eLEANOR Certified

eLEANOR provides a certification scheme for the institutions which are delivering pedagogic and training activities within the water sector.

OBJECTIVE is to provide a support to the people who are interested to follow a training which is matching the expectation of the professional sector of the water services.

The **certification is delivered on request** to the institutions which are **endorsing the eLEANOR principles** -- Business Processes and Job Profiles -- defined by the consortium and which explicitly develop curricula targeting specific job profiles.

The institutions interested in receiving certification need to contact the eLeanor Consortium at contact@e-leanor.eu and submit a presentation of their pedagogic activities according to a specific form (sent on request).

The application will be reviewed by an ad-hoc committee of the consortium and if successful, the **certification will be provided for a duration of 4 years**.

eLEANOR Compliant

All pedagogic and training institutions involved within the water services domain are **welcome to use the terminology and the concepts** developed by the eLEANOR Consortium, particularly Job Profiles and Business Processes descriptions within the Curricula, various documents and training material available on/via project website.

The institutions which are willing to emphasize their interest for the eLEANOR approach are invited to mention that they are **"eLEANOR Compliant"** with a link to the eLEANOR website. Obviously, these institutions are kindly invited to engage the certification procedure if they see interest for it.

Why become certified?

eLEANOR certification is provided to pedagogic and training activities targeting the water services and which follow the concepts and principles developed by the eLEANOR consortium.

BENEFITS OF THE CERTIFICATION

Clear information about the job profiles and business processes you are targeting with your activities;

Recognition from the professional sector of the water domain;

Promoting a job oriented approach;

Vicinity to the reality of the job market in the water services domain;

Quality insurance of your contents by periodic accreditation;

Higher visibility in the education and training offers in the water domain.
