Project Information

Title: Inforadapt2europe

Project Number: LLP-LDV/TOI/2007/PT/17

Year: 2007

Project Type: Transfer of Innovation

Status: completed

Country: PT-Portugal

Marketing Text: HSW covers all sectors of economical, social and educational life. Transfer of the products doesn't concern to an exclusive sector, but also will contain a dimensional component with a geographic level, meaning that the products will be transferred to other geographic contexts, such as the specific needs of each country and each partner. Transfer strategy of the products is marked by its incorporation to the companies and adjustment and introduction into the programmatic contents of the training institutions.

Summary: This project based on a transfer process of products created in the hygiene and safety at work field (HSW). This field is a transversal area, carrying out all the sectors of the economic, social and educational life. Thus, the transfer of products does not focus in a specific sector, but will support a dimensional component in a geographic level, which means that the products will be transferred to other geographic contexts, as a base in the specific needs of each partner's country. The strategies of transferring the products will be booked by its incorporation to the training institutions and adjustments to news companies in others countries.

In September 2009, the Inforadapt products are incorporated in the daily practices of 60% of partners.

This objective will be concretized by the transferring process of the Inforadapt products conceived in the scope of the Communitarian initiative Equal, in 2001.

Description: The inforadapt project aims the transfer of knowledge, skills and qualifications between organizations. The process of transfer implies a process of training, on which the participants are supported to acquire those skills and knowledge. There is more than one kind of impact of this transferring process: on one hand, there is an impact on the organizations that participate on the consortium: these gain and learn how to use an innovative training program, which they can apply latter, in further training, in beneficiary organizations. On the other hand, the beneficiary organizations and respective employees will benefit from a training that will facilitate personal and professional development, employability and participation in the European Labour Market, by giving them new perspectives, tools, skills, knowledge and certification in a theme which is more and more critical in European companies: HSW.

Themes: *** Labor market
 *** Lifelong learning
 *** Vocational guidance
 *** Enterprise, SME
 *** Continuous training
 ** Intercultural learning
 ** ICT
 ** Open and distance learning
 ** Equal opportunities

Sectors: *** Human Health and Social Work Activities
 *** Education

Product Types: teaching material
 website
 evaluation methods
 material for open learning
 procedure for the analysis and prognosis of the vocational training requirement

Product information: 1-Awareness program

Project Information

Objectives: to sensitize the participants for the question of HSW. How to raise awareness (as creation of willingness between the partners), good for the implementation of changes in HSW.

Methods: Survey of all available instruments in the DP in order to diversify the quantity and quality of resources to be used in actions. Allocation and scheduling of tasks.

2-Digital knowledge center

Objectives: free and easy access to various types of content relating to this subject. Create an independent network that allows an easier communication between pairs and experts in the area. Area of discussion and clarification.

Methods: Articulated with other Inforadapt products. Tool to support the implementation of the training plan. Complementary with the programme of awareness. Autonomous resource.

3 - Training Pack

Objectives:

Endow institutions and training agents with the necessary knowledge for the implementation of the Training Plan.

Create an instrument to support the training agents and disseminators of the plan.

Supporting a strategy of integrated training and adapted to the local reality.

Promote changes in attitudes and behavior at a HSW level.

Methods:

Its content consists on five training plans, fundamental for the training at all levels, in an integrated manner and adaptable to the realities of business;

Detailed analysis of the legal impositions;

Implemented by trainers specialists in HSW, having the theoretical and practical aspects.

Products

- 1 Awareness program
- 2 Centre of Digital Knowledge

Product 'Awareness program'

Title: Awareness program

Product Type: material for open learning

Marketing Text: To sensitize the participants for the question of HSW. How to raise awareness (as creation of willingness between the partners), good for the implementation of changes in HSW.

Description: As all the products on which the project is based, the process of exploiting their innovative results is by transferring these products to similar training institutions that can integrate them, adapt them, and finally, in some cases, apply them in companies that show the needs that the products aim to suppress. So, the exploitation of the products/results is based in two main processes: first, the integration and adaptation of the products, preparing them to be applied in different cultural contexts, and enriching them at the same time. The end of this process is the first result of the project, by creating the "new products", as a result of the adaptation process. And then, the implementation of the products on these cultural/professional contexts, creating results and impacts on these contexts. So, the exploitation of products strategy is based on a process of transferring –adaptation (first level of results) – implementation (not in all cases).

About the present product, the type of result of this process is the constitution of a Communication and marketing plan based on the original "awareness program", aiming the dissemination of the information about HSW needs in contextual situations.

Target group: Directors and employees of companies

Result: The type of result of this process is the constitution of a Communication and marketing plan based on the original "awareness program", aiming the dissemination of the information about HSW needs in contextual situations.

Area of application: Applies in all areas

Product 'Centre of Digital Knowledge'

Title: Centre of Digital Knowledge

Product Type: website

Marketing Text: The Centre of Digital Knowledge is, on its original structure, a platform constituted by three main elements: a web site, a forum, and a digital library.

Description: The Centre of Digital Knowledge is, on its original structure, a platform constituted by three main elements: a web site, a forum, and a digital library. These elements were critical to sustain the original inforadapt project. The kind of information exhibited on the digital library, truly useful in the HSW context, as well as the dynamics of the forum, projected the inforadapt project behind his time. The same dynamics is to be implemented on inforadapt2europe, by disseminating these products in a way that they can be useful the same way. The strategies to obtain this goal started by creating a common website within the consortium, and translate the contents of the digital library, putting them at the reach of all partners. Finally, a forum is being created in the native language of each partner.

Target group: All interested persons, entrepreneurs, workers, trainers, general public, etc.

Result: To obtain this goal started by creating a common website within the consortium, and translate the contents of the digital library, putting them at the reach of all partners. Finally, a forum is being created in the native language of each partner.

Area of application: All areas
