

YOMTOOL¹ addresses three different targets:

- Create a cost-effective WEB based tool integrating the operative documents relevant and required in a transnational VET mobility
- Contribute to individual documentation of learning outcomes, certificates and qualification documents according to the ECVET² principles, tracked and stored for career guidance
- Use of an interactive database where individually obtained learning can be linked to relevant documents like Journeyman Certificates, sector specific certificates and the Europass documents

An integrated toolbox contributes to the operation of mobility projects where the participant should be in a more profitable position during, and especially after, a work placement:

- Increasing the impact of VET mobility activities through a cost-effective ICT based working instrument for all involved parties
- Implementing EQF³ and ECVET principles as the recording method for obtained learning outcomes through different training pathways, including validation of prior learning acquired through formal, non-formal or informal experiences
- Making VET more attractive through easier access to the learner's own training records, certificates and qualifications as a tool for individual guidance. A link to Skillsbank is foreseen

The system is developed as a multilingual service, presently covering DE, EN, FR, NO, PL. Indexing of learning outcomes in additional languages is available through the DISCO⁴ web service for describing the learning outcomes. The use of an indexing service facilitates the bridging between ESCO⁵ descriptions and the YOMTOOL service and documents.

NTI-MMM - Multilateral Monitoring and Management (NO)

- APCMA - Assemblée permanente des chambres de métiers et de l'artisanat (FR)
- CCG - Centre de coordination et de gestion des programmes europeens (BE)
- ANFA - Association Nationale pour la Formation Automobile (FR)
- BVHT - Bildungsverbund Haustechnik Sachsen-Anhalt e. V. (DE)
- Oslo and Akershus University College of Applied Sciences (NO)
- EUROMASC - European Masters of Skilled Crafts (NO)
- IFA - Internationaler Fachkräfteaustausch (AT)
- 3s Unternehmensberatung GmbH. (AT)
- Lower Silesian Chamber of Crafts (PL)
- Akershus County (NO)
- e-motive (FR)

YOMTOOL

The Youth On the Move TOOLkit

Core components and functions:

Memorandum of Understanding

Learning agreements

Learning outcomes searchable from database

Recognition of prior learning

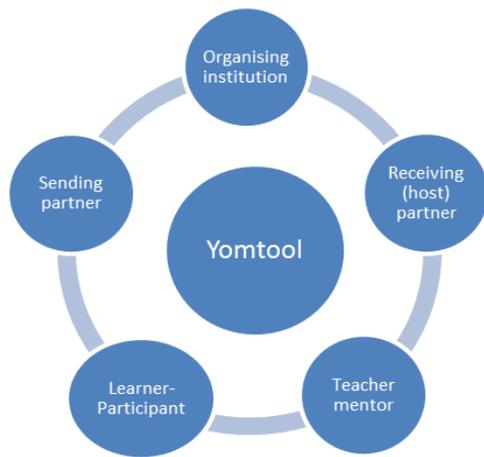

Individual profile building

Europass documents

Web based with multilingual options

Compatible with ECVET-EQF-ESCO

YOMTOOL is a «cloud computing» solution changing learning mobility from single projects and documents into a more generalised concept of “apprenticeship projects” according to a mobility life cycle perspective. A coordinated registry of certificates and training documentation with linking options into other instruments like Europass is at the core of the system. YOMTOOL is exploiting the experiences from the NTI-MMM products LeoPass, MultiPass and Rap4Leo - in operation since 2001

The **Organising institution** can be an umbrella organisation which is responsible for qualification definitions and awarding of certificates - as a Competent body in multilateral relationships. The organisation can also operate bilaterally in mobility projects

The **Sending partner** is the organisation where the participant in a learning mobility belongs, and where the recognition of learning experiences in another setting takes place. A Memorandum of Understanding may regulate these procedures

The **Receiving (host) partner** is the organisation where the participant will stay for a defined period. The Partnership Agreement with the sending partner regulates this

Learners and trainees are the participants, and where a Learning Agreement regulates this as a tripartite contract

Teachers and mentors have supporting and managerial roles in the context of a placement, also including assessments

The Mobility Life Cycle

...may cover several steps to agree on and documents to be issued:

MoU: Memorandum of Understanding – often between organisations being responsible for certifications – Competent bodies

PA: Partner Agreement – between sending and receiving partners

LA: Learning Agreement – covering the expected learning outcomes and assessment procedures

The **placement** with the learning mobility experiences

A **personal transcript**, showing individual learning attainments as Learning Outcomes

Europass documents where parts of the learning experiences are documented

Content of **Journeyman, Master of Skilled Craft and specific sector certificates** can be documented
