

## 2nd eLEANOR Dissemination Workshop

organized within the

HydroEurope ( [www.hydroeurope.org](http://www.hydroeurope.org) ) face-to-face activities

Sophia Antipolis (FR), 23<sup>rd</sup> February 2012

Hydro-Europe is an Intensive Programme within the Socrates/Erasmus framework, initiated by:

1. Université de Nice - Sophia Antipolis (France) and associated with six partners:
2. Brandenburg University of Technology at Cottbus (Germany)
3. Polytechnic University of Catalonia (Spain)
4. Newcastle University (UK)
5. Ecole Polytechnique Fédérale de Lausanne (Switzerland)
6. Vrije Universiteit Brussel (Belgium)

HydroEurope is dedicated to the students involved in several master degrees specialized on the water management and the hydro-technologies. The objectives of HydroEurope are to promote, in a global European vision, the key concepts, the methodologies, the tools and the good practices which are today essential for a sustainable water management. Today, the problems related to water are more and more complex and must be analyzed in a global way and with the right tools. The sophistication of the situations imposes to reconsider the way of working: new practices, new tools, new technologies and new ways of collaboration.

The seven partners of HydroEurope have decided to introduce this new concept into each local university program. They complement academic teaching and collaboration on exercises through the Internet by a 2 week phase of face-to-face meeting of all students and teachers in one place. During this time, gained experience will be exchanged and personal contacts will be established and deepened.

For the current academic year (2011 – 2012), the HydroEurope face-to-face activities are scheduled from 13<sup>th</sup> to 24<sup>th</sup> of February at Polytech'Nice Sophia.

*The 2<sup>nd</sup> eLEANOR Workshop is scheduled as following:*

- On the 23<sup>rd</sup> of February, on the occasion of the HydroEurope face-to-face activities, a first dissemination will be done to all participants.
- On the 24<sup>th</sup> of February, a second and more detailed dissemination will be done to Euroaque students.

The workshop is aimed, at first, to introduce and disseminate the eLEANOR Project in the EU water community (academics and future engineers in the water sector). Secondly, the workshop also presents an occasion to disseminate the training activities done at business level within industrial partners.

*The agenda of eLEANOR workshop will be:*

- 23<sup>rd</sup> February, 1400h: General presentation of the eLEANOR Project to the HydroEurope participants (students and their supervisors) from industrial partners. Feedbacks on the investigated training needs will be collected as a further validation of the analysis carried out;
- 24<sup>th</sup> February: Presentation of the eLEANOR Project and presentation of the Job Profiles and Business Processes in the water sector, as well as the Training Catalogue to the EuroAque students.
