

INVESTT - Inclusive Vocational Education and Specialised Tailor-made Training

527924-LLP-1-2012-1-BE-LEONARDO-LMP

<http://www.adam-europe.eu/adam/project/view.htm?prj=9976>

Projektinformation

Titel: INVESTT - Inclusive Vocational Education and Specialised Tailor-made Training

Projektnummer: 527924-LLP-1-2012-1-BE-LEONARDO-LMP

Jahr: 2012

Projekttyp: Innovationsentwicklung

Status: laufend

Land: EU-Zentralisierte Projekte

Marketing Text: Das Projekt INVESTT wird berufsbildenden Schulen mit spezifischen Informationen und Anregungen versorgen, um allen Studierenden (einschließlich Menschen mit Behinderungen) einen Zugang zum offenen Arbeitsmarkt zu ermöglichen. Das Projekt wird ein Unterrichtsprogramm für das allgemeine Bildungssystem in Flandern (Belgien), Österreich, Slowenien und Norwegen entwickeln und implementieren. Diese Programme berücksichtigen einerseits die Erwartungen des Arbeitsmarktes und haben andererseits die Absicht, die Inklusion am Arbeitsmarkt insgesamt und die Beschäftigung von Menschen mit einer Behinderung am ersten Arbeitsmarkt im Besonderen zu verbessern.

Zusammenfassung: INVESTT wants to provide vocational schools with specific tips in order to guide all students towards the open labour market.
A teaching programme is thus produced in each partner country to help practitioners to create a universal design in their learning environment. This teaching programme is assessed through a cyclical approach, where it is first developed theoretically then tried and tested in the field throughout two years.
In this perspective, the project was developed in four countries representing different social cultures in Europe – Belgium, Norway, Austria and Slovenia. In each country, three partner organisations are involved, each with their specific expertise. The university develops the theoretical framework, the school implements the teaching programme and the service provider supports the national team with its expertise in special needs education.
The research team has developed 1) a research paper developing the theoretical framework of the project, 2) a research paper evaluating the teaching programmes at country level, as well as 3) the Strategy at European level which extracts from the national contexts studied suggestions for practitioners across Europe to develop a universal design in their own VET context.
The schools have implemented the teaching programmes from September 2013 until August 2015, and have all noted remarkable changes in the approach and practice of both teachers and students.

Beschreibung: Rationale:

All children and adults with disabilities have the same right to inclusive and high quality education as everyone else.
Since the Salamanca Statement of 1994 and the UN Convention on the Rights of Persons with Disabilities of 2006, there is a political will within the 27 EU countries to carry out the necessary changes in the field of legislation and school organisation. Still, we have a long way ahead before reaching a society where equal opportunities are guaranteed for all. In many special as well as mainstream schools and training centres still much uncertainty and a lack of knowledge can be seen.

Particularly, in times of economic crisis, extra attention should be given to the inclusion of persons with disabilities in the labour market. They can represent a significant addition to the labour force and thus contribute to economic production. Unfortunately, during the last years a dramatic decrease can be seen in the employment opportunities for people with disabilities across Europe: reports show that not only they have fewer opportunities to be employed than their non-disabled counterparts on the open labour market, but they are also among the first ones to be dismissed when economies have to be made.
Therefore, action should be taken.

Previous research done at European level, as well as the principles 'Universal Design'

Projektinformation

and 'Reasonable Accommodation', as described in the UN Convention on the Rights of Persons with Disabilities (2006), will guide us in reaching the project outcomes.

- What is 'Reasonable Accommodation'?

"Reasonable accommodation" means necessary and appropriate modification and adjustments not imposing a disproportionate or undue burden, where needed in a particular case, to ensure to persons with disabilities the enjoyment or exercise on an equal basis with others of all human rights and fundamental freedoms;"
(UN Convention on the Rights of Persons with Disabilities, 2006, p.4)

- What is 'Universal Design'?

"Universal design" means the design of products, environments, programmes and services to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design. "Universal design" shall not exclude assistive devices for particular groups of persons with disabilities where this is needed."
(UN Convention on the Rights of Persons with Disabilities, 2006, p.4)

Work plan:

A 4-phase approach will be used. The dissemination and exploitation activities will take place across these 4 phases.

1. The first 9 months will be dedicated to the research on what has been done with regard to 'universal design' and 'reasonable accommodation'.

This research will lead to an overall strategy on the setting up of an inclusive learning environment, helping the national project teams to develop a concrete teaching programme in their country.

2. In the school year to follow (Sept 2013 – July 2014), the schools in the consortium will implement the programme in their learning environment with intensive support from the service providers.

3. The tasks related to the 3rd phase of the project (Aug 2014 – July 2015) are 2-fold. At the one hand, the students who have received a qualification, will be followed in their job, in order to further streamline the programme with the requirements of the labour market. At the other hand, new students will participate in the teaching programme.

4. Although the evaluation of the teaching programmes will be done on a continuous basis, the bulk of the evaluation and reporting work will be done during the last 4 project months. These months will be crucial to come to a sustainable product, ready to be used and further developed in the future.

The common evaluation model will be developed by the research centres in close cooperation with the entire consortium at the very start of the project, and will follow the principles of an action research (cyclic process of research and action).

Target group:

- Persons with special educational needs
- Family of persons with special educational needs
- Head masters and school personnel in vocational schools and training centres
- Service providers for persons with disabilities
- Employers

Consortium:

The project includes 1 European Association (EASPD), which will take up the role of coordinator, and 4 national project teams. Each national project team consists of

- 1 service provider
- 1 university/research centre

Projektinformation

- 1 vocational school/training centre

Produktinformation: The results of the project were :

1. A teaching programme in each partner country. Developed by the universities in collaboration with the schools, the programmes were implemented in schools with the support of service providers. The difference in the teaching environment – the way the class was prepared as well as the way it was given and the content it included – was recognised and appreciated both by the teachers and the students. This can be found on the website www.investt.eu.
2. A research paper outlining the theoretical framework of the project, as well as a dissemination paper summarising the findings of the research, available in English, German, Dutch, Norwegian, Slovenian and Easy-to-Read. This can be found on the website www.investt.eu.
3. A research paper presenting the conclusions and recommendations of the project. It also includes the evaluation methodology that was used as well as the outcomes in each partner country. A second dissemination paper was also developed to summarise these findings, available in English, German, Dutch, Norwegian, Slovenian and Easy-to-Read. This can be found on the website www.investt.eu.
4. A strategy at European level helping practitioners in other countries to implement a universal design in their own VET context, based on the findings in the partner countries. This can be found on the website www.investt.eu.
5. Four national seminars and four stakeholder forums, raising awareness and encouraging stakeholders to implement teaching programmes with a universal design in their own learning environment. The reports can be found on the website www.investt.eu.
6. An online Knowledge Centre on inclusive education in mainstream education as well as in the VET sector. This can be found on the website www.investt.eu.
7. Five INVESTT newsletters on the state of play of the project, as well as other projects and events related to inclusive education. You can subscribe to the newsletter through the INVESTT homepage, www.investt.eu.
8. A database of stakeholders interested in inclusive education, counting 899 stakeholders and growing. This covers universities, research centres, schools, VET centres, service providers, local, national and European authorities as well as individuals and media outlets.

Produkt 'Research paper'

Titel: Research paper

Produkttyp: Lehrmaterial

Marketing Text: Paper on the preparatory research carried out at European level, including research methodology, research outcomes and overall conclusions and recommendations

Beschreibung: A research paper will be made, including:

- The research methodology, agreed upon at the first project meeting:
This methodology will include an action research and appreciative inquiry and will consist of the following research methods:
Questionnaires (easy-to-read version for students with disabilities)
Semi-structured interviews
- The research outcomes:
Good practices in Europe regarding 'universal design' and 'reasonable accommodation'
An analysis of the strengths of the VET systems in the different partner countries and on the transferability of these strengths
- Overall conclusions and recommendations

This report will be made available in digital version on the web based knowledge centre.

Produkt 'Dissemination paper'

Titel: Dissemination paper

Produkttyp: Lehrmaterial

Marketing Text: A 15 pages dissemination paper with an executive summary of the preparatory research carried out at European level

Beschreibung: The full research report will be a long and scientific document, which will be difficult to read for the wide public. Therefore, the consortium agreed to produce a reader-friendly, 15 pages-only dissemination paper as well. This paper will be an executive summary of the research report, focusing on the overall conclusions and recommendations.

The paper will be translated in all partner languages and in easy-to-read, and will be disseminated among the project partners' contacts and to the entire P2i stakeholder network. The paper will be made available on the web based knowledge centre and on the website of the project partners, and will be used as an important tool for promoting and exploiting the project products at regional, national and international level.

Produkt 'S00: Strategy at European level'

Titel: S00: Strategy at European level

Produkttyp: Lehrmaterial

Marketing Text: A draft strategy at European level helping practitioners across Europe to work towards a universal design in their concrete VET context

Beschreibung: The strategy at European level is an important outcome from INVESTT and is therefore described as a separate deliverable, even though it will be combined often with the 2 previous deliverables.

This strategy is a result from the research carried out in this WP and will be finalised after the evaluation research in WP6. It will be a practical tool and a clear guide for practitioners across Europe to work towards a universal design in their VET context. It will consist of tips to universalise teaching and evaluation methods and to make curriculum adjustments beneficial for all students. Furthermore, it will provide advice on reasonable accommodation which could be offered to a student if the learning environment does not correspond to his/her needs.

The research centres will be in charge of the strategy, but will do so with sufficient support from the other partners. ILO will have a special say in this regard, in order to include the employer's point of view in the strategy.

This version of the strategy (called 'S00') will be available in English and will be uploaded in the knowledge centre. Only the finalised version (called 'S01') in WP6 will be translated in other languages.

Strategy at European level

S00 Strategy at European Level.pdf

<http://www.adam-europe.eu/prj/9976/prd/3/2/S00%20Strategy%20at%20European%20Level.pdf>

Produkt 'UD00: Universal Design 00'

Titel: UD00: Universal Design 00

Produkttyp: Lehrmaterial

Marketing Text: Teaching programme to work towards a universal design in the learning environment, based on the strategy at European level

Beschreibung: Each national project team will translate the strategy at European level into a concrete teaching programme for universal design at local level. A first version will be ready by the end of WP3 (called 'UD00'), but will be further developed and improved throughout WP4 ('UD01') and 5 ('UD02').

The programme will be a concrete action plan for national project teams to start implementing the strategy at European level in their selected learning environment.

It will include:

- A timeline
- A division of tasks
- Inclusive teaching methods
- Curriculum adjustments
- Structural/organisational measures
- A revision of the evaluation methods
- A list of reasonable accommodation measures

All will be adapted to the specific context of the country and the learning environment in particular.

All programmes in the different partner countries will have a similar break-down and lay-out, in order to make comparison easier. Indeed, although national project teams will start implementing at local level, at all times the European cooperation and extensive exchange of knowledge will be maintained.

Produkt 'UD01: Universal Design 01'

Titel: UD01: Universal Design 01

Produkttyp: Lehrmaterial

Marketing Text: Type of outputs / products / results A fine tuned teaching programme that is based on the principles of UD00, prepared during WP3

Beschreibung: During the school year 2013-2014, the preliminary teaching programmes (UD00) will be implemented in a learning environment in each partner country. Through action research and appreciative inquiry, this UD00 will be evaluated and further developed on a continuous basis. It will be a cyclic process where WP4 and WP6 are strongly interlinked.

At the end of the school year, a fine tuned teaching programme (called UD01) will be ready. It will be an adapted UD00 with improvements based on real life experiences, including:

- A timeline
- A division of tasks
- Teaching methods
- Curriculum adjustments
- A revision of the evaluation methods
- (Additional topics where relevant)

It should become a useful tool for practitioners and other stakeholders involved in the process, helping them to implement the strategy agreed upon at European level.

All programmes in the different partner countries will have a similar break-down and lay-out, in order to make comparison easier. They will be made available in the knowledge centre and will be disseminated among the stakeholders (including employers) in order to receive feedback.

Produkt 'List 1 of reasonable accommodations'

Titel: List 1 of reasonable accommodations

Produkttyp: Lehrmaterial

Marketing Text: List 1 of reasonable accommodations for students with SEN, required in order to obtain the qualification of the vocational education / training

Beschreibung: The better the universal design, the less reasonable accommodations are needed.

For students with SEN we can assume that reasonable accommodations will be necessary in order to make it possible to obtain their qualification. Therefore, a list will be developed – as an annex to the UD01 - with reasonable accommodations. This list will not focus on one student in particular, but will give an overview on measures that can be taken in order to include students in the learning environment. It will give stakeholders ideas and suggestions. It is up to them to pick out what is useful in their situation.

The list will focus on 3 topics:

a. Individual measures relating to coping strategies:

1. stimulation of the learner and the learning process
2. differentiation in teaching methods and content
3. compensation (e.g. assistive technology)
4. remedial support (e.g. how to catch up with some learning problems)
5. dispensation

b. Individual adjustments to the evaluation process

c. Individual curriculum adjustments

The lists in the different countries will be compared by the partners. This might give the national project teams new ideas of measures that can be taken in their country.

Produkt 'UD02: Universal Design 02'

Titel: UD02: Universal Design 02

Produkttyp: Lehrmaterial

Marketing Text: A fine tuned teaching programme that is based on Universal design 01 that was the result of the second phase of the project

Beschreibung: During the school year 2014-2015, the teaching programmes (version: UD01) will be implemented in a learning environment in each partner country a second time. Through action research and appreciative inquiry, this UD01 will be evaluated and further developed on a continuous basis. It will be a cyclic process where WP4 and WP6 are strongly interlinked.

At the end of the school year, a fine tuned teaching programme (called UD02) will be ready. It will be an adapted UD01 with improvements based on real life experiences, including:

- A timeline
- A division of tasks
- Teaching methods
- Curriculum adjustments
- A revision of the evaluation methods
- (Additional topics where relevant)

It should become a useful tool for practitioners and other stakeholders involved in the process, helping them to implement the strategy agreed upon at European level.

Produkt 'Final evaluation research paper on the teaching programmes at country level and the strategy at European level'

Titel: Final evaluation research paper on the teaching programmes at country level and the strategy at European level

Produkttyp: Lehrmaterial

Marketing Text: Evaluation research paper, including an evaluation methodology, the outcomes from the evaluation research and overall conclusions and recommendations

Beschreibung: An evaluation research paper will be made, including:

- The evaluation methodology:

This methodology will be closely interlinked with the research methodology (developed in WP3) and will also follow the principles of an action research (cyclic process of research and action).

- The evaluation outcomes in each country

- Overall conclusions and recommendations

It will be the result of an elaborated work starting at the very start of the project with the development of the evaluation methodology. It will continue throughout the project with the analysis of interviews and questionnaires carried out regularly, and it will last until the very end of the project with the drafting of final conclusions. These conclusions will lead to a revised strategy at European level (which is described below and of which a first version was made in WP3).

The research centres of the consortium are in charge of this paper and will ensure that the evaluation methodology includes a clear division of tasks, in order to avoid misunderstandings. Partner 5, as WP leader, will keep track of the process.

Final Evaluation Research Paper

INVESTT Final Evaluation Research Paper.pdf

<http://www.adam-europe.eu/prj/9976/prd/9/2/INVESTT%20Final%20Evaluation%20Research%20Paper.pdf>

Produkt 'Dissemination paper on the evaluation carried out'

Titel: Dissemination paper on the evaluation carried out

Produkttyp: Lehrmaterial

Marketing Text: A 15 pages dissemination paper with an executive summary of the evaluation research and overall recommendations

Beschreibung: The full evaluation report will be a long and scientific document, which will be difficult to read for the wide public. Therefore, the consortium agreed to produce a reader-friendly, 15 pages-only dissemination paper as well. This paper will be an executive summary of the evaluation research paper, including overall conclusions and recommendations. Very often it will be combined with the finalised strategy at European level, which is described in the next deliverable.

The paper will be translated in all partner languages and in easy-to-read, and will be disseminated among the project partners' contacts and to the entire P2i stakeholder network. The paper will be made available on the web based knowledge centre and on the website of the project partners, and will be used as an important tool for promoting and exploiting the project products at regional, national and international level.

Produkt 'S01: Strategy at European level'

Titel: S01: Strategy at European level

Produkttyp: Lehrmaterial

Marketing Text: Strategy at European level helping practitioners across Europe to work towards a universal design in their concrete VET context

Beschreibung: The finalised strategy at European level is an important outcome from INVESTT and is therefore described as a separate deliverable, even though it will be combined often with the 2 previous deliverables.

The strategy is a result from the research carried out in WP3 at the one hand, and from the evaluation research carried out in WP6 at the other hand. It will be a practical tool and a clear guide for practitioners across Europe to work towards a universal design in their own VET context. It will consist of tips to universalise teaching and evaluation methods and to make curriculum adjustments beneficial for all students. Furthermore, it will provide advice on reasonable accommodation which could be offered to a student if the learning environment does not correspond to his/her needs.

The research centres will be in charge of finalising this strategy, but will do so with sufficient support from the other (associated) partners. ILO will have a special say in this regard, in order to include the employer's point of view in the strategy.

The strategy will be translated in 4 languages and in easy-to-read, and will be made available in the knowledge centre and on the partners' website.

Produkt 'Project leaflet'

Titel: Project leaflet

Produkttyp: Verbreitungsmethoden

Marketing Text: Promotion leaflet informing stakeholders on the project objectives

Beschreibung: An information leaflet on the 'who', 'what', 'why' and 'where' of the project will be developed. This leaflet will give overall information on the project objectives and outcomes, and will be used during the entire funding period and beyond. It will be made available in all partner languages and in easy-to-read, as we are convinced that this is the only way to reach a broad audience, and it will be uploaded on the project page of the web based knowledge centre as well as on the websites of the project partners.

Produkt '5 project newsletters'

Titel: 5 project newsletters

Produkttyp: Verbreitungsmethoden

Marketing Text: 6-monthly newsletters with info on the project

Beschreibung: 5 times during the project's lifetime, an electronic newsletter will be published. It will inform stakeholders on the state of affairs of the project and on other education related matters. The newsletters will be uploaded on the project page of the web based knowledge centre and actively spread among:

- The P2i stakeholder network (more than 500 contacts at this point, but this number will raise considerably as the INVESTT project progresses)
- The Standing Committee on Education and their contacts
- The entire EASPD database (close to 1500 contacts: service providers, policy makers, European organisations, and others) if relevant
- The professional network of all project partners at (trans)national and local level

Produkt 'Web based knowledge centre on inclusive education'

Titel: Web based knowledge centre on inclusive education

Produkttyp: Homepage

Marketing Text: Web based knowledge centre with information on inclusive (vocational) education, including project information

Beschreibung: During the 'Pathways to Inclusion' (P2i) project, a web based knowledge centre has been established giving all stakeholders and interested parties information on inclusive education.

www.pathwaystoinclude.eu

By the end of P2i, the knowledge centre will consist of:

- An overview of the situation in 10 EU countries of inclusive education
- Info on the education system in 10 EU countries
- Models of good practice
- Info on the Index for Inclusion, including the outcomes of an evaluation research
- Useful links
- Easy-to-read material and links

We now want to further develop this knowledge centre. By the end of INVESTT, it will consist of:

- models of good practice, focusing on VET
- the research papers and dissemination papers, developed in this project
- useful links, focusing on VET
- project related information: objectives, newsletters, events, etc.
- new easy-to-read material and links
- a strategy at European level, helping practitioners to develop inclusive teaching methods and curricula in VET settings.

Produkt 'National seminars'

Titel: National seminars

Produkttyp: andere

Marketing Text: National seminars, introducing the project at national level and facilitating exploitation

Beschreibung: In the 2nd half of the project, each partner country will organise at least 1 national seminar, aiming at promoting the project at national level, encouraging them to use or further develop the material and attracting them to become member of the stakeholder network. Furthermore, these seminars will be good occasions to:

- Clarify the needs of stakeholders in the field
- Ask them their opinion on our project work in order for us to make improvements
- Bring stakeholders together in order to learn from each other and to inform them on what is happening at international level (legislation, EU projects, models of good practice)

Produkt 'Stakeholder forums in countries outside the partnership'

Titel: Stakeholder forums in countries outside the partnership

Produkttyp: andere

Marketing Text: Stakeholder seminars, introducing the project and facilitating exploitation

Beschreibung: To exploit the project as wide as possible, we will organise 4 stakeholder forums in countries outside the partnership.

These seminars will be good occasions to:

- Clarify the needs of stakeholders
- Ask them their opinion on our project work in order for us to make improvements
- Encouraging them to use or further develop the material
- Attracting them to become member of the stakeholder network
- Bring stakeholders together to learn from each other and to inform them on what is happening at international level

Produkt 'Stakeholder network'

Titel: Stakeholder network

Produkttyp: andere

Marketing Text: Network of stakeholders in the field of (vocational) education and training, with an interest in inclusive education and training

Beschreibung: During the P2i project an active stakeholder network on Inclusive education has been established. This network is a digital platform and consists of a group of people committed to contribute to the knowledge centre, to EASPD's political statements on inclusive education and to an education newsletter issued by EASPD twice a year. In exchange for their support, they receive the newsletter and they are being kept informed on relevant events and developments in other countries and at European level.

We now want to further elaborate the network, focusing on stakeholders in the VET field. Such a European network has the advantage that a broad range of different realities and success stories can be gathered, and that an important group of stakeholders can be reached in a spirit of mutual learning and synergy.

Final conference

Datum 21.10.2015

Beschreibung By the end of the project, a final conference will be organised in Salzburg. This event will ensure that the voices of all stakeholders are heard and that they are informed about the main project deliverables as tools to improve their work. We aim at reaching at least 150 participants, offering them the opportunity to be actively involved, to get in contact with colleagues from other European countries and to give feedback on the work done by the consortium. In order to encourage interaction from the audience, several workshop sessions in smaller groups will be planned. We also want to involve persons with disabilities by giving them the chance to do a presentation or by involving them as a speaker in one of the workshops.

Zielgruppe

- Persons with disabilities
- Family of persons with disabilities
- Vocational education and training centres/schools (head masters and other school staff)
- Service providers
- Employers and employment agencies
- Policy makers
