Europäisierung der nationalen Modellinitiative zur Qualitätssicherung und -entwicklung in der betrieblichen Berufsbildung (ENIQAB)

191185-LLP-1-2010-1-DE-LEONARDO-EQAVET

http://www.adam-europe.eu/adam/project/view.htm?prj=7534
Project Information

Title: Europäisierung der nationalen Modellinitiative zur Qualitätssicherung und -entwicklung in der betrieblichen Berufsbildung (ENIQAB)
Project Number: 191185-LLP-1-2010-1-DE-LEONARDO-EQAVET
Year: 2011
Project Type: Other EU-Projects
Individual Participation: Not possible
Deadline Participation: Status: granted
Country: EU-Centralised Projects
Marketing Text: The project ENIQAB develops transnational synopses on quality development and assurance in VET. Particular emphasis is placed on the three research foci of the pilot projects, which ENIQAB links to the EQAVET process:
- development of instruments
- development of communication structures
- development of a qualification concept for the training personnel
Examples of good practice result from the synopses and from successful experiences and procedures of the pilot projects.
Summary: The Federal Institute for Vocational Education and Training (BIBB) works as a coordinator together with three European partners from Austria, Poland and Portugal.
The aim of the project is to link the European Quality Assurance in Vocational Education and Training EQAVET initiative with the national pilot projects focusing on quality assurance and quality development. The latter are promoted by BIBB and funded by the Federal Ministry of Education and Research (BMBF). Perspectives and experiences of the partner countries are included in the work of the German pilot projects. Conversely, the partner countries gain impulses from the pilot projects for corresponding measures within their own national context and transfer good practice.
Description: In order to obtain transnational synopses the project follows the peer-learning process approach:
1. The German pilot projects are informed about the European quality assurance approach (EQAVET) and about quality assurance measures in the partner countries.
2. The partner countries receive information about the approaches of the German pilot projects and about quality assurance in vocational education and training in Germany. They may use this information for appropriate measures in their own national context and to transfer “good practice”.
3. Specialist transfer of information takes place between the German stakeholders and the partner countries at project meetings. The aim here is to provide mutual feedback on the quality assurance instruments.
The chosen approach constitutes a substantiated basis for the development and the dissemination of examples of Good Practice.
Themes: *** Quality
** Initial training
* Utilization and distribution of results
Product Types: others
website
Product information: In order to support the exchange between the pilot projects and the European partners and to disseminate the work of ENIQAB, information material was developed in German and English (newsletters, brochure, country profiles, descriptions of the pilot projects etc). All products are accessible on the website www.deqa-vet.de/en/ENIQAB.php. Furthermore, guidelines/examples of good practice and a checklist will be developed.

Product 'Website ENIQAB'

Title: Website ENIQAB

Product Type: website

Marketing Text: The website of ENIQAB contains a wide range of information on the project.

Description: It provides information on objectives, methods, project partners, products, documentation and the advisory group.

Target group: The target groups of the website are the European partners, the actors of the pilot projects and everybody interested and involved in high quality in VET.

Result: The website is designed to give an overview on the project and is continually being updated.

Area of application: The product was created with the aim of enhancing dissemination of information on the project.

Product 'Documentation of ENIQAB Workshops'

Title: Documentation of ENIQAB Workshops

Product Type: transparency and certification

Marketing Text: The documentation of the project meetings serves to record the results and to make the work of the project transparent.

Description: The project meetings with the European partners and the pilot projects are documented on a record.

Target group: The target groups of the documentation are the European partners, the actors of the pilot projects and everybody interested and involved in high quality in VET.

Result: Results of the workshops are documented and published on the ENIQAB Website.

Area of application: the product is used to make the work of ENIQAB public and transparent.
