

## 2nd monitoring report

## 2nd Interim IQEA report

The interim IQEA report is focused on the training to trainers activity, that each partner carried out involving professionals of the VET sector with expertise in training care workers.

All participants to the events were asked to fill a questionnaire about the course. This document summarizes the answers to questionnaires sent to project partners about the training to trainers and compiled by the trainers themselves.

The questionnaire was based on the following questions:

**1) According to your expectations, how would you evaluate the course?**

- Very satisfying*
- Satisfying*
- unsatisfying*
  - Why satisfying ?*
  - Why unsatisfying ?*

**2) According to your previous knowledge, have the course given to you new information?**

- Many new information*
- Several new information*
- All information already known*

**3) How would you evaluate the chosen contents?**

- Incoherent with the course goals*
- Coherent with the course goals*

**4) Trainers**

- Clarity in argumentation*
- Competence*
- Availability to answer to questions*
- Capability to draw attention*

**5) Have you found Difficulties in taking part in the course ?**

- No difficulties*
- Some difficulties*
- Many difficulties*

**6) Organization; what would you suggest for the course improvement?**

- More spaces to simulations and practical experiences*
- More theoretical contents*
- Better coordination/organization*
- Close examination of information already known*

**7) Which topics have you considered useful for practical experiences?**

*Is IQEA model applicable in your organization ?*

*If YES, please specify the advantages that you think reachable through model application ?*

Below the summary of the answers.

Question 1

All the trainers answered “very satisfying” or “satisfying” .

The principal reasons:

- Clear and complete goals
- Very important the comparison with other countries, and homogeneity of parameters
- Experimentation possibility
- Evaluation and change of project indicators
- Useful work tool

Question 2

Predominates the answer “Several new information”

Question 3

All the trainers consider the contents “coherent”

Question 4

- About *Clarity*, the answers are “excellent” or “good”
- About *Knowledge*, all the answers are “excellent”
- About *Availability to answer to questions*, the answers are “excellent” or “good”
- About *Interest in the issues*, the answers are “excellent” or “good”

### Question 5

The trainers found no difficulties in taking part in the course

### Question 6

Some trainers suggested :

- More space to simulation and practical experiences
- Better coordination

### Question 7

All the trainers consider the themes of the course useful and the IQEA model applicable in their organizations.

The main advantages are:

- International experimentation and comparison in a dynamic social context
- Education growth of caregivers and career opportunities
- Services improvement
- Coherence of profiles and possible European standard of CV
- Uniformity of knowledge
- Mobility of caregivers through European union

### **Conclusions**

Globally, all the feedbacks were positive or very positive. It's particularly important that the stakeholders identified several possible advantages in using the ECVET model, as this can support the sustainability of the model after the project comes to an end.
