

CPS + 45

LIFELONG LEARNING PROGRAMME

LEONARDO DA VINCI TRANSFER OF INNOVATION PROJECT

CPS 45+ – Lisboa (Portugal) – 2nd Meeting – 11–12 March 2013
Learning diary from Emmanuel Lavocat (ITG)

The 2nd meeting took place in Lisboa in March 2013.

During the 2 days' meeting, each partner participated actively to the Project CPS 45+ in terms of presentations on each task to be achieved in respect to the timetable of the EU Project

What was really essential for me, as a need for this particular meeting in Lisboa, was **the definition of the “target group” for the CPS 45+ Project**. I really felt, it was important to achieve on a common way to a clear definition the “target group”, because we all are at a stage it is essential to define this group, its needs, its abilities and all its characteristics.

We needed to be very precise of this definition, according to the work to be done to the current CPS and to “transfer” it to a next target group.

After discussions together, we all agreed on the fact that our “Project’ target group” are ***people working in services, home service, health care service, from the Third Sector..., people who are able to use ICT, who have an internet address.***

I personally see 2 great advantages:

- 1- This definition is very important, because, for me, it means that we have to concentrate more on the content of the IT, rather than to explain how to use a computer...
- 2- This definition now concentrates all the attention to the service sector, which offer a lot of job opportunities, in order to enter into a new job career.

After such a common decision, I personally feel confident about the Project, because each country is really involved in its own part to be prepared.

I would like to thank all the ISQ members for the welcoming atmosphere of our meeting in Lisboa, a very beautiful European city.

Pictures from the Meeting by ISQ, near from Lisboa 

Picture from the very beautiful City and from the blue “Azuleiros” on the wall !
