“non routine skills” via mobile games

**INTOUCH** aims to calibrate an innovative approach enabling new generations of workers to develop their crucial non routine skills – in a labour market oriented way, in a flexible way, and in a technological innovative way – according to the new exigencies of the labour market. Following the "New Skills for New Jobs“ strategy, the partners will design an ad hoc innovative m-learning kit for working adults about crucial **“non-routine” skills**, exploiting the new technologies of smartphones for creating open and mobile didactical environments. IN TOUCH will bring mobile learning into SMEs everyday learning settings and improve interaction and collaboration. A Leonardo da Vinci co-funded project.

---

**Eye on it**

**The top 10 European skills for competitiveness**

An e-book illustrating the top 10 crucial transversal skills for non-routine tasks management within
business services SMEs according to the European employers and managers.

**The crucial 30 situational learning cases for competitiveness**

A report describing the most crucial non routine tasks for competitiveness. These areas will be focused by the m-learning games, as they are crucial for employees performances.

**Good practices in use of mobile technologies**

Good practices in use of mobile technologies for teaching, learning and empowering working adults.

**mobile phones.** Through 30 situational learning cases adult workers will learn how to promptly answer to non routine situations at work, thus to the new exigencies of the labour market.

**e-How cooperative community**

An online community dedicated to providing EU employees the ability to research, share, and discuss instructional solutions that help complete day-to-day non-routine tasks. The library will contain contributions from people who’ve figured out how to complete a variety of non-routine tasks, simple and complex, and are willing to share their knowledge.

**Become a m-Learning Facilitator**

**m-Learning Facilitators seminar. Rome (IT), Oct. 2012**

Training seminar for the creation of the new professional figure of m-Learning Facilitator, conscious about the potentialities of m-Learning, endowed with the tools produced within the project and able to use them within SMEs. If you are interested in this seminar, please rely to this newsletter.
