

# It's time to go to school !!

PIA2 Project is progressing step by step and is now on the half way to its target. The first and second test runs are now over and the project results are noticeable. Due to lots of dissemination activities by the project partners, the interest for the project is growing within the educational sector and many official institutions in the partner countries.

## Our partner's achievements so far...

### SPAIN

*"In Spain, all the activities related to dissemination and adaptation of the didactical framework are being greatly facilitated by the involvement of the main stakeholders at regional level in the project, specially the Department of Education of the Government of Navarra, Moderna Foundation, CED-ERNA GARALUR association and the UPNA (Public University of Navarra, participating in the partnership too). All are ensuring the dissemination among the educational networks, VET Schools and economic sector by presenting the project's results in public events and publishing articles in their own corporate media. They are also facilitating and supporting the implementation of the PIA2 method in 3 VET schools in Navarra and Gipuzkoa: IES Sierra Leyre (Lumbier), IES Ega (San Adrián) and IEPFS Miguel Altuna (Bergara). It started to be applied in VET branches of "Mechatronics", "Animation of Outdoor and Sport Activities", "Food Production" and "Mechanical Production". Before, 9 teachers of these Schools have actively participated in VET trainers' training days held in September 2013."*

### FRANCE

*"In France the second run finishes with the end of the trainings and the beginning of the implementation of the PIA2 method in schools. Also, the translation of the didactic materials is assured and the steering committee of the project is well established. Concerning the actions of dissemination the French team has already published an article and an interview concerning the relationship between PM and economic sector. During the EU seminar in Montpellier, the High School George Frêche presented the status report of the PIA2 implementation and the evolution of student's project called "Côte d'Améthyste" aiming to discover the products and assets of the Languedoc coast. Finally, the most critical stakeholders, both in a regional and national level, were mobilized in order to facilitate further dissemination of the project and place the Academy of Montpellier as the leader actor in PM PIA2 in France. For more information and details you can follow the link below: <https://www.facebook.com/piadeux.france>"*

### ITALY

*"Training 2000 and Province of Pesaro and Urbino, in cooperation with local high schools namely "Polo Scolastico n. 3" of Fano, IPSIA "G.Benelli" of Pesaro and ITCG "Corinaldesi" of Senigallia, have carried out dissemination activities at local and national level, involving different target groups. Some initiatives have reached a general public (website, publications on online platforms, etc.) and others were addressed to a more specific target group from educational and economic sectors. The activities include the participation in meetings and conferences, the publication of two articles (on various newspapers, online magazines and institutional websites), the dissemination of project website and newsletters via mail. Different pilot trainings have started in the above mentioned schools and training centres, in particular project management methodology will be applied in apprenticeship courses. Furthermore the professional Institute of Management and Business studies "A.Olivetti" is creating a "web community" to share ideas and experiences on project management between students and teachers. The result of the above activities is a very efficient network involved in the project's dissemination."*

### PORTUGAL

*"EUROYOUTH started the Training of Trainers in Portugal for the testing of PIA2 Project Management Methodology in the context of Professional Training. During the 30th November and 1st December, the training used 15 of the 30 hours of training and counted with the participation of 3 partner schools and 10 participants:  
- Professional and Technical Training Association of Beira Interior (AFTEBI - Covilhã)  
- Professional School of Aveiro (AEVA - Aveiro)  
- Secondary School of Santo André (ESSA - Barreiro).  
See more details and pictures of the activity in EUROYOUTH site ([www.euroyouth.org](http://www.euroyouth.org))."*

## Continuing our trip...

Now it's time for action! All the materials are going to be used in the classroom. Now it's time for the students to learn, to plan, to manage, now it's time to be a Project Manager!

In the partner schools the students will work with the adapted guideline. The students will plan a real project and will get to their own results, their own product. Finally, the teachers will evaluate the students work with the help of the evaluation materials. Now it's time for learning by doing, learning with fun!

## Let's start!
