Project Information

Title: fit 4 future with green skills
Project Number: 2012-1-AT1-LEO05-06974
Year: 2012
Project Type: Transfer of Innovation
Status: completed
Country: AT-Austria

Marketing Text: Today's daily life forces everybody towards an environmental sound way of living. Many different aspects of our day-by-day routine are closely connected with challenges of sustainable development, energy efficiency and environmental protection. The most missing link is the awareness about these issues. As the educational system does not integrate any training in our regular school or adult education, a basic training module named "ECOPROFIT Assistant" was developed to address these special topics. It focuses on exactly these 'green skills' on all company levels as well as in school and adult education. This training module, already implemented in Austria with an excellent feedback, is now on the way to other countries in Europe.

The main objective of this project is the transfer of that training module to partner countries (CZ, IT, PL, UK) including the necessary standardization of training and examination, adaptation of training materials and a testing in pilot trainings.

Summary: By introducing the ECOPROFIT Assistant training course to the European market we intend to raise awareness of ecological and environmental issues that are affecting people's personal as well as professional environment. Furthermore, participants shall understand why it is so important that we look after our environment and most of all how we can do that. As a result we want them to enhance their competency profile when it comes to career development, applications for an employment and to their lifestyles. The course combines a practical toolkit of interventions to reduce your ecological footprint that can be integrated into private or professional fields. The European goal for a better sustainable environmental development is only possible by increasing the green skills by all people.

The main objectives of this project are:

- to standardize the curriculum (European standard)
- to adapt it according to special needs of the workplace in European countries
- to modify the trainings booklets and materials
- to test it via pilot courses for various target groups (pupils, adults)
- to transfer the train the trainer concept
- to set up certification boards to assure the sustainability of the product
- to share the lessons learned
- to prepare for further dissemination within Europe

In our consortium we have partners from 5 countries (AT, PL, CZ, IT, UK).

- The CPC (AT) has developed the ECOPROFIT ASSISTANT Training and will guide and manage the project.
- bit cz (CZ) and CTC (PL) are progressive companies specialized on educational programs for organizations and companies of all types and sizes.
- TRAINING 2000 (IT) is a VET organization certified in the Marche Region for regional training, with experience in youth and adult education.
- One Planet Ventures (UK) has vast experience in technical environmental training and transfer projects.

The main outcomes of our project are:

- complete set of materials in different languages (training book, trainer's book, workshop materials, e-testing, web information, dissemination-flyer)
- min of 70 trained persons (employees, unemployed, students/pupils) in the pilot training courses
- min of 10 trained trainers (for beginning 2 in each country)

Project Information

- min 300 training units in pilot testing phase
- min. of 70 e-tests completed
- min of 60 persons successfully passed the e-testing
- 5 National Contact & Certification Points
- a total of 10 Roadshow-Events for dissemination

Description: fit 4 future Steps

Beside the project management and the very productive 4 international project meetings the project fit 4 future with green skills was based on the following five main steps and activities which were carried out jointly by the project partners:

Step 1: EA development

Even before starting the project, it was clear that a re-design of the content and the methodical and didactical approach of the EA training would be necessary. With its content the EA training builds the capacity for working on sustainability issues, waste- and energy management and topics related to Cleaner Production. Main topics of the EA training:

- Sustainability
- Sustainable economic development
- Awareness-raising for acceptable ecological and feasible economic activities
- Climate protection and Ecological Footprint
- Cleaner Production – preventive, company-specific environmental protection
- Waste management
- Energy management

Step 2: EA transfer

The transfer of the EA training module took place under the following three framework conditions:

1. The transfer took place in the same sector - education.

The involved partners are bit cz, CTC, Training2000, One Planet Ventures and CPC Austria - all of them provide services for pupils, employees and unemployed.

2. Geographically, we transferred the training concept from Austria to 4 European countries (CZ, PL, IT, UK).

3. The transfer was supported by an adaptation of the successful training concept and materials from Austria according to the local needs of each region (CZ, PL, IT, UK).

The content of the materials was tailored to the specifics of the environmental issues in each target region and the goals of the European Union: "every job will be green" / "every job needs green skills". The didactics were interpreted and modified by the trained trainers and enriched with the regional experiences. The translation of booklets and training materials from German to all other four project languages was the core activity of the transfer process.

Step 3: EA train the trainer

After step 2 "transfer and adaptation of EA" the next step was to create a structure for multipliers. Trainers in all the partner countries are needed to conduct the EA trainings in schools and training organisations. Therefore a train the trainer seminar on international level was held in Graz (AT) further trainings were planned if necessary on national level.

In this work package the following aims were defined:

- create a curriculum for train the trainer seminars
- create requirements/skills for potential trainer and auditors
- transfer the teaching/training knowledge and methodologies in the train the trainer seminars
- elaborate a training manual (train the trainer booklet)

Step 4: EA pilot trainings

With the well trained trainers pilot trainings for the target groups of the project were conducted. The objectives of this step were defined as:

- to conduct two pilot trainings in each partner country with different target groups (employees, unemployed, students/pupils). These pilot trainings included the training, the online-testing and subsequent the certification.
- evaluation of both trainings and collection of suggestions for improvement.

Project Information

- to create a working group which summarizes all the suggestions (also in the future) from all countries and incorporating into the ECOPROFIT Assistant methodology and materials as a standard. This task group is very important for the sustainability and further development.

Step 5: NCP

For sustainability in each country national contact points (NCP) were set up. These NCP are the national coordinators, multipliers and contact points for all issues related with the EA training and certification. The role of the contact point can be summarized as:

- information platform for the EA training and certification
- quality control of EA trainings in the country/region (continuous evaluation and adaption)
- to offer train the trainer seminars for multipliers
- ongoing dissemination

Themes: *** Utilization and distribution of results
 *** Sustainability
 *** Lifelong learning
 *** Ecology
 ** Open and distance learning
 ** Continuous training
 * Labor market
 * Recognition, transparency, certification
 * Enterprise, SME

Sectors: *** Education

Product Types: program or curricula
 material for open learning
 website
 teaching material
 transparency and certification
 evaluation methods

Product information: The following products and results are the main outcomes of our project:

- European Curriculum for the ECOPROFIT Assistant (EA) training (in 5 languages)
- EA training booklet (in 5 languages)
- EA training material – slides (in 5 languages)
- EA training material – practical exercises (in 5 languages)
- EA e-testing (in 5 languages)
- EA certificates (in 5 languages)
- EA train the trainer curriculum (in 5 languages)
- EA train the trainer booklet (in 5 languages)
- National Contact Points (NCP) established
- global and local websites (in 5 languages)(<http://fit4future.ecoprofit.com>)
- marketing material (in 5 languages)
- roadshows (held in each partner country)
- trained trainers
- trained auditors
- trained persons
- external evaluation report (interim & final)

In most of the cases the quantitative indicators exceeded the envisaged numbers. Especially the numbers of pilot trainings and the numbers of trained persons were much higher than expected. This shows the actuality of the product and the demand for such a training.

Product 'European Curriculum for the ECOPROFIT Assistant training'

Title: European Curriculum for the ECOPROFIT Assistant training

Product Type: program or curricula

Marketing Text: The successful environmental training course, with its origins in Austria, is now on its way to make Europeans more environmental-aware. Therefore, the curriculum is now available in 5 languages.

Description: The European Curriculum for the ECOPROFIT Assistant training course is one result of work package 2. Herein the curriculum, provided by CPC, got translated into English, standardized and localized in cooperation with the project partners and translated into all partner languages.

An overview of the objectives, targets, duration, content (specificised into the content groups: sustainability, waste management and energy consumption) and the methodologies used, is provided.

Target group: Teacher, trainer, schools, training organisations

Result: The successful training course, specified for Austria, is now also available in four further European countries (i.e. CZ, IT, UK, PL).

Area of application:

Product 'e-Testing'

Title: e-Testing

Product Type: evaluation methods

Marketing Text: Do you know about eco-efficiency? or modern waste management? But you surely know about Sustainable Development!?
With the ECOPROFIT Assistant practice test you can check your knowledge!

Description: A standardized training course also needs a standardized testing procedure. Herewith the high quality of the EA training course is ensured.
The partners built up 4 sets of test-questions, one set for the practice test and also one list with all questions. They are included in the Annex.

For the usage by the auditors also a user guide was provided by the project partners.

Furthermore, a practice test has been included on the project homepage. With this practice test, the personal knowledge can be checked (available in all partner languages):
<http://fit4future.ecoprofit.com/fit4future-output.html>

the real exam platform (including also a practice test) can be accessed here:
https://www.online-testing.cc/ecc/at/c/static/default08/en/startpage_ecc.ihtml

Target group: - Trainer, Teacher in (vocational) schools to be a trainer
- Employees, Unemployed, Students/Pupils for certification

Result: A practice test and the exams were developed and translated into the partner languages. Now the tests are available in 5 languages and can be accessed freely (practice test).

Product 'Certificates'

Title: Certificates

Product Type: transparency and certification

Marketing Text:

Description: The standardized and bilingual certificates ensure the uniqueness of the EA training course and give also a brief overview on the topics of the course to interested parties and employers. Furthermore the duration of training course are outlined.

Target group: - for Trainer, Teacher in (vocational) schools
- for Employees, Unemployed, Students/Pupils

Result: According to the workplan, country specific certificates for the successful finalisation of the training course (for the trainees) were transferred into all partner countries - including the logos of the specific project partners. On the second page a list of the topics gives an overview on the topics of the training course. Additionally, a certificate for the trainers was set up - this is available only in English.

Product 'Curriculum for Train the Trainer-course'

Title: Curriculum for Train the Trainer-course

Product Type: program or curricula

Marketing Text: If you want to broaden your career perspectives and join the trend of Green-skills-qualifications, then this training is perfect for you and your CV!

Description: The curriculum provides an overview on the goals, objectives, methods, content, exam and time effort for the Train the trainer formation.

Target group: teacher, trainer

Result: With the curriculum for Train the trainer a standard of the trainer education is achieved. The curriculum is the basis for the Train the Trainer seminars, that were organised by the project partners after the initial TtT seminar in Graz (using multiplier effect).

Product 'Global and local project websites'

Title: Global and local project websites

Product Type: website

Marketing Text: On these websites you find lots of information on the project, the trainings, the qualifications etc. and all of these are available in 5 languages!

Description: The website is a tool for different information to the EA training.
Also a demo test, informations about the trainerpool, training materials etc. are available.

Target group: All persons interested in the topic and who want to get to know more about "fit 4 future with green skills".

4th partner meeting

Date 23.10.2014

Description The fourth and last international Partner Meeting, Held in Pesaro, Italy, from 23. to 24. October 2014 was dedicated to the finalisation of the project (by the end of January 2015) and the corresponding final tasks of each partner.
The main topics discussed at the meeting were:

- a brief feedback on already completed Tasks
- a preview about the upcoming activities till the end of the project „fit 4 future“
- to set up a list of "to do's" for the consortium as well as for each Partner
- a broad discussion of the projects results and (if necessary) an agreement on adaptations
- to set up a contract about the further use of the project results

In addition the project partners took advantage of an exchange of experience not only with the other partners, but also with EA trainees from Italian pilot trainings and with Mr. Rito Briglia, who is in charge of all the aspects of Sustainability in the City of Pesaro.

Due to the very good cooperation among the entire project team and the excellent organisation of the meetings by the Italian hosts the Meeting was a successful final step of our common work.

ECOPROFIT Assistant Training

Date 13.07.2014

Description Am 14. und 15. Juli 2014 fand in Pesaro der abschließende Block des ECOPROFIT Assistant Pilot Trainings des italienischen Projektpartners Training 2000 statt. Dazu war als externer Referent Christoph Holzner vom CPC Austria eingeladen um in zwei Workshops die Kapitel

- Cleaner Production und Nachhaltigkeit
- Energie-Effizienz

den Teilnehmern näher zu bringen und Denkanstöße zu liefern. Beide Workshops mit Vorträgen, praktischen Arbeiten, Fragen und Diskussionen fanden in den Räumlichkeiten der Commune di Pesaro statt und fanden großes Interesse bei den Teilnehmern und den Veranstaltern. Selbst der Bürgermeister der Stadt Pesaro stattete dem Kurs einen Kurzbesuch ab.

Daneben gab es auch ein internes Projekttreffen mit dem italienischen Partner, bei dem der Status des Projekts sowie die nächsten Schritte abgestimmt wurden.

3rd partner meeting

Date 12.05.2014

Description Das 3. Projekt Meeting des Projekts „fit 4 future with green skills“ fand vom 12.-13. Mai 2014 in London statt. In den Räumlichkeiten des britischen Projektpartners One Planet Ventures im multikulturellen Stadtteil Brixton im Süden Londons standen zwei arbeitsreiche Tage auf dem Programm. Alle Partner waren anwesend und konnten substantiell zum Fortschritt des Projekts beitragen. Der Schwerpunkt der behandelten Themen lag auf den Bereichen

- Projekt Management
- EA Pilot Training and Evaluation
- EA Online Testing System
- Dissemination and Sustainability

Durch die gute Zusammenarbeit der Projektpartner waren auch die beiden interaktiven Workshops zur Evaluierung der Pilot Trainings (Leitung: Elmo DeAngelis von Training 2000) und zu den projektspezifischen Schritten bezüglich Dissemination und Sustainability (Leitung: Christoph Holzner von CPC Austria) sehr erfolgreich und für den weiteren Projektfortschritt äußerst nützlich.

Weiters konnten vor allem die administrativen Angelegenheiten (Anmerkungen zum Interim Report und zum Monitoring, Vorbereitung auf den Final Report, 2nd Amendment) positiv erledigt werden.

Der Schwerpunkt der zukünftigen Projekt-Aktivitäten bis zum nächsten Partner-Meeting liegen nun auf den Bereichen

- EA Pilot Trainings inklusive Testing und Zertifizierung
- Dissemination and Sustainability

Für das Klima und die Zusammenarbeit der Partner im Projekt war dieses Meeting sehr positiv, haben doch alle Beteiligten klar erkannt wie die bisherigen Aktivitäten in ein Gesamtes zusammenfließen und welche zukünftigen Arbeiten zu erledigen sind, um nicht nur das Projekt positiv abzuschließen, sondern auch für die Zeit danach die notwendigen Schritte für eine nachhaltige Implementierung des ECOPROFIT Assistant Trainings zu setzen.

2nd partner meeting

Date 19.09.2013

Description The 2nd partner meeting and Project workshop aimed to a smooth project management.

The main topics of that meeting are:
- status of the project (previous tasks)
