85) compiled the pre-course form. 85 after-course forms were sent back to SIRM to be included in a database for statistical analysis.

The presence of scores differences between groups (before and after the course, gender, profession, etc) was evaluated through the application of the following statistical tests: Student's T and Anova post-hoc.

Some main differences were also controlled through analysis of variance for non parametric data (Kruskal Wallis Test). To verify tendency of questionnaire items to group, the Jonckheere-Terpstra and cluster analysis statistical techniques were applied.

The same assessment methods were used for the second edition of the training modules (end of 2010).

Événements

TRINNODD Final Valorisation Conference in Luxembourg

Date 26.11.2010

Description A Final Valorisation Conference was held in Luxembourg (Bettange-sur-Mess) on November 26th. The aim of this conference was to present the project outcomes and more specifically, to feedback on the second edition of the training modules. The afternoon was devoted to a debate on staff training, cooperation of services and quality of life for users. The aim was again to disseminate the project conclusions among actors active in the Disability Field. Unfortunately, the Health Ministry (which was invited to the conference) couldn't be present on this occasion.

Cible Professionals in the mental health and intellectual disability field.

TRINNODD Final Dissemination Conference in SIBIU

Date 23.09.2010

Description The Final Dissemination Conference took place in Romania, one of the partner countries. The project outcomes were presented to a large audience active in the intellectual disability field, and involved a majority of Romanian actors in the sector. One of the aims of the project was to focus on dissemination activities, and have a specific focus on dissemination in Eastern countries. The SIBIU event was a real success and gathered many participants who were eager to learn more about the Dual Diagnosis issue in Europe.

Cible Professionals in the mental health and intellectual disability field.

TRINNODD European Meeting Mental Health and Intellectual Disability in Lisbon

Date 26.05.2010

Description The theme of the conference was “European Meeting Mental Health and Intellectual Disability: Building bridges between theory, research and good practice”. The aim of this dissemination event was to raise awareness of the subject in Portugal. The meeting gathered experts from Portugal and other European countries who made presentations on Mental health and ID, on Setting up appropriate services in different European countries and on Examples of good practice in professional practice and guidance. Psychology and medicine students, nurses and social and health professionals attended this conference. A presentation of the TRINNODD outputs was done at the beginning of the conference to disseminate the project to all the stakeholders present. This meeting helped to reach the project dissemination goals.
