

Knowledge („knows“)	Skills („can“)	Competence („is able to“)
<p><b>Tools, equipment</b></p> <p>Knows how to check the choice of tools and equipment for the site and the building regarding fire proof materials</p> <p>Knows how to check the prepared technical drawings indicating location of tools, equipment and materials with regard to safety requirements</p> <p>Knows how to check the prepared list of necessary fire protection equipment</p> <p>Knows what kind of heating, electric and ventilation equipment is used on the site and prepare for safe operation</p>	<p><b>Execute practical operations</b></p> <p>Can make technical drawings indicating location of materials and equipment with regard to safety requirements</p> <p>Can make a list of necessary fire protection equipment</p> <p>Can choose a proper arrangement of electrical equipment</p>	<p><b>Manage control</b></p> <p>Is able to read technical drawings and documentation</p> <p>Is able to choose the necessary fire protection equipment for a particular site</p> <p>Is able to arrange the necessary heating, electric and ventilation equipment in a correct manner</p>
<p><b>Material</b></p> <p>Knows how to arrange building materials to protect them against atmospheric conditions</p> <p>Knows materials as well as light and heavy equipment for winter operations</p> <p>Knows how to document materials regarding their behaviour during a fire</p> <p>Knows how to document main characteristics of hazardousness of the materials stored and used on the site</p>	<p><b>Execute logical operations</b></p> <p>Can describe necessary and preventative arrangements for winter or hot summer operations</p> <p>Can find out dangers of occupational health and safety and can make arrangements to avoid these weak points</p> <p>Can use different possibilities of efficient and environmentally friendly use of electricity</p> <p>Can comprehend orders, operation charts and flow charts within a conservation with the (line) manager</p>	<p><b>Take responsibility</b></p> <p>Is able to arrange, to ensure and to clear the working environment</p> <p>Is able to correct working environment</p> <p>Is able to recognize lacks of fire proof materials and is able to fit them</p> <p>Is able to identify materials and their characteristics</p> <p>Is able to practically apply knowledge about materials and their characteristics</p>

<p>Knows characteristics of constructed or renovated buildings with regard to fire/explosion risk</p>	<p>Can distinguish materials used in construction and assess their level of dangerousness</p>	<p>Is able to identify and evaluate potential risk characteristics of the building with regard to fire/explosion</p>
<p><b>Rules, norms, regulation</b>          Knows how to check the necessary fire safety instructions for the site           Knows how to check fire safety instructions for the workers on the site           Knows how to check rules on fire extinguishing, alarm, and use of communications           Knows how to check fire safety documentation of the site           Knows what documentation has to be submitted to Fire protection department and other controlling institutions</p>	<p><b>Communicate</b>           Can prepare fire safety instructions for the site           Can prepare fire safety instructions for the workers on the site           Can prepare rules on fire extinguishing, alarm, and use of communications           Can prepare the necessary documentation and coordinate it with the responsible institutions</p>	<p>s</p>
<p><b>Frame of action, actors, interfaces</b>          Knows how to check the prepared evacuation plans           Knows how to check the appropriate arrangement of fire safety and evacuation signs</p>	<p>Can prepare evacuation plans           Can choose and arrange fire safety and evacuation signs</p>
