

Arche - Constructional cultural assets in the vocational education and training
LLP-LdV-TOI-2010-DE-147 327
Project Meeting Summary
14.09.2012 –15.09.2012 - Paide/Tallinn, Estonia

The final partner meeting within the ARCHE project took place in Paide and Tallinn, 14.09. - 15.09.2012. Partners arrived to Tallinn on 13.09.2012. In the morning of 14.09.2012 they were picked up at the hotel in Tallinn by Rainer Eidmiller of SRIK Paide, the Estonian partner organization within the Arche project. The group drove to Paide, where Rainer Eidmiller in a tour through the small town explained the typical historical architecture and its restoration, pointing out good practice as well as typical mistakes. After the tour the group visited SRIK Paide, the information center for sustainable renovation, where the Estonian archive had been

established and workshops took place. SRIK Paide restored the exhibition rooms in a way that the process of renovation is still visible and therefore easier to understand.

During the steering committee meeting wisamar presented the state of the art of the project progress. Partners discussed the final tasks and their accomplishment. Erkan Şugüneş, of İSOV Vocational High School for Construction Technologies introduced the first results of the pedagogical quality assurance he executed. After lunch Järva vocational school, a local partner of SRIK Paide, was visited. In the future the vocational school and SRIK Paide plan a cooperation to integrate restoration topics and workshops into the vocational education in construction.

On the second day of the meeting partners took part in Ökomäss, a fair for sustainable renovation and natural building materials in Tallinn. Here partners presented the thematic exhibition about the Arche project, which was realized as a travelling exhibition. Furthermore Uwe Bielefeld held a talk about the work of Förderverein für Handwerk und Denkmalpflege e.V. – Rittergut Trebsen and especially the Saxon Archive for Constructive Elements as well as the two year innovation transfer project Arche. Partners could gain interesting insights into the state of the art of preservation, renovation and restoration in Estonia. In the nearby archive of SRIK Tallinn workshops about different restoration topics took place and the archive could be visited.
