

TESS: The English Speaking Sports world

www.englishinsport.eu

A multimedia e-learning tool to improve Technical English in Sport

English is the most used language in the sports world, during technical meetings, competitions, refereeing or press conferences.

It seems essential to create a tool which will permit to sportspersons - directors, coaches, team managers, athletes, judges, referees, students, spectators - who already have a basic understanding of the language a way to improve in this domain.

The finished product will be a multimedia e-learning tool that will have a strict link to sport life, practices and competition and it will look like an metro map.

Each line will represents a different sport and each station will correspond to a particular theme. There will be general stations common to several sports and specific stations specific to a particular sport.

Examples of Common Stations: At the doctor, Communication, Doping control, Hotel, Meals, Physical & mental preparation, Physiotherapy, Practical information, Public relations and Travel.

Examples of Specific Stations: Coaching, Junior Development group meeting, Draw meetings, Interviews, Managers meetings, Men's training, Physical preparation, Racket control, Ranking committee meeting, Rules, Umpire meeting, Umpiring, Women's training, Women's working group meeting, Youth training.

Each station has 3 videos with subtitles, Grammar, Vocabulary, Exercises: quiz, role play, dictation and a General Glossary.

The project is a European partnership of the Lifelong Learning Programme of the European Union, LEONARDO DA VINCI - Transfer of Innovation: INSEP - Institut National du Sport, de L'expertise et de la Performance (project coordinator), Hungarian Coaching Association, National Sports Academy of Sofia, German Olympic Sport Coach Academy of Cologne, Coaching Confederation of Portugal, European Network of Sport Science, Education and Employment (ENSSEE) and Leeds Metropolitan University.
